

This information shows that the majority either listen to music on internet sites or iPod. Considerable amounts also listen to music on iTunes, at live gigs or on CD. The fact that the minorities are radio and LP show that in modern times older music platforms either aren't as desirable or aren't as easily accessible as before. However this could also be a reflection on the age range questioned, as younger people maybe won't be as open to new ways of music or are happier listening to music on portable devices or quickly accessible internet sites such as YouTube.

The majority said that they buy music through downloads, which is another example of the changing methods of music consumption and the transition from old methods to new, although a significant amount still buy CD's in store or online. My magazine will appeal mostly to those who buy hard copies of albums or singles, as many aspects of rock music still remain in the past methods of music creation and consumption.

Survey Of Contemporary Music A Music Index:

Popular Music Simon Frith, 2004 Popular music studies is a rapidly expanding field with changing emphases and agendas The music industry has changed in recent years as has governmental involvement in popular music schemes as part of the culture industry The distinction between the major record labels and the outsider independents has become blurred over time Popular music as part of this umbrella of the culture industry has been progressively globalized and globalizing The tensions within popular music are now no longer between national cultural identity and popular music but between the local and the global This four volume collection examines the changing status of popular music against this background Simon Frith examines the heritage of popular music and how technology has changed not only the production but the reception of this brand of sound The collection examines how the traditional genres of rock pop and soul have broken down and what has replaced them as well as showing how this proliferation of musical styles has also splintered the audience of popular music
