Rossi, 2013-10-22 Toward a Structural Theory of Action Network Models of Social Structure Perception and Action centers on the concept of social structure perceptions and actions as well as the strategies through which these concepts guide empirical research This book also proposes a model of status

role sets as patterns of relationships defining positions in the social topology This text consists of nine chapters separated into three parts Chapter 1 introduces the goals and organization of the book Chapters 2 4 provide analytical synopsis of available network models of social differentiation and then use these models in describing actual stratification Chapter 5 presents a model in which actor interests are captured Subsequent chapter assesses the empirical adequacy of the two predictions described in this book Then other chapters provide a network model of constraint and its empirical adequacy This book will be valuable to anthropologists economists political scientists and psychologists
