Rousseau,2009-09-28 *Black Woman s Burden* examines the historical endeavors to regulate Black female sexuality and reproduction in the United States through methods of exploitation control repression and coercion The myth of the angry Black woman has been built over generations through clever rhetoric and oppressive social policy Here Rousseau explores the continued impact of labeling and stereotyping on the development of policies that lead to the construction of national racial and gender identities for Black women Women of Ideas Dale Spender,2024-11-20 Originally published in 1982 with characteristic energy humour and learning Dale Spender traces three hundred years of women s ideas She uncovers not only the ways and words of women but the methods of men While men control knowledge she argues they are in a position to take women s ideas If they like them they use them if they don t they lose them Every fifty years women are required to reinvent the wheel for every generation of women is initiated into a world in which women s traditions have been denied and buried Providing convincing evidence that women s absence from the record as creative intellectual beings is not women s fault but men s Dale Spender claims at least 150 women from the past and suggests how such erasure can be avoided in the future Given that men take what they want from women s ideas Dale Spender advocates that women withdraw

their labour that they go on a knowledge strike for if women cannot control the knowledge they produce at least they can ensure that it cannot be used as evidence against them Exposing the inadequacies of much modern male scholarship the author provides the readers with the opportunity to share in her own discoveries excitement and mistakes in the process of researching and writing this book The result is that *Women of Ideas And What Men Have Done to Them* is an ambitious and provocative book which will be used as a reference for many years to come and which is also from beginning to end a stimulating read

Hidden Histories Deborah Bird Rose,1991 Filled with stories of massacres and murders of working life on cattle stations of friendships and foes of bureaucratic machinations and the individual struggles of Aboriginal Australians this book unleashes the concealed and hidden past

The Social Life of Stories Julie Cruikshank,2000-08-01 In this theoretically sophisticated study of indigenous oral narratives Julie Cruikshank moves beyond the text to explore the social significance of storytelling Circumpolar Native peoples today experience strikingly different and often competing systems of narrative and knowledge These systems include traditional oral stories the authoritative literate voice of the modern state and the narrative forms used by academic disciplines to represent them to outsiders Pressured by other systems of narrative and truth how do Native peoples use their stories and find them still meaningful in the late twentieth century Why does storytelling continue to thrive What can anthropologists learn from the structure and performance of indigenous narratives to become better academic storytellers themselves Cruikshank addresses these questions by deftly blending the stories gathered from her own fieldwork with interdisciplinary theoretical perspectives on dialogue and storytelling including the insights of Walter Benjamin Mikhail Bakhtin and Harold Innis Her analysis reveals the many ways in which the artistry and structure of storytelling mediate between social action and local knowledge in indigenous northern communities

Women and Science, 17th Century to Present Véronique Molinari,2011-05-25 If women s interest and participation in the advancement of science has a long history the academic study of their contributions is a far more recent phenomenon to be placed in the wake of second wave feminism in the 1970s and the advent of women s studies which have since then given impetus to research on female figures in specific fields or more generally speaking on women s battles to gain access to knowledge education and recognition in the scientific world These studies while providing a useful insight into the contributions of a few more or less well known figures have mostly focused however on the obstacles that women have had to overcome in the field of education and employment or in their quest for acknowledgement by their male peers The aim of this volume is to try and approach the issue from a different and more comprehensive point of view taking into account not only the position of women in science but also the link between women and science through the analysis of various kinds of discourse and representation such as the press poetry fiction biographies and autobiographies or professional journals including that of women themselves The questions of the presentation or re presentation of science by women are thus at the core of this study as well as that of the portrayal and self portrayal of women in the sciences whether in the educational or

the professional field A final part examines how women are represented in science fiction which like science itself has traditionally been a field dominated by men
