## **Surviving Cancer:**

**Surviving Cancer** Michael A. Sirover, 2008-12-12 Overview coming soon      **Surviving Cancer** John Poothullil, 2018-05-30 *Surviving Cancer* offers hope and a strategy for anyone who has been diagnosed with a solitary tumor. In reading these pages you will learn that the body can continue living while accommodating a solitary cancer. There are actions you can take that may prevent it from spreading even if there are complications. *Surviving Cancer* explains how you can change your diet and lifestyle habits to survive cancer to keep it from metastasizing and spreading to other organs in your body. Most of all it will explain how you literally starve cancer cells forcing them to disappear or die. The main focus of this book will teach you that diet is perhaps the key factor in defeating cancer especially avoiding grains. Grains create enormous amounts of glucose in your bloodstream and cancer cells thrive on glucose to survive and multiply. High blood sugar levels also encourage the body to release insulin and again this is a great danger to your cancer. Insulin promotes cell growth including cancer cells. The book provides insightful information on the causes of cancer how it forms how it may spread and what you can do to control the cancer and return to a healthy life. The chapters also contain specific advice on avoiding exposure to environmental toxins the value of sleep exercise and stress reduction the use of spices in cooking building good bacteria in your gut and many other factors you can control that may help prevent a cancer from spreading to other parts of the body. This book is for anyone who has cancer localized to a single site and not yet colonized in another part of the body. It is also for anyone who believes they are at risk of cancer due to heredity lifestyle working conditions or for any other reason. *Surviving Cancer* is also especially important for anyone with Type 2 diabetes with or without cancer to learn about the link between the two. If you have diabetes this is an important cautionary book to read to prevent yourself from developing cancer.

*Surviving Cancer* Joseph E. Bosiljevac Jr., 2010-10-01 This is the story of a patient with Stage III breast cancer who chose treatment using complementary and alternative methods over conventional medical therapy. She is currently seventeen years post diagnosis with no evidence of tumor. Her personal story in her own words is presented as well as a scientific analysis by the author as a medical case study. A commentary about use of conventional and alternative methods in cancer and overall health is included.

**Surviving Cancer** David E. Leveille, 2014-02-14 This year there will be more than 1 660 290 new cancer cases in the U S. Behind that sad statistic are many stories with both similarities and variations. Cancer's shadow looms large even for survivors. Fears often linger. Will the cancer come back? Will I experience limitations and side effects for the rest of my life? Are my loved ones predisposed to this disease? Experiencing cancer or other life threatening diseases is life changing and all pervasive. It affects every part of one's life. It is not just a physical event. For some it can become a spiritual journey transforming relationships in a positive and healing way. The author explains the power of gaining knowledge about one's disease and the treatments available for it and the power of hope and a spiritual life including a faith in something bigger than oneself.

Greenwald, 2024-06-28 Howard P Greenwald takes an incisive look at how class race sex psychological state type of health care and available treatments affect one s chance of surviving cancer Drawing on a ten year survival study of cancer patients he synthesizes medical epidemiological and psychosocial research in a uniquely interdisciplinary and eye opening approach to the question of who survives cancer and why Scientists health care professionals philanthropists government agencies and the public all agree that significant resources must be allocated to fight this dreaded disease But what is the most effective way to do it Greenwald argues that our priorities have been misplaced and calls for a fundamental rethinking of the way the American medical establishment deals with cancer He asserts that prevention and experimental therapy have only limited value whereas the availability of conventional medical care has a greater influence on cancer survival Class and race become strikingly significant in predicting who has access to health care and thus can obtain medical treatment in a timely effective manner Greenwald counters the popular notion that personality and psychological factors strongly affect survival and he underscores the importance of early detection His research shows that health maintenance organizations while sometimes

prone to delays offer low income patients a better chance of ultimate survival Greenwald pleads for immediate attention to the inadequacies and inequalities in our health care delivery system that deter patients from seeking early medical care Instead of focusing on research and the hope for a breakthrough cure Greenwald urges renewed emphasis on ensuring available health care to all Americans In its challenge to the thrust of much biomedical research and its critique of contemporary American health care as well as in its fresh and often counterintuitive look at cancer survival Who Survives Cancer is invaluable for policymakers health care professionals and anyone who has survived or been touched by cancer This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992      **Surviving Cancer** Danette G.
