Feminist Research in Theory and Practice Gayle Letherby, 2003-02-16 an extremely welcome addition to the field of feminist research *British Journal of Educational Studies* This is a clear and accessible exploration of feminist method methodology and epistemology After situating herself and her work Gayle Letherby charts the debates concerned with the epistemological political and practical issues involved in doing feminist research and places the debates within a wider consideration of the status of knowledge The main focus of the book is then the particular and practical issues for feminist researchers It examines how the process of research affects the results of that research and explores the relation between politics and practice in terms of research and knowledge production Throughout the book there is a practical emphasis on

specific examples of feminist research in action and as well as summarizing current theoretical debates Gayle Letherby adds to them Feminist Research in Theory and Practice is designed and written as a textbook for students at advanced undergraduate and postgraduate level but will be a valuable resource for any researcher or individual interested in women's studies feminism and in researching in the social sciences

Theories of Inclusive Education Peter Clough, Jenny Corbett, 2000-12-30 As a doctoral student currently writing a dissertation which focuses on inclusive education I found this an excellent supportive resource It brings together the major theorists of the last 20 years and very importantly highlights the perceived change in Mary Warnock's stance towards statementing since the late 1970s This element of change in the individual society and policy is an issue which runs through the book and from an emancipatory and postmodernist stance is a vital inclusion The inclusion of personal reflections greatly adds to the text instilling a confidence in the student that there is value in being a person with a point of view For me the publication of the book comes after my own critical analysis of the literature From a purely selfish aspect I wish it had been published earlier in my studies An excellent resource that I would thoroughly recommend Amazon Review This book traces the major stages of thinking in the development of inclusive education It provides overviews of the main theoretical influences the medico psychological model sociological positions curriculum studies school effectiveness and the impact upon policy and practice of the Disability Movement Positioned and discussed in their historical contexts the book provides a synopsis and critique of the last 50 years of the 20th century including the introduction of the term special educational needs the practice of integration and the present processes of inclusive education The unique features of this book include personal reflections by a number of people who are considered to have had a major influence in the development of Inclusive Education Summaries of their work their writing and their thinking are provided drawn from interviews with them and their own publications The book identifies and embraces some major issues It does so bearing in mind the interests and perspectives of students working within Inclusive education studies and presents some complex issues in an accessible format with a direct style Linking directly to the student experience the book concludes with examples of how students have used theories on inclusive education to inform their reflections on practice The book throughout is deliberately learner friendly using sample group activities and suggested readings and is designed to be an effective course reader
