**Vigilance Is Not Enough** Mark M. Lowenthal, 2025-05-06 A broad and deep survey of American intelligence from before the Revolution to the present Every nation has an intelligence apparatus some means by which its top officials acquire needed information on sensitive issues But each nation does it differently influenced by its history its geographical conditions

and its political traditions In this book Mark M Lowenthal examines the development of U S intelligence to explain how and why the United States went from having no intelligence service to speak of to being the world s predominant intelligence power almost overnight and he discusses the difficult choices involved in maintaining that dominance in a liberal democracy Lowenthal describes how the lack of a tradition of spycraft both hindered and helped American efforts to develop intelligence services during and after the Second World War He points to the political pragmatism leading to difficult choices with which most intelligence directors operated the constant tension between security and civil liberties in a constitutional democracy the tension between the need for secrecy and the accountability required for democratic governance and the way the growing importance of technology changed both the methods and the objectives of intelligence gathering Far more than simply an episodic history this book offers an analysis of why American intelligence developed as it did and what it has meant for the nation s and the world s politics "When Salary is not Enough..." Eckhard Dittrich,Heiko Schrader,2015

Systemic change from a planned economy to a market society requires not only an implementation of market institutions but also the actions of people according to the new conditions in everyday life This book focuses on the question of how far middle class households are able to organize their livelihoods It presents a cross country rural urban comparison in Kazakhstan and Kyrgyzstan based on secondary data and quantitative and qualitative primary research It examines region specific questions such as Do these households take the necessary self responsibility for their lives Or do they still rely on the Soviet type nanny state of the past Or do they only believe in their own networks of kin and acquaintances for earning their livelihoods Series Societal Transformations Gesellschaftliche Transformationen Vol 20 Subject Sociology Economics Asian Studies

Malitza,2014-05-19 This book reconsiders global problems such as energy and the arms race as well as more recent issues like cultural identity communications and information Attention is primarily focused on human problems and

potential rather than on material constraints to growth The analysis places particular importance on new forms of learning and education for individuals and especially for society as indispensable for laying the groundwork to deal with global issues and for bridging the gap between the complexity and risks of current global issues and our presently inadequately developed capacity to face up to them This is the first Club of Rome report to authors from socialist and Third World countries as well as from the West *Air Force AFM.* ,1962 *Has China Devised a Superior Path to Wealth Creation? The Role of Secular Values* Charles Hampden-Turner,Peter Peverelli,Fons Trompenaars,2021-06-21 The rise of China will profoundly change the world and the rest of us now have a chance to understand how and why this is happening or continue to moralise about this disaster thought to harm our way of life What is especially galling is that the Chinese appear better able to create wealth and value than the West Even in the midst of political denunciations more and more businesses are profitably engaging China We have to face the fact that China excels at what we are supposed to admire the peaceful creation of wealth It even withstands the current pandemic several hundred times more successfully than we have The answers to China s success lie not in communism but in Chinese civilization and culture which is 22 centuries old and extends to most of East Asia and has traded peacefully since Roman times This is a book about measured business cultures East and West and explains using largely Western scholarship why China is winning and will continue to do so unless and until we wake up *Technology Assessment -- 1970* United States.
