The field of global food security is currently grappling with the immense challenge of feeding over 8 billion people worldwide a task that is particularly daunting for low and middle income countries LMICs. According to the State of Food Security and Nutrition SOFI 2023 report between 690 and 783 million people experienced hunger in 2022 with an increase of 122 million more people facing hunger compared to the pre pandemic period of 2019. Projections indicate that by 2030 approximately 600 million people will suffer from chronic hunger. Alarming! Africa bears a disproportionate burden with about 20% of its population affected by hunger compared to lower percentages in Asia Latin America the Caribbean and Oceania. The United Nations Sustainable Development Goal 2 SDG 2 known as Zero Hunger aims to eradicate hunger achieve food security improve nutrition and promote sustainable agriculture by 2030. Despite the concerted efforts of many nations to implement food and nutrition sensitive policies since the SDG 2 agenda's inception in 2015 significant challenges persist particularly in Africa. These include extreme poverty rapid population growth high food prices unemployment social exclusion extreme weather events corruption and conflicts all of which hinder progress towards achieving Zero Hunger. Recent initiatives such as the United Nations Food System Summit underscore the need for a comprehensive approach to address these multifaceted challenges.
