**The Globalisation of Non-Governmental Organisations** John Maurice Baguley, 2005-05-20 Commercial companies and non governmental organisations NGOs are internationalising at an increasing pace Yet little is known about the management of NGOs during this process Indeed they have been neglected by comparison to the literature on companies This thesis draws on theories of how and why companies internationalise to determine whether the explanations they offer can be extended to cover NGOs It considers the driving forces experienced by NGOs the stages they pass through This was undertaken through a postal survey using results from 52 international NGOs from Europe and the US The findings were later considered in relation to four case studies of NGOs two relatively small NGOs which have internationalised slowly and two larger and faster NGOs to give practical examples and a wider insight into internationalisation The results indicate that for driving force theories to be applicable to NGOs they need to take into account NGOs strong internal motivation to meet needs the varying influence of drivers on different NGOs and the separate roles drivers play for NGOs For stage theories the results suggest that there are similarities and differences with companies and that Federations may follow a parallel route to other NGOs The results also suggest that NGO managers should pay critical attention to the range of driving forces both internal and external that apply to their organisation Managers should also be prepared for problems with their overseas branches before they reach the stage of being truly global NGOs however may be better suited to that stage than many companies

*Handbook of Survey Methodology for the Social Sciences* Lior Gideon, 2012-06-21 Surveys enjoy great ubiquity among data collection methods in social research they are flexible in questioning techniques in the amount of questions asked in the topics covered and in the various ways of interactions with respondents Surveys are also the preferred method by many researchers in the social sciences due to their ability to provide quick profiles and results Because they are so commonly used and fairly easy to administer surveys are often thought to be easily thrown together But designing an effective survey that yields reliable and valid results takes more than merely asking questions and waiting for the answers to arrive Geared to the non-statistician the Handbook of Survey Methodology in Social Sciences addresses issues throughout all phases of survey design and implementation Chapters examine the major survey methods of data collection providing expert guidelines for asking targeted questions improving accuracy and quality of responses while reducing sampling and non-sampling bias Relying on the Total Survey Error theory various issues of both sampling and non-sampling sources of error are explored and discussed By covering all aspects of the topic the Handbook is suited to readers taking their first steps in survey methodology as well as to those already involved in survey design and execution and to those currently in training Featured in the Handbook The Total Survey Error sampling and non-sampling errors Survey sampling techniques The art of question phrasing Techniques for increasing response rates A question of ethics what is allowed in survey research Survey design face to face phone mail e-mail online computer assisted Dealing with sensitive issues in surveys Demographics of respondents implications for future survey research Dealing with nonresponse and nonresponse bias The Handbook of Survey Methodology in Social Sciences offers how to clarify for researchers in the social and behavioral sciences and related disciplines including sociology criminology criminal justice social psychology education public health political science management and many other

*Democratization: Perspectives from Different Gender-Theoretical Approaches* Eva Maria Hinterhuber, Jana Günther, 2024-01-30 The year 1918 was significant in many ways seeing the end of World War 1 At the same time the impact and transformational effects of this event enabled civil society activists and politically institutionalised actors in European countries to pick up the threads of democratic social movements and parliamentary aspirations and make use of political opportunity structures to obtain citizen rights for larger parts of the population One result of this process albeit with a difference between European states was that more groups in society gained suffrage Amongst those were large sections of the working class and women While the vote was won for some new social groups in European societies others were still excluded After one centennium of struggle for political participation we would like to discuss specific problems of politics of

belonging The question concerning the full recognition of citizen rights was and continually is connected to ideas of a specific membership of a nation state a fact that denotes the particular problem of membership and non membership and of inside and outside This Research Topic will take account of this special field of tension of democratisation e g inclusion through exclusion from a perspective of social history political science gender studies and intersectionality approaches This analytical foil shall be used to examine the relationship between state or government action and civil society as well as the reproduction of social and political inequality despite increasing democratisation movements      **Activism, NGOs and the State** Melissa Schnyder, 2015-07-30 Many NGOs are mobilizing transnationally in order to form new social networks that enable them to better interact with nation state policies on migrant and refugee inclusion This book empirically investigates the rich varieties of cooperative cross border activity and compares how the same groups behave at both the national and transnational levels It uses an original survey the Survey of European Migrant Inclusion NGOs to document four types of cooperative political tactics used by NGOs cross the European Union information sharing technical expertise sharing resource sharing and coordination of common projects It also looks across the current EU member states to analyze how differences in the national policy context specific to migrants issues facilitate and constrain these varied forms of transnational cooperation In doing so the book argues that to understand the overall prevalence of transnational mobilization and the extent to which it represents the emergence of a global civil society we need to expand the focus of social movement studies beyond just visible public displays of contentious activity
