**Survivors** Rebecca Clifford, 2020-09-29 Shortlisted for the 2021 Wolfson History Prize and a finalist for the 2021 Cundill History Prize Told for the first time from their perspective the story of children who survived the chaos and trauma of the Holocaust named a best history book of 2020 by the Daily Telegraph Impressive beautifully written judicious and thoughtful Will be a major milestone in the history of the Holocaust and its legacy Mark Roseman author of *The Villa the Lake the Meeting* How can we make sense of our lives when we do not know where we come from This was a pressing question for the youngest survivors of the Holocaust whose prewar memories were vague or nonexistent In this beautifully written account Rebecca Clifford follows the lives of one hundred Jewish children out of the ruins of conflict through their adulthood and into old age Drawing on archives and interviews Clifford charts the experiences of these child survivors and those who cared for them as well as those who studied them such as Anna Freud *Survivors* explores the aftermath of the Holocaust in the long term and reveals how these children often branded the lucky ones had to struggle to be able to call themselves survivors at all Challenging our assumptions about trauma Clifford s powerful and surprising narrative helps us understand what it was like living after and living with childhoods marked by rupture and loss *Children in the Holocaust and its Aftermath*

Sharon Kangisser Cohen, Eva Fogelman, Dalia Ofer, 2017-04-01 The testimonies of individuals who survived the Holocaust as children pose distinct emotional and intellectual challenges for researchers as now adult interviewees recall profound childhood experiences of suffering and persecution they also invoke their own historical awareness and memories of their postwar lives requiring readers to follow simultaneous disparate narratives This interdisciplinary volume brings together historians psychologists and other scholars to explore child survivors accounts With a central focus on the Kestenberg Holocaust Child Survivor Archive s over 1 500 testimonies it not only enlarges our understanding of the Holocaust empirically but illuminates the methodological theoretical and institutional dimensions of this unique form of historical record

**Virtues from Hell: Survivors of Conflicts and the Reconstruction-Reconciliation Processes** Fidèle Ingiyimbere, 2022-01-01 This book offers a critical examination of certain ideas and values such as remembering forgiveness story telling through Truth and Reconciliation Commissions etc that under gird the transitional practices and mechanisms of societies emerging from conflicts It does so by making the survivors experience the supreme and ultimate judge of the legitimacy of such practices While many scholars have dealt with these topics this book provides a unique perspective on them by using personal stories narratives and memoirs of the survivors as a checking point of the theoretical elaboration of these ideas and values By means of an existential phenomenological analysis of the situation of survivors of gross human rights violations the book assesses how many resources are still available to them so that they can contribute to the

processes of reconstruction and reconciliation of their societies This analysis constitutes the background for reading the rest of the book which challenges some assumptions and presumptions of transitional practices such as healing through truth telling or providing justice through reparations It does so by presenting nuanced suggestions on the ways survivors can participate in the reconstruction reconciliation processes without jeopardizing their own well being

**Becoming Human Again** Donald E. Miller, 2020-03-31 Genocide involves significant death and trauma Yet the enormous scope of genocide comes into view when one looks at the factors that lead to mass killing the struggle for survival during genocide and the ways survivors reconstruct their lives after the violence ends Over a one hundred day period in 1994 the country of Rwanda saw the genocidal slaughter of at least 800 000 Tutsi at the hands of members of the Hutu majority government This book is a powerful oral history of the tragedy and its aftermath from the perspective of its survivors Based on in depth interviews conducted over the course of fifteen years the authors take a holistic approach by tracing how victims experienced the horrific events as well as how they have coped with the aftermath as they struggled to resume their lives The Rwanda genocide deserves study and documentation not only because of the failure of the Western world to intervene but also because it raises profound questions about the ways survivors create a new life out of the ashes of all that was destroyed How do they deal with the all encompassing traumas of genocide Is forgiveness possible And what does the process of rebuilding teach us about genocide trauma and human life

**The Puzzle of India's Governance** Subrata K. Mitra, 2007-05-07 India no longer gets an easy ride as the world's largest democracy Spectacular terrorist attacks on its Parliament and places of worship communal riots of unprecedented ferocity lingering separatist insurgency and violent caste conflict in impoverished regions have combined to cause a closer appraisal of India's capacity to sustain the rule of law This book shows how governance is high when people follow the rules of transaction derived from binding custom legislation administrative practices and the constitution The key question that underpins this analysis is why do some people sometimes follow rules and not others This study responds to this central question by looking at analytical narratives of political order in six Indian regional States surveys of social and political attitudes and extended interviews with political leaders administrators and police officers It shows how by drawing on the logic of human ingenuity driven by self interest rather than mechanical adherence to tradition and ideology these regional elites can design institutions and promote security welfare and identity which enhance governance

