Women's Pension Rights and Survivors' Benefits: A Comparative Analysis of EU Member States and Candidate Countries Chiara Monticone, 2008 This report presents and compares old age income provision rules with respect to the issue of equality between women and men in the current and future EU member states The report focuses on 25 member states and to the extent possible on the recently acceded and candidate countries Romania Bulgaria Turkey and Croatia The report considers various aspects of the benefits ranging from entitlement rules to minimum pensions through to childcare credits and assistance for survivors Overall European countries adopt similar measures for ensuring adequate old age income for women The elimination of differentiated entitlement rules for standard and early retirement plays a key role in the reduction of the differences between men and women In particular this process means a faster increase in the minimum retirement age for women and different methods of encompassing childcare periods in the pension benefit formulas In the long run the higher

employment rates of women and reduced wage disparities between men and women should lead to better individual pension rights for women especially in defined contribution schemes which have recently been introduced in some countries

Mapping the Women's Movement Monica Threlfall, 1996 Second wave feminism is now in its third decade The movement that began in the 1960s in the United States has gone through many permutations continuously emerging in new forms in different parts of the world Awareness of gender has entered popular culture redrawn political divisions and impinged on national economies and international institutions Systemic Silencing Katharine E. McGregor, 2023-08-29 The system of prostitution imposed and enforced by the Japanese military during its wartime occupation of several countries in East and Southeast Asia is today well known and uniformly condemned Transnational activist movements have sought to recognize and redress survivors of this World War II era system euphemistically known as comfort women for decades with a major wave beginning in the 1990s However Indonesian survivors and even the system s history in Indonesia to begin with have largely been sidelined even within the country itself Here Katharine E McGregor not only untangles the history of the system during the war but also unpacks the context surrounding the slow and faltering efforts to address it With careful attention to the historical social and political conditions surrounding sexual violence in Indonesia supported by exhaustive research and archival diligence she uncovers a critical piece of Indonesian history and the ongoing efforts to bring it to the public eye Critically she establishes that the transnational part of activism surrounding victims of the system is both necessary and fraught a complexity of geopolitics and international relationships on one hand and a question of personal networks linguistic differences and cultural challenges on the other **Women's Movements in Twentieth-Century Taiwan** Doris Chang, 2010-10-01 This book is the first in English to consider women s movements and feminist discourses in twentieth century Taiwan Doris T Chang examines the way in which Taiwanese women in the twentieth century selectively appropriated Western feminist theories to meet their needs in a modernizing Confucian culture She illustrates the rise and

fall of women's movements against the historical backdrop of the island's contested national identities first vis vis imperial Japan 1895 1945 and later with postwar China 1945 2000 In particular during periods of soft authoritarianism in the Japanese colonial era and late twentieth century autonomous women's movements emerged and operated within the political perimeters set by the authoritarian regimes Women strove to replace the Good Wife Wise Mother ideal with an individualist feminism that meshed social political and economic gender equity with the prevailing Confucian family ideology However during periods of hard authoritarianism from the 1930s to the 1960s the autonomous movements collapsed The particular brand of Taiwanese feminism developed from numerous outside influences including interactions among an East Asian sociopolitical milieu various strands of Western feminism and even Marxist Leninist women's liberation programs in Soviet Russia Chinese communism appears not to have played a significant role due to the Chinese Nationalists restriction of communication with the mainland during their rule on post World War II Taiwan Notably this study compares the perspectives of Madame Chiang Kai shek whose husband led as the president of the Republic of China on Taiwan from 1949 to 1975 and Hsiu lien Annette Lu Taiwan's vice president from 2000 to 2008 Delving into period sources such as the highly influential feminist monthly magazine *Awakening* as well as interviews with feminist leaders Chang provides a comprehensive historical and cross cultural analysis of the struggle for gender equality in Taiwan

Haines, 2014-07-14 *Fatal Years* is the first systematic study of child mortality in the United States in the late nineteenth century Exploiting newly discovered data from the 1900 Census of Population Samuel Preston and Michael Haines present their findings in a volume that is not only a pioneering work of demography but also an accessible and moving historical narrative Despite having a rich well fed and highly literate

Demographic Analysis Roland Pressat, 2020-10-11 Population control requires that the birth rate equal to the death rate If it is too low population will decline if it is too high population will increase If either condition persists long enough the population will diminish towards zero or increase towards infinity Fortunately the birth trajectory does not have to be set once and for all but can be adjusted within limits Since birth and death rates determine whether we

are heading for population extinction or explosion they are well designated vital statistics Their understanding and use are a central theme of demographic analysis Demographic Analysis presents those techniques that are often called for in the study of demographic problems Such techniques permit researchers to fill the gap between the large amounts of data made available by censuses and the theoretical and practical questions that need to be answered the techniques of this book effectively bring the data into confrontation with the problems In his treatment of population projection Pressat applies methods developed in earlier sections for mortality and fertility The emphasis is on population projection and accords with its usefulness in demographic analysis The meaning of a demographic rate or trend is brought out by seeing to what condition it would lead if continued No assumption is made that the concrete future will follow either path The substance of the book is devoted to the main themes of mortality and fertility Underlying these as well as nearly every other kind of data with which the demographer deals is the problem of location in time the relation of vital events to the calendar and also to the age of the persons undergoing them Pressat's detailed attention to this problem forms a solid basis for how current methodology accounts of demographic changes
