the Soviet Union until the present Based on extensive original research the book charts the struggles of universities showing how chaos and decline came to what had been one of the triumphs of the Soviet Union a higher education system which provided a high standard of advanced education to large numbers of people and made major research achievements The book shows how a lack of funds lack of commercial experience and the ending of former means of support such as strong university state industry links brought about huge disruption how universities responded with a range of measures such as charging for tutoring and examinations handling research on a commercial basis and new forms of co operation and how all this impacted on subjects of study and on underlying ideas about what a university is for The book argues that the shock to the system in Russia was so severe that the Russian case serves as an excellent survival guide to universities experiencing similar changes in other parts of the world By investigating the phenomenon of Russian universities becoming more market oriented the book contributes to developing further the marketization concept It summarizes the existing knowledge in this field of study offers a new framework for analysis of the phenomenon of university marketization and discusses the marketization of Russian universities in the light of comparative studies Today's Universities: Combining Rigour with Relevance Michigan State University, 2015-08-05 Last year the Dubai International Conference in Higher Education considered the global challenge of sustaining success in higher education This year we posed the question How do universities combine rigour with relevance Once again we have invited all those involved in the higher education community to come together to share insights related to the provision of education that is rigorous and at the same time relevant The three key premises of the conference are these 1 Higher education institutions must demonstrate their relevance to the needs of the workforce in a landscape of constant and rapid economic and social change 2 They must maintain the rigorous academic standards that are the hallmark of a quality institution 3 With the accelerating power and reach of the web universities must meet unprecedented challenges as technological innovation disrupts their traditional business model Unless individual universities prove that they are capable of adapting successfully in the face of these three pressures their futures may be uncertain **Handbook of College and University Teaching** James E.
