development requires State regulation of the exploitation of natural resources globalisation as originally conceived pushed for free and unfettered markets creating a fundamental tension between the two approaches This book attempts to find a way towards their reconciliation with inspiring results The book explores many themes especially how globalisation may contribute to the solution of the problems it has caused by helping to empower non state actors around the world so that the international decision making processes become more inclusive transparent and oriented towards sustainable development Ximena Fuentes Universidad Alonso Ibanez Chile and ILA Co Rapporteur on the Commission on Sustainable Development This book examines the complex relationships between trade human rights and the environment within natural resources law It discusses key theories and challenges whilst exploring the concepts and approaches available to manage crucial natural resources in both developed and developing countries Primarily aimed at undergraduates and postgraduates it includes exercises questions and discussion topics for courses on globalisation and or natural resources law as well as an ample bibliography for those interested in further research The book will therefore serve as an invaluable reference tool for academics researchers and activists alike
