Teather,2016-02-28 In this book Anne Teather develops a new approach to understanding the Neolithic flint mines of southern Britain      *The Scientific Study of Flint and Chert* G. de G. Sieveking,M. B. Hart,2011-07-14 The thirty papers in this 1986 volume review the scientific knowledge of the nature of flint and chert at this time These papers were presented at a 1983 interdisciplinary and international conference on flint and other cherts Each contribution has been meticulously assessed and edited prior to publication This collection is principally concerned with the geology and geochemistry of flint in European chert Topics include the origin of flint scanning electron microscopy of surface textures and the behaviour of flint under periglacial conditions There is a companion volume edited by G de G Sieveking and M B Hart on the archaeological uses of flint      **Sussex Archaeological Collections Relating to the History and Antiquities of the County** Sussex Archaeological Society,1998      Sussex Archaeological Collections, Relating to the History & Antiquities of the County Sussex Archaeological Society,1998      Good Housekeeping ,1922      THE PENNY MAGAZINE OF THE SOCIETY FOR THE DIFFUSION OF USEFUL KNOWLEDGE ,1833      **Report of the Department of Mines for the Year ...** Western Australia. Harris,1996 The Channel Tunnel has been called the greatest engineering project of the century overcoming a unique set of financial political and engineering challenges This book provides a comprehensive insight into the events which culminated in the first dry link between Britain and France It describes the relationship between the site investigation data interpretation and construction of the works It examines areas such as the difficulties inherent in predicting geology from a relatively small number of boreholes and revealing how the use of modern geophysical techniques      *Periglacial Processes and Landforms in Britain and Ireland* John Boardman,2011-04-14 This 1987 book examines the intimate link between periglacial geomorphology and the fluctuating climates of the Quaternary Period in the British Isles In the last two million years ice sheets have covered northern Britain several times In the south at the limit of the glaciation intense frost action and the formation of permafrost have influenced past and present landscapes The first part of the book looks at areas of the world that have climates similar to periglacial Britain Scandinavia the Canadian Arctic and alpine regions Contributors then present data on periglacial landforms in the British Isles Topics discussed include the periglaciation of upland Britain ground ice depressions and pingo remnants The regions surveyed stretch from northern Scotland to the Isles of Scilly The contributions are based on a conference held in late 1985 under the sponsorship of the International Geographical Union and

the Quaternary Research Association of the United Kingdom      **Memoirs of the Geological Survey [of] England & Wales**, 1928      **The Neolithic Flint Mines of England** Martyn Barber, David Field, Peter Topping, 2014-06-15 Only rarely in Europe do the surface remains of Neolithic flint mines remain so dramatically for all to see as those located along the South Downs and in the Breckland of England Even within England they represent a diminishing resource and only ten sites have been recorded with any certainty As examples of our earliest industrial heritage they represent archaeological sites of the first importance and have a special part to play in the history of technology However despite a lengthy history of archaeological investigation they have rarely been considered nationally as a class of monument Although some sites such as Grime's Graves are well known through excavation campaigns others are known only through obscure articles and unpublished archival material Many of those that survive as earthworks or cropmarks have never been surveyed previously or accurately planned Consequently English Heritage has compiled detailed plans of the surface areas of all of the known flint mines and investigated the sites of other potential examples Using a combination of field survey aerial photography and archival research this volume looks at each site in its own right as a major and important complex and for the first time offers a synthesis of the evidence to date      **The Geology of the Country Near Lewes** Harold J.