A Rumor of Empathy Lou Agosta, 2015-06-05 Empathy is an essential component of the psychoanalyst s ability to listen and treat their patients It is key to the achievement of therapeutic understanding and change A Rumor of Empathy explores the psychodynamic resistances to empathy from the analyst themselves the patient from wider culture and seeks to explore those factors which represent resistance to empathic engagement and to show how these can be overcome in the psychoanalytic context Lou Agosta shows that classic interventions can themselves represent resistances to empathy such as the unexamined life over medication and the application of devaluing diagnostic labels to expressions of suffering Drawing on Freud Kohut Spence and other major thinkers Agosta explores how empathy is distinguished as a unified multidimensional clinical engagement encompassing receptivity understanding interpretation and narrative In this

way he sets out a new way of understanding and using empathy in psychoanalytic theory and clinical practice When all the resistances have been engaged defences analyzed diagnostic categories applied prescriptions written and interpretive circles spun out in empathy one is quite simply in the presence of another human being Agosta depicts the unconscious forms of resistance and raises our understanding of the fears of merger that lead a therapist to take a step back from the experience of their patients using ideas such as altruistic surrender and compassion fatigue which are highlighted in a number of clinical vignettes Empathy itself is not self contained It is embedded in social and cultural values and Agosta highlights the mental health culture and its expectations of professional organizations This outstanding text will be relevant to psychoanalysts psychotherapists who wish to make a contribution to reducing the suffering and emotional distress of their clients and also to trainees who are more vulnerable to the professional demands on their capacity for empathic listening Lou Agosta Ph D teaches empathy in systems and the history of psychology at the Illinois School of Professional Psychology at Argosy University He is the author of numerous articles on empathy in human relations aesthetics altruism and film He is a psychotherapist in private practice in Chicago USA See [www.aRumorOfEmpathy.com](http://www.aRumorOfEmpathy.com) **You Don't Need to Forgive** Amanda Ann Gregory, 2025 Feeling pressured to forgive offenders is a common reason why trauma survivors avoid mental health services and support Trauma psychotherapist Amanda Ann Gregory explores the dangers of forced forgiveness and the benefits of elective forgiveness which gives survivors the agency to progress in their recovery on their own terms

People v. Hana; People v. Gallina; People v. Rode, 447 MICH 325 (1994), 1994 94877 94878 **The Peace In Between** Astri Suhrke, Mats Berdal, 2013-03 This volume examines the causes and purposes of post conflict violence The end of a war is generally expected to be followed by an end to collective violence as the term post conflict that came into general usage in the 1990s signifies In reality however various forms of deadly violence continue and sometimes even increase after the big guns have been silenced and a peace agreement signed Explanations for this and other kinds of violence fall roughly into two broad categories those that stress the legacies of the war and those that focus on the conditions of the peace There are significant gaps in the literature most importantly arising from the common premise that there is one predominant type of post war situation This post war state is often endowed with certain generic features that predispose it towards violence such as a weak state criminal elements generated by the war time economy demobilized but not demilitarized or reintegrated ex combatants impunity and rapid liberalization The premise of this volume differs It argues that features which constrain or encourage violence stack up in ways to create distinct and different types of post war environments Critical factors that shape the post war environment in this respect lie in the war to peace transition itself above all the outcome of the war in terms of military and political power and its relationship to social hierarchies of power normative understandings of the post war order and the international context This book will be of much interest to students of war and conflict studies peacebuilding and IR Security Studies in general **The Future of the Holocaust** Berel Lang, 2018-09-05 In The Future of the Holocaust

Berel Lang continues his inquiry into the causal mechanisms of decision making and conduct in Nazi Germany and into responses to the genocide by individuals and nations an inquiry that he began in *Act and Idea in the Nazi Genocide* and pursued in *Heidegger's Silence* Raising the question now of what the future of the Holocaust is he addresses among other topics how history and memory together shape views of the Holocaust how the concept of intention which played a crucial part in the events of half a century ago shapes history and memory themselves and how future views of this genocide may alter those of today In addition Lang explores cultural representations of the Final Solution from monuments to public school curricula within the Jewish and German communities He analyzes ethical issues concerning such concepts as intention responsibility forgiveness and revenge and puts forward a theory of the history of evil which provides a context for the Holocaust both historically and morally Addressing the claims that the Nazi genocide was unique Lang argues that the Holocaust is at once an actual series of events and a still future possibility If the Holocaust occurred once he argues it can occur twice and this view of the future remains an unavoidable premise for anyone now writing or thinking about that event in the past
