Mexico City Peter M. Ward,1990      **Globalization from Below** Gordon Mathews,Gustavo Lins Ribeiro,Carlos Alba Vega,2012 This book explores globalization as actually experienced by most of the world's people buying goods from street vendors brought by traders moving past borders and across continents under the radar of the law The dimensions and practices of globalization from below are depicted and analyzed in detail by a team of international scholars Topics covered include the New Silk Road African traders in China street hawking in Calcutta and pirate CDs in Mexico The chapters provide intimate portrayals of routes markets and people in locations across the globe and explore theories that can help make sense of these complex and fascinating case studies Students of globalization economic anthropology and developing world economics will find the book invaluable      **Southern California Business** ,1925      **Public Relations, Society & Culture** Lee Edwards,Caroline E. M. Hodges,2011-02-25 Historically public relations research has been dominated by organisational interests treating the profession as a function to help organisations achieve their goals and focusing on practice and processes first and foremost Such research is valuable in addressing how public relations can be used more effectively by organisations and institutions but has tended to neglect the consequences of the practice on the social world in which those organisations operate This edited collection adds momentum to the emergent interest in the relationship between public relations society and culture by bringing together a wide range of alternative theoretical and methodological approaches including anthropology storytelling pragmatism and Latin American studies The chapters draw on insights from a variety of disciplines including sociology cultural studies post colonialism political economy ecological studies feminism and critical race theory Empirical contributions illustrate theoretical arguments with narratives and interview extracts from practitioners resulting in an engaging text that will provide inspiration for scholars and students to explore public relations in new ways Public Relations Society and Culture makes an essential contribution to a range of scholarly fields and illustrates the relevance of public relations to matters beyond its organisational function It will be highly useful to students and scholars of public relations as well as cultural studies ethnicity race communication media studies development communication anthropology and organisational communication This insightful book will make a significant contribution to debates about the purpose and practice of public relations in the new century      Global Environment Outlook 4 United Nations Environment Programme,2007 The fourth report in the Global Environment Outlook series provides a comprehensive scientifically credible

policy relevant and up to date assessment of and outlook for the state of the global environment Environment for development is the GEO 4 underlying theme and the report pays special attention to the role and impact of the environment on human well being as well as to the use of environmental valuation as a tool for decision making GEO 4 s 2007 publication date marks the half way point for the Millennium Development Goals The environment as well as being the subject of MDG 7 is also a thread that runs through all the goals Includes Errata

**Energy and Climate in the Urban Built Environment** M. Santamouris,2013-06-17 Both the number and percentage of people living in urban areas is growing rapidly Up to half of the world s population is expected to be living in a city by the end of the century and there are over 170 cities in the world with populations over a million Cities have a huge impact on the local climate and require vast quantities of energy to keep them functioning The urban environment in turn has a big impact on the performance and needs of buildings The size scale and mechanism of these interactions is poorly understood and strategies to mitigate them are rarely implemented This is the first comprehensive book to address these questions It arises out of a programme of work POLISTUDIES carried out for the Save programme of the European Commission Chapters describe not only the main problems encountered such as the heat island and canyon effects but also a range of design solutions that can be adopted both to improve the energy performance and indoor air quality of individual buildings and to look at aspects of urban design that can reduce these climatic effects The book concludes with some examples of innovative urban bioclimatic buildings The project was co ordinated by Professor Mat Santamouris from the University of Athens who is also the editor of the book Other contributions are from the University of Thessaloniki Greece ENTPE Lyons France and the University of Stuttgart Germany
