The Survival Game David P. Barash, 2003-12-02 And notorious strategies arising from the Game of Chicken tit for tat and follow the leader turn up in examples as disparate as World War II's submarine war and the mating antics of the yellow dung fly **BOOK JACKET** **The Survival Game** David P. Barash, 2004-09-01 From a zoologist and psychologist an astonishing look at the biological and strategic roots of human decisions Humans like bacteria woodchucks chimpanzees and other animals compete or cooperate in order to get food shelter territory and other resources to survive But how do they decide whether to muscle out or team up with the competition In *The Survival Game* David P Barash synthesizes the newest ideas from psychology economics and biology to explore and explain the roots of human strategy Drawing on game theory the study of how individuals make decisions he explores the give and take of spouses in determining an evening's plans the behavior of investors in a market bubble and the maneuvers of generals on a battlefield alongside the mating and fighting strategies of less rational animals Ultimately Barash's lively and clear examples shed light on what makes our decisions human and what we can glean from game theory and the natural world as we negotiate and compete every day

Mathematical Principles of Decision Making (Principia Mathematica Decernendi) Thomas L. Saaty, In this book Thomas Saaty summarizes his Analytic Hierarchy Process AHP theory for measuring intangible factors through paired comparisons using judgments from which priorities are derived that give the relative dominance of these factors The important concepts of the AHP and its generalization to structures with dependence and feedback the Analytic Network Process ANP are presented in an elegant compact way and new extensions of the theory to complex decisions involving benefits opportunities costs and risks are presented Applications to resource allocation and conflict resolution are included The generalization to continuous comparisons is covered The Encyclicon three volumes are now available is an encyclopedia of applications that is a useful accompaniment to the Principles of Mathematical Decision Making containing examples of practical decisions

Game Theory Relaunched Hardy Hanappi, 2013-03-27 The game is on Do you know how to play Game theory sets out to explore what can be said about making decisions which go beyond accepting the rules of a game Since 1942 a well elaborated mathematical apparatus has been developed to do so but there is more During the last three decades game theoretic reasoning has popped up in many other fields as well from engineering to biology and psychology New simulation tools and network analysis have made game theory omnipresent these days This book collects recent research papers in game theory which come from diverse scientific communities all across the world they combine many different fields like economics politics history engineering mathematics physics and psychology All of them have as a common denominator some method of game theory Enjoy **Decision Making with the Analytic Network Process** Thomas L. Saaty, Luis G. Vargas, 2013-05-14 The Analytic Network Process ANP developed by Thomas Saaty in his work on multicriteria decision making applies network structures with dependence and feedback to complex decision making This new edition of *Decision*

Making with the Analytic Network Process is a selection of the latest applications of ANP to economic social and political decisions and also to technological design The ANP is a methodological tool that is helpful to organize knowledge and thinking elicit judgments registered in both in memory and in feelings quantify the judgments and derive priorities from them and finally synthesize these diverse priorities into a single mathematically and logically justifiable overall outcome In the process of deriving this outcome the ANP also allows for the representation and synthesis of diverse opinions in the midst of discussion and debate The book focuses on the application of the ANP in three different areas economics the social sciences and the linking of measurement with human values Economists can use the ANP for an alternate approach for dealing with economic problems than the usual mathematical models on which economics bases its quantitative thinking For psychologists sociologists and political scientists the ANP offers the methodology they have sought for some time to quantify and derive measurements for intangibles Finally the book applies the ANP to provide people in the physical and engineering sciences with a quantitative method to link hard measurement to human values In such a process one is able to interpret the true meaning of measurements made on a uniform scale using a unit

The Human Connectome Kostas N. Fountoulakis, 2022-12-08 This book constitutes the end result of 20 years long effort that goes beyond a Psychiatrist's standard clinical training and education even that of a Psychiatrist that follows an academic career Trying to explain how the human mind works is hard and the heterogeneity of the audience make the attempt even more difficult There is a conceptual difference between the words brain and mind and this makes the effort even more difficult since the present book tries to preserve the strict scientific approach concerning all the topics discussed The work elaborates and tries to answer questions frequently phrased by audiences in teaching classes and in conferences and does not avoid any question In order to achieve this goal it is structured in chapters all the way from the molecule and the cell to consciousness and free will The book targets mainly the mental health care professionals as an audience and to a lesser extend the other health professionals It is written according to the author's view concerning the training and educational needs of Psychiatrists and Psychologists and to a lesser degree of Neurologists and

Sun, 2013-10-15 Combining research from the social sciences hard sciences and the humanities this accessible cross disciplinary book offers fascinating insights into a key component of human nature and society What do the Arab Spring the Robin Hood legend Occupy Wall Street and the American taxpayer reaction to the 182 billion bailout of AIG have in common All are rooted in a deeply ingrained sense of fairness But where does this universal instinct come from This is the driving question at the heart of L. Sun's The Fairness Instinct Thinkers from Aristotle to Kant from Augustine to John Rawls and religions from Christianity to Confucianism have offered great insight into the nature and origins of this basic human desire for fairness Based on the most recent scientific discoveries in behavioral genetics neuroscience psychology anthropology economics and evolution Sun argues that the origins of the fairness instinct cannot be found exclusively in the philosophical social and political perspectives to which we so often turn rather they can be traced to something much deeper in our biological makeup Taking as his starting point Frans De Waal's seminal study showing that Capuchin monkeys revolt when they are shortchanged by receiving a less valuable reward than their peers receive for the same task Sun synthesizes a wide range of research to explore the biological roots of the fairness instinct He shows that fairness is much more than a moral value or ideological construct fairness is in our DNA

Combining scientific rigor with accessible and reader friendly language to relate fascinating stories of animal and human behavior *The Fairness Instinct* lays out an evolutionary roadmap for how fairness emerges and thrives under natural selection and how two powerful engines social living and social hierarchy have fueled the evolution of this intricate and potent instinct in all of us Probing into the motives that underlie such phenomena as envy consumerism anti intellectualism revenge revolution terrorism marriage democracy and religion Sun showcases the power of the fairness instinct to make our history shape our society and rule our social lives

War, Peace, and Human Nature Douglas P. Fry, 2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon com

A baboon attacked by a higher ranking individual is liable to respond by attacking a lower ranking animal or even a bush. In *Payback*, evolutionary psychologist David Barash and psychiatrist Judith Lipton show how the act of passing pain to others evolved, how and why it occurs, and some of its surprising manifestations, along with suggestions for avoiding these behaviors. Moreover, the book has remarkable reach, ranging from day to day psychology to international headlines, but also illuminating much of anthropology, psychiatry, and history while providing surprising insights into literature, theology, and our conception of justice.
