## **Suzhou Scenery:**

The Gardens of Suzhou Ron Henderson, 2012-12-18 Suzhou near Shanghai is among the great garden cities of the world. The city's masterpieces of classical Chinese garden design built from the eleventh through the nineteenth centuries attract thousands of visitors each year and continue to influence international design. In *The Gardens of Suzhou*, landscape architect and scholar Ron Henderson guides visitors through seventeen of these gardens. The book explores UNESCO world cultural heritage sites such as the Master of the Nets Garden, Humble Administrator's Garden, Lingering Garden, and Garden of the Peaceful Mind, as well as other lesser-known but equally significant gardens in the Suzhou region. Unlike the acclaimed religious and imperial gardens found elsewhere in Asia, Suzhou's gardens were designed by scholars and intellectuals to be domestic spaces that drew upon China's rich visual and literary tradition, embedding cultural references within the landscapes. The elements of the gardens confront the visitor: rocks, trees, and walls are pushed into the foreground to compress and compact space as if great hands had gathered a mountainous territory of rocky cliffs, forests, and streams, then squeezed it tightly until the entire region would fit into a small city garden. Henderson's commentary opens Suzhou's gardens to non-Chinese visitors. Drawing on years of intimate experience and study, he combines the history and spatial organization of each garden with personal insights into their rockeries, architecture, plants, and waters. Fully illustrated with newly drawn plans, maps, and original photographs, *The Gardens of Suzhou* invites visitors, researchers, and designers to pause and observe astonishing works from one of the world's greatest garden design traditions.

*A Treatise on the Garden of Jiangnan* Hongxun Yang, 2022-08-02 This book presents a study into the art of Jiangnan classical garden. Jiangnan, the south of the Yangtze River, refers to the water network region along the lower reaches of the Changjiang River, formerly known as the Yangtze River, where Jiangsu Province Chinese gardens were primarily constructed during the 16th and 17th centuries of the later Ming and early Qing dynasties. The Jiangnan garden, an architectural space where artificial and natural elements are combined, represents the elite of classical Chinese gardens and serves as a prime exemplar for its northern counterpart, the Ming and Qing imperial gardens. The book pursues an interdisciplinary approach, combining historical information with case studies and other methods. Charts and pictures are used to supplement and reinforce the conclusions drawn from the macro narrative, enhancing the authenticity and readability of the historical monographs. It represents the first study of the classical art of landscape design in China, offering readers an insightful introduction.

Kalman Dubov, 2023-05-21 Human ingenuity has created three great canals in different locations on our planet Each of these transformed the country and the world in its own way and time The oldest canal to be constructed was the Grand Canal an important Chinese waterway connecting Suzhou and Beijing a distance of 1 104 miles 1 776 km This is the longest artificial canal in the world and is a UNESCO World Heritage Site Not as well known as the other great canals this important waterway enabled merchants to bring grain and other goods over this long distance so that merchants could transport goods throughout the kingdom The Grand Canal was first constructed by Fuchai King of the State of Wu whose capital is in present day Suzhou in 486 BCE Over the centuries the Grand Canal was expanded and rebuilt and is still in use in China The second oldest canal was constructed in ancient Egypt when the waterways of the Nile River were expanded to ease shipping goods throughout the country Much later modern engineers reconstructed the Suez Canal an effort that required much ingenuity and effort to bring this project to fruition This waterway at 120 1 miles was opened in 1869 transforming modern shipping of goods by reducing the journey by between Britain and India by 4 500 miles Up to this time ships had to travel around Africa s Cape of Good Hope or past the tip of South America Magellan or Drake Passages to reach the other side of the world Both of these points are dangerous with many ships lost at sea The Suez Canal completely bypassed this difficulty However the territorial disputes and enmities between the Egyptians and Israelis soon saw conflict across these placid waters In each of the major wars fought between these two countries the passage of mercantile ships through the Suez Canal became dangerous Once peace was established between Egypt and Israel maritime traffic resumed and the world benefited from that peace Today there is peace between these two countries and I recount the instances when I sailed on the Suez Canal The last canal to be built was in Panama making travel between the Atlantic and Pacific oceans possible French engineers tried to construct this canal but failed for various reasons The United States then took over the project and in vast effort saw the project to completion Two years of preparatory effort was necessary to construct infrastructure for the thousands of workers who would toil in the earthworks being moved to create the Panama Canal A notable effort was addressing the lethal malaria yellow fever and other tropical diseases endemic in this country In the end yellow fever was completely eradicated from Panama though malaria cases though low continue to be present The Panama Canal is 50 miles in length and opened on 15 August 1914 Today thousands of ships carrying passengers and goods travel through this and the other canals thereby transforming our world      Atlas of World Heritage ,2005 Take a photographic journey to these fantastic natural and cultural sites of China Full color photographs and highly detailed maps and background information make this an excellent gift book or reference volume      **An Illustrated Brief History of Chinese Gardens** Hardie Alison, 2022-10-10 There are many books published in English on Chinese gardens but the majority are primarily picture books with little informative content With a large number of illustrations of Chinese gardens ancient paintings block prints and other artefacts this book is a social

history of Chinese gardens and focuses on how gardens have functioned and been used in Chinese society through the ages. Apart from the aesthetic or philosophical aspects of Chinese gardens you may see how gardens functioned as real estate, how they gave opportunities of employment to skilled artisans, how they opened up outdoor space to both elite and lower class women, how they allowed men of different social classes and of different ethnicities to interact and gain mutual benefit, in short, how the existence of gardens exerted an influence on society as a whole. At the same time, the reader can find how the wider society and even socio-economic changes beyond China's own borders had an impact on how gardens in China developed.
