Surprised by Peace Graham McLanachan,2013-01-01 The feeling of being at peace can at times seem unattainable in this perplexing world Yet peace does come in spite of all This collection of poetry has been inspired by that feeling of sudden unbidden peace that can come with a fleeting thought a visit to a church or an art gallery the view from a window or when we are simply sitting

War and Peace Richard Barrons,2024-07-30 The events are set out not just from a high command perspective but from grass roots with all the human suffering trauma compassion and even survival There is real compassion and human understanding especially in Bosnia with sufferings of all sides The writing is attractive and very readable modest self effacing honest with hints of P G Wodehouse and intimate Readers will feel involved and brought into author s confidence and this is a gift of good authorship There are deep and important themes apart from immediate policy and action notably the nature of war and warfare as a fundamental human condition the real life horror of war and self sacrifice And examination of leadership is very impressive with the trust which is vital to success A chapter on surprise in political and military history is fascinating for historians Technology is a vital theme and covered for the lay reader to grasp and even cyber technology The chapters on relations with other arms government bodies including the MOD and distinguished colleagues and all ranks are highly informative and reveal what to some is a secret world

Sukhvinder Jutla,2013-08 This is a story of HOPE Does our indignation and repulsion of the terrorists actions blind us to their grievances Even if their grievances were true and they were victims of gross injustice can that ever justify killing innocent people This is a fictional story of the very wise Sheikh Umeed the Imam living in New York who has always been preaching for peace but discovers to his horror that his son has been involved with terrorist activities We follow his experiences from initial shock and deep dismay to really trying to understand what drives ordinarily peaceful humans to extreme violence to acknowledge injustice without condoning terrorism He shares with us the lessons he learns along the way how we can grow mentally and spiritually and live a life of love peace and prosperity In War and Peace Guy Stever,2002-10-07 Science came into Guy Stever s life as a pure and peaceful pursuit It was only later as he walked through the wreckage of wartime London that he began to see science as central to a desperate struggle to survive Past president of Carnegie Mellon University former Chief Scientist of the U S Air Force one time Director of the National Science Foundation professor at MIT for 20 years member of the National Academies of Sciences and Engineering and science advisor to two presidents Guy Stever was a central figure in twentieth century science consistently on the front lines changing the fate of a nation In this thoughtful and candid memoir Stever recounts an extraordinary life that reveals as much about the man as about the major scientific and technological events of his day Born of humble origins and orphaned at an early age Stever journeyed from a small town in New York to work alongside British comrades who were developing and refining the critical radar technology that was to turn the tide of the war against the Germans As a technical intelligence officer these harrowing wartime years took him from the beachheads of Normandy to the German slave labor factories responsible for building the V 2 rockets Stever returned home committed to serving his country He became intimately involved in America s nascent guided missile program and was to remain a key player in the anti ballistic missile defense program that heralded the era of the Cold War As the decades passed Stever continued to exert lasting influence on countless scientific endeavors He was instrumental in the formation of new institutions from the creation of NASA in the post Sputnik years to the merging of Carnegie Tech and the Mellon Institution giving birth to Carnegie Mellon University As Presidential Science Advisor to both Nixon and Ford Stever shaped the very structure of contemporary presidential science advising And he was to chair the oversight committee

that redesigned the space shuttle boosters after the Challenger explosion Guy Stever's life offers remarkable insight into the twentieth century Through his eyes we relive the history of the past 50 years witnesses to a tale of science and technology that is revealing in its scope and sweep Peace Comes Dropping Slow Denis Bradley,2024-04-11 Denis Bradley was born and raised in Buncrana just 12 miles from the border with Northern Ireland On joining the priesthood he found himself assigned to the cathedral parish in Derry city arriving in the summer of 1970 as the streets were descending into chaos with the outbreak of the Troubles An eyewitness to the wanton violence of Bloody Sunday Bradley was spurred to become involved in the back channel as one of three men who would provide a secret link between the IRA and the British government for thirty years Fervent in their belief that dialogue would bring peace they brokered the crucial 1993 meeting between IRA men Martin McGuinness and Gerry Kelly and a British Intelligence agent codenamed Fred This was a vital step on the road to negotiations which would lead to the ceasefire and the Good Friday Agreement Throughout it all Bradley worked to combat addiction and homelessness in his adopted community and made the difficult decision to leave the priesthood to marry Once played out in the shadows Bradley's pivotal role in Northern Ireland's peace process is finally illuminated in this engrossing memoir *The Art of Peace* Juliana Geran Pilon,2017-07-05 Sun Tzu author of *The Art of War* believed that the acme of leadership consists in figuring out how to subdue the enemy with the least amount of fighting a fact that America's Founders also understood and practiced with astonishing success For it to work however a people must possess both the ability and the willingness to use all available instruments of power in peace as much as in war US foreign policy has increasingly neglected the instruments of civilian power and become overly dependent on lethal solutions to conflict The steep rise in unconventional conflict has increased the need for diplomatic and other non hard power tools of statecraft The United States can no longer afford to sit on the proverbial three legged national security stool military diplomacy development where one leg is a lot longer than either of the other two almost forgetting altogether the fourth leg information especially strategic communication and public diplomacy The United States isn't so much becoming militarized as de civilianized According to Sun Tzu self knowledge is as important as knowledge of one's enemy if you know neither yourself nor the enemy you will succumb in every battle Alarminglly the United States is deficient on both counts And though we can stand to lose a few battles the stakes of losing the war itself in this age of nuclear proliferation are too high to contemplate *A Reign of Peace* Nicholas F. Cucolo,Joseph A. Domino,2000-10-18 A Reign of Peace is an adventure epic where characters engage in larger than life heroics to preserve a distant yet familiar civilization It focuses on a young man named Dominus and his struggle with faith as he confronts threats of war and conquest How does it all start In turning over the soil for the next crop two hapless farmers unearth a small metallic box about the size and shape of a pocket calculator To their amazement it hums and has a small translucent window with an eerie pulsating green glow The community buzzes with excitement News of the strange artifact reaches Dominus and his close friend Rumanion farmers who have also studied history and archaeology at

the University They decide to have a look at this unique relic Before they realize what happens they are caught up in a series of events which forever alters their lives and their society as well Memorable life like characters struggle in a unique setting and as a result of their conflicts mature as they learn more about themselves and the world around them Although Dominus is only in his late twenties he is embittered and cynical as a result of a tragic youth Man is no better than a swine he laments clinging to miserably to this cosmic prank called life only to have it snuffed out Later with the help of the devout cleric Thomas and his sister Elaina Dominus acquires faith and finds love As readers battle villains and a secret race of mutants along with Dominus and Rumanion they feel as if theyre traveling through the Middle Ages However the novel is actually set in the future At one point fleeing for his life Dominus stumbles into a network of caves which houses a missile complex How is he to relate this discovery to the simple agrarian values of his society Besides Dominus and Rumanion the book abounds with characters who have distinct and engaging personalities Mangross the self serving mercenary represents the dark path Dominus could take Mangross would rather count his gold than ponder noble causes I am accustomed to being well paid for my services he proudly boasts and with my earnings I can drink game and swyve my fill Causes make man grim and morbid There is Sablestone the hermit a proud warrior who spurns society yet is a help to all And Harrington Nob the man bound by science and society who learns friendship and compassion Grunorga is the chieftain of the mutants he is revealed to be a sadistic maniacal leader bent on fulfilling his imagined destiny as conqueror In addition to the qualifies of a suspenseful fast paced adventure story the themes of mans relationship to nature technology his fellow man and to God all predominate throughout the book However these motifs all emerge from the action of the story And the action never stops     *Hearings*
