Sustainable Communities The Potential For Econeighbourhoods:

Sustainable Communities Hugh Barton, 2013-12-02 This book re addresses the concepts of neighbourhood and community in a refreshing and challenging way It will be of immense benefit not only to town planners but also to all those professional and voluntary groups and politicians who seek to create the new communities of tomorrow From the Foreword by Jed Griffiths Past President of the Royal Town Planning Institute There is widespread support for the principle of creating more sustainable communities but much hazy wishful thinking about what this might mean in practice In reality we witness more the death of local neighbourhoods than their creation or rejuvenation reflecting an increasingly mobile privatized and commodified society Sustainable Communities examines the practicalities of re inventing neighbourhoods It is neither an idealistic utopian tract nor a designer's manual but is rather a serious attempt to address the real issues This collection of expert contributions examines the nature of local community and methods of building social capital presents the findings of a world wide survey of eco neighbourhoods and eco villages with case studies from the United Kingdom Europe America and Australia develops a fresh perspective on the planning and design of neighbourhoods in urban areas based on the eco system approach explores practical programmes for local resource management and the implications for community based decision making provides a detailed appendix listing current eco village and eco neighbourhood schemes by country Written by an interdisciplinary team of social and environmental scientists town planners and urban designers this is a thought provoking and important contribution to both the theory and practice of the development of sustainable communities Sustainable Communities and Urban Housing

Montserrat Pareja-Eastaway, Nessa Winston, 2016-12-08 Since the start of the twenty first century urban communities have faced increasing challenges in housing affordability with environmental issues causing additional concern It is clear that changes to urban housing are needed to enhance the resilience of cities and improve the economic social and physical well being of residents This book provides a comparative cross national perspective on urban housing and sustainability in Europe exploring the key barriers and drivers associated with sustainable urban development and community regeneration Country specific chapters allow for easy comparison with each summarizing how sustainable housing operates in the country in question before going on to discuss the key barriers and drivers at play This book brings a sustainability perspective to the comparative housing literature which frequently fails to integrate the social economic and environmental pillars of sustainability The book outlines many of the changes that professionals and residents will need to make to their practices and cultures in order to enhance housing resilience Students researchers and professionals with an interest in sustainable housing creation and regeneration will find this book an invaluable reference **Sustainable Development Research in the Asia-Pacific Region**

Walter Leal Filho, Judy Rogers, Usha Iyer-Raniga, 2018-02-27 This multidisciplinary book focuses on best practices in sustainability research in the Asia Pacific Region Drawing links between research practice education for sustainability and the needs of industry it addresses the sustainable development goals SDGs

The book also presents research undertaken by a wide range of universities on matters related to sustainable development in order to promote research in this area across multiple disciplines Four key themes are explored 1 Education for Sustainability 2 Sustainable Cities 3 Sustainable Buildings 4 Sustainable Infrastructure This unique book documents and disseminates the wealth of know how on sustainable development research in the Asia Pacific Region today It presents lessons learned and comparative case studies from various countries including India China Indonesia the Philippines Bangladesh New Zealand and Australia

Residential Landscape Sustainability Carl Smith, Nigel Dunnett, Andy Clayden, 2008-04-15 This valuable resource for developers and designers will help to develop design solutions sympathetic to the environment and improve the sustainability of residential landscapes The landscapes around housing have a crucial role in creating a more sustainable future with carbon neutral homes This book shows how to improve the sustainable profile of new residential developments through landscape planning design and management by conserving resources and minimising pollution and by enhancing ecological diversity This may be achieved without significant additional capital outlay The residential landscape sustainability checklist gives housing developers landscape architects architects and planners a tool with which to assess the environmental implication of their schemes throughout the design process from site planning to detailed design The checklist focuses on residential housing developments but many features of the tool including improving energy efficiency materials selection planting design and management can also be applied to a wide range of

