Susan Point:

Susan Point Dale R. Croes, Susan A. Point, 2014-06 Susan Point Dale Croes, Susan Point, Gary Wyatt, 2014 A gorgeous collection of prints by one of the Northwest's leading artists Over the past thirty years Susan Point has become the preeminent Coast Salish artist of her generation exploring many different modern and traditional themes in a wide variety of media She has received major public commissions in her home province of British Columbia as well as throughout the Northwest coast the traditional territory of her people creating extraordinary monumental sculptures that grace important public buildings Her glass sculptures are collected around the world This is the first book devoted exclusively to her works on paper Over the past thirty years Point has been an innovator in printmaking adapting traditional Coast Salish themes to modern art techniques translating the heritage of her culture to the wider world while creating a body of work that appeals to art collectors from around the globe Her synthesis of contemporary and traditional styles has resulted in a formidable artistic accomplishment This beautifully designed volume collects 160 of her prints together for the first time and is sure to inspire and amaze those who see it **Susan Point** Gary Wyatt, Michael Kew, Kenji Nagai, 2000 Native American Salish artist Susan Point did not take up art until she was in her late twenties but since then has immersed herself in the study of traditional Coast Salish art and culture She says Coast Salish art is relatively unknown to most people today as it was an almost lost art form after European contact the reason being that Salish lands were the first to be settled by Europeans Because of this over the years I have spent a great deal of my time trying to revive traditional Coast Salish art and also attempting to educate the public to the fact that there was and still is another art indigenous to the central Pacific Northwest Coast Point's striking and distinctive art from jewelry in precious metals to prints paintings and monumental pieces in wood and glass has won worldwide acclaim and a worldwide audience An innovator with a strong personal style she likes to express ancestral concepts and designs in media such as glass and bronze as well as the more traditional wood In creating my art she says I feel a need to continually express my cultural background and beliefs yet at the same time my work continues to evolve with changes both within and outside of my community Michael Kew describes the traditional art culture and beliefs of the central Coast Salish which of all the Northwest Coast cultures is among the least familiar to the general public Because much of the art was closely associated with private religious expression it was seldom displayed or sold to collectors Peter Macnair contributes an engaging and enlightening biography that looks at the artistic evolution of Susan Point Bill McLennan briefly examines the tradition of housepost carving among the Coast Salish and Susan Point's interpretations of these large woodcarvings The Sexual Subject Mandy Merck, 2013-11-05 The Sexual Subject brings together writing on sexuality which has appeared in Screen over the past two decades It reflects the journal's continuing engagement with questions of sexuality and signification in the cinema an engagement which has had a profound influence on the development of the academic study of film and on alternative film and video practice The collection opens with Laura

Mulvey's classic Visual Pleasure and Narrative Cinema with its conjunction of semiotics and psychoanalysis the critical approach which is most closely associated with Screen's rise to international prominence The reader then goes on to explore the particular questions and debates which that conjunction provoked arguments around pornography and the representation of the body questions of the representation of femininity and masculinity of the female spectator and of the social subject Many of the writings in this Reader have become indispensable texts within the study of film The purpose of the Reader is not only to make the articles available to a wider readership and to a new generation but also to pose new conjunctions making connections in one volume between debates and inquiries which spanned two crucial decades of film theory The Sexual Subject is intended not only for all those with a particular interest in film and film theory but for anyone with a serious commitment to cultural theory theories of representation and questions of sexuality and gender

Mathematical Competencies in the Digital Era Uffe Thomas Jankvist, Eirini Geraniou, 2023-02-20 This book focuses on the potential interplay between two distinct yet related paradigm shifts in mathematics education drawing on the notion of networking of theories through illustrative case studies from the Danish educational system and beyond The first paradigm shift is the massive introduction of digital technology in the teaching and learning of the subject the second is a shift from the traditional focusing on mastering of skills and knowledge to being concerned with the possession and development of mathematical competencies This book builds on the Danish KOM Competencies and the Learning of Mathematics project which sources its description of mathematical mastery primarily on the notion of a mathematical competency rather than on

lists of topics concepts and results This allows for an overarching framework which captures the perspectives of mathematics teaching and learning at whichever educational level While the KOM framework does not in detail address the role of digital technologies in relation to its description of different types of mathematical competencies etc the chapters of this book set out to do exactly this while in the process also drawing on a selection of other theoretical constructs and frameworks from mathematics education research Starting with introductory chapters by key researchers in the area the book brings forth chapters for each of the KOM framework s eight mathematical competencies authored by Nordic researchers in combination with international scholars The KOM framework also operates with three types of overview and judgement which are specifically addressed in relation to the role of digital technologies in the third part of the book The fourth and final part of the book broadens the scene and provides chapters of a more perspective nature in relation to mathematical competencies in the digital era The book s preface is by Susanne Prediger