different types of development from school grounds to retail parks *Enterprising Communities* Anna Davies,2012-01-12 Provides an internationally grounded and critical review of grassroots sustainability enterprises focusing on the processes that lead to their formation the governing context that shapes their evolution the benefits they create and the challenges that they face in different contexts **City of Well-being** Hugh Barton,2016-11-10 City of Well being provides a radical and holistic introduction to the science and art of town planning It starts from the premise that the purpose of planning is the health well being and sustainable quality of life of people It offers inspiration information and an integrated perspective which challenges all professions and decision makers that affect the urban environment **2007 ARCC Spring Research Conference** Architectural Research Centers Consortium. Spring Conference,2008 **Building the Ecological City** R R White,2002-02-22 If the modern city is a monument to anything it is a monument to man s inefficiency Our cities are plagued by problems of congestion waste and pollution that deplete natural resources damage the environment and reduce the quality of life of citizens The irony is as this fascinating new study shows that it doesn t have to be like this Building the ecological city describes the problems we face and puts forward solutions to the question how can we build cities that provide an acceptable standard of living for their inhabitants without depleting the ecosystems and bio geochemical cycles on which they depend The book suggests and examines the concept of urban metabolism in which the city is characterized as a set of interlinked systems of physical flows linking air land and water A series of chapters looks at the production and management of waste energy use and air emissions water supply and management urban land use and air quality issues Within the broader context of climate change the book then considers a range of practical strategies for restoring the health of urban ecosystems from the restoration of brownfield land to productive use through to improving air quality and making better use of water resources Building the ecological city is a major contribution to better urban management and planning for both citizens and the environment and is an invaluable sourcebook for urban and national planners architects and environmental agencies Authoritative review of the environmental impact of modern cities Seeks to identify a viable model for urban living in relation to all the resources land air and water upon which cities depend but currently tend to deplete or destroy Essential reading for urban planners architects local and national government officers environmental agencies worldwide and students of ecology and environmental sciences Food Systems Failure Christopher Rosin,Paul Stock,Hugh Campbell,2013-06-17 This book provides a critical assessment of the contemporary global food system in light of the heightening food crisis as evidence of its failure to achieve food security for the world s population A key aspect of this failure is identified in the neoliberal strategies which emphasize industrial efficiencies commodity production and free trade ideologies that underlie agricultural and food policies in what are frequently referred to as developed countries The book examines both the contradictions in the global food system as well as the implications of existing ideologies of production associated with commodity industrial agriculture using evidence from relevant international case studies The book s first

section presents the context of the food crisis with contributions from leading international academics and food policy activists including climate scientists ecologists and social scientists These contributions identify current contradictions in policy and practice that impede solutions to the food crisis Set within this context the second section assesses current conditions in the global food system including economic viability sustainability and productivity Case study analyses of regions exposed to neoliberal policy at the production end of the system provide insights into both current challenges to feeding the world as well as alternative strategies for creating a more just and moral food system

Surviving the Future David Fleming, Shaun Chamberlin, 2016 *Surviving the Future* is a story drawn from the fertile ground of the late David Fleming s extraordinary *Lean Logic A Dictionary for the Future and How to Survive It* That hardback consists of four hundred and four interlinked dictionary entries inviting readers to choose their own path through its radical vision Recognizing that *Lean Logic* s sheer size and unusual structure can be daunting Fleming s long time collaborator Shaun Chamberlin has selected and edited one of these potential narratives to create *Surviving the Future* The content rare insights and uniquely enjoyable writing style remain Fleming s but are presented here at a more accessible paperback length and in conventional read it front to back format The subtitle *Culture Carnival and Capital in the Aftermath of the Market Economy* hints at Fleming s vision He believed that the market economy will not survive its inherent flaws beyond the early decades of this century and that its failure will bring great challenges but he did not dwell on this We know what we need to do We need to build the sequel to draw on inspiration which has lain dormant like the seed beneath the snow *Surviving the Future* lays out a compelling and powerfully different new economics for a post growth world One that relies not on taut competitiveness and eternally increasing productivity putting the grim into reality but on the play humor conversation and reciprocal obligations of a rich culture Building on a remarkable breadth of intellectual and cultural heritage from Keynes to Kumar Homer to Huxley Mumford to MacIntyre Scruton to Shiva Shakespeare to Schumacher Fleming describes a world in which as he says there will be time for music This is the world that many of us want to live in yet we are told it is idealistic and unrealistic With an evident mastery of both economic theory and historical precedent Fleming shows that it is not only desirable but actually the only system with a realistic claim to longevity With friendliness humor and charm *Surviving the Future* plucks this vision out of our daydreams and shows us how to make it real

Cities in Transition Tasleem Shakur, 2005 *Handbook of Cities and the Environment* Kevin Archer, Kris Bezdecny, 2016-12-30 With an ever growing majority of the world s human population living in city spaces the relationship between cities and nature will be one of the key environmental issues of the 21st Century This book brings together a diverse set of authors to explore the various aspects of this relationship both theoretically and empirically Rather than considering cities as wholly separate from nature a running theme throughout the book is that cities and city dwellers should be characterized as intrinsic in the creation of specifically urban generated socio natures

Retrofitting Sprawl Emily Talen, 2015 Planners geographers designers and

architects present research grounded in diverse locales including Phoenix Seattle Atlanta and Washington D C metro areas The authors address head on the most controversial aspects of sprawl issues of power and control justice and equity and American attitudes about regulating private development

Community-Owned Transport Leigh Glover,2016-11-03 City and state governments around the world are struggling to achieve environmentally sustainable transport Economic technological city and transport planning and human behaviour solutions are often hampered by ineffective implementation So attention is now turning to institutional governmental and political barriers Approaches to these implementation problems assume that transport ownership can only be public owned by state entities or private corporate or personal Another option largely unexplored to date is communal ownership of transport Community Owned Transport proposes and develops the notion that communal ownership has a historical basis and provides unique opportunities for providing personal mobility It looks at the historical roots of modern urban transport s failings as those of technological change and the associated governing of transport systems particularly the role of public sector institutions Community ownership is explored through the new sharing economy developments car sharing ridesharing and bicycle share schemes and older social innovations in ecovillages and communal living Models and practices of community ownership of transport are provided and this study also discusses how community ownership might contribute to sustainable transport Drawing widely on different disciplines and fields of scholarship this book explores the conceptual and practical aspects of communal ownership of transport It will be a valuable resource for those seeking innovative approaches to addressing the pressing problems of transport including graduate and postgraduate students as well as policymakers practitioners and community groups

Community Gardening as Social Action Claire Nettle,2016-05-23 There has been a resurgence of community gardening over the past decade with a wide range of actors seeking to get involved from health agencies aiming to increase fruit and vegetable consumption to radical social movements searching for symbols of non capitalist ways of relating and occupying space Community gardens have become a focal point for local activism in which people are working to contribute to food security question the erosion of public space conserve and improve urban environments develop technologies of sustainable food production foster community engagement and create neighbourhood solidarity Drawing on in depth case studies and social movement theory Claire Nettle provides a new empirical and theoretical understanding of community gardening as a site of collective social action This provides not only a more nuanced and complete understanding of community gardening but also highlights its potential challenges to notions of activism community democracy and culture

Public Engagement and Social Science Stella Maile,David J. Griffiths,2014 Drawing on social science conversations at a lively caf in Bristol this highly original book explores the value of public engagement in a wider social science context The chapters range from themes such as the dialogic character of the social sciences pragmatism in responses and the underpinnings of managerial approaches to the restructuring of higher education The first part reflects upon the different social and political inflections of public

engagement It is followed by chapters based upon talks at the caf that were concerned with public engagement and the contribution of social science to a reflexive understanding of the dilemmas and practices of daily life Together the contributors offer a refreshing look at the role of social science in the societies it examines *Urban Environmentalism* Peter Brand, Michael Thomas, 2013-02-01 A critical examination of urban policies and management practices used to make cities sustainable With an international perspective the book describes urban environmental agendas and how they arose in the context of globalization urban economic restructuring and the need to make cities competitive It argues that the environment became an integral part of city development policy turning attention not only to physical and ecological issues but also to improving the economic performance of cities and the lives of citizens The authors also go beyond the technical issues to explore the political importance of urban environmentalism using case studies to illustrate both its international scope and place specific characteristics which are inexorably influencing city development throughout the world In connecting the concept to its political effects the book raises issues such as local democracy equality and social regulation all of which are increasingly concerning academics professionals environmentalists and city authorities alike **Sustainability Governance and Hierarchy** Philippe Hamman, 2019-06-19 Sustainability Governance and Hierarchy provides a solid theoretically and empirically grounded reflection on the concept of sustainability governance This idea has been growing in popularity in social science literature as well as among decision makers and governance actors as it brings together two vast fields of study that have sometimes been dismissed as vague or ideologically loaded In order to link the concepts of sustainability and governance the book is organized around the exploration of hierarchy issues which often lie in the background of the existing literature but are not the focus of analysis The chapters reflect ongoing controversies and dialogue between scientists with different theoretical and thematic backgrounds who are all willing to participate in and contribute to a constructive effort to reach a more inclusive and more theoretically relevant stage for sustainability studies being content with merely global analyses The book is an innovative contribution to the hierarchy non hierarchy debate regarding governance arrangements in the field of sustainability and sustainability studies This book will be of interest to advanced students and scholars focusing on governance issues sustainability studies environmental studies as well as on the methodological aspects of the social sciences economy geography law philosophy political science sociology urbanism and planning This book is published with the support of the European Union the European Regional Development Fund ERDF and the Upper Rhine Interreg V programme as part of the Upper Rhine Cluster for Sustainability Research project **Culture, Environment and Ecopolitics** Nick Heffernan, David A. Wragg, 2020-05-15 Culture Environment and Ecopolitics brings together a series of new reflections on historical and current ecological and environmental predicaments By way of critical interventions in environmental thought and through engagements with literary visual architectural philosophical and more general cultural studies scholarship this collection of essays by an international panel of writers breaks new interpretative

ground While techno science has in some quarters been elevated to a master discourse of humanity's salvation charged with providing a magical fix for planetary ecological dilemmas the focus of our volume is on the importance of cultural reflection for bringing matters of local and global import to light Moving from the abstractions of eco critical utopianisms to the concrete identity of the land in the poetry of John Clare from British Petroleum's attempts to re brand climate change to examples of eco architecture and much more besides these essays exemplify ways in which eco political thought and practice might now be theorized The collection is framed by a substantial editors introduction which offers but one contextualization of the ideas and critical trajectories that follow Culture Environment and Ecopolitics will allow readers to discover original intersections and argumentative cross references across contested terrains in a world increasingly troubled by ecological crises
