An Evaluation of POLEX (CIFOR's Forest Policy Experts Listserv) Michael J. Spilisbury, Nina Haase, 2005-01-01

Managing a Global Resource Uma J. Lele, 2017-07-12 The rapid loss of tropical forests particularly in the developing world has been a global concern since the late 1980s and has prompted a variety of international initiatives to save the forests In 1991 the World Bank responded to global concerns and to criticism by nongovernmental organizations by forming a conservation oriented forest strategy Managing a Global Resource is an outgrowth of the independent evaluation conducted by the World Bank's Operations Evaluation Department and discusses how effectively that strategy was implemented In this detailed investigation Uma J Lele explores why the loss of forests and biodiversity has been so rapid in some developing countries Brazil Indonesia and Cameroon and not in others China India and Costa Rica She assesses future prospects for conservation in these six countries by critically examining their policies institutional arrangements and emerging national and international instruments to conserve forests and biodiversity Together these six countries account for 25 percent of the world's forest cover and 44 percent of the world's population Managing a Global Resource presents case studies of the forest sectors of each country in the context of overall development policies interest groups and governance issues Lele's investigation finds a fundamental divergence in forest rich countries between the global objectives of conservation and the local objectives of development and private profit In some forest poor countries in contrast natural resource loss has led the countries on their own accord to adopt a variety of conservation oriented policies and programs Despite the greater congruence between the global and national objectives in these forest poor countries competing demands on their resources and the constraints on their policies institutions and human capital make it difficult for them to affect forest and biodiversity conservation This volume makes it clear that

Biodiversity Hotspots Frank E. Zachos, Jan Christian Habel, 2011-09-15 Biodiversity and its conservation are among the main global topics in science and politics and perhaps the major challenge for the present and coming generations This book written by international experts from different disciplines comprises general chapters on diversity and its measurement human impacts on biodiversity hotspots on a global scale human diversity itself and various geographic regions exhibiting high levels of diversity The areas covered range from genetics and taxonomy to evolutionary biology biogeography and the social sciences In addition to the classic hotspots in the tropics the book also highlights various other ecosystems harbouring unique species communities including coral reefs and the Southern Ocean The approach taken considers but is not limited to the original hotspot definition *sensu stricto* and presents a chapter introducing the 35th hotspot the forests of East Australia While due to a bias in data

availability the majority of contributions on particular taxa deal with vertebrates and plants some also deal with the less studied invertebrates This book will be essential reading for anyone involved with biodiversity particularly researchers and practitioners in the fields of conservation biology ecology and evolution Amazônia sustentável Robert R. O efeito das chuvas sobre o desempenho da agropecuária na Amazonia Bom colapsoou economia sustentável o dilema da comunidade O papel do governo O papel das florestas nacionais Questões cruciais para o futuro da Amazônia **Forest Science** Elias Costa de Souza,Subramanian Senthilkannan Muthu,2023-07-24 This book highlights the sustainability aspects of products and processes in forest science The forest products sector supplies raw materials to several industrial sectors worldwide These products can be classified as timber or non timber products Wood products are those that originate from the woody fraction and can include pulp charcoal firewood and others The non timber products on the other hand have the products extracted from the different parts of the tree such as bark leaves fruits resins oils tannins or even products extracted from non woody biomass such as palm heart or carnauba among others There are new studies and new products developed from forests worldwide each day However studies that evaluate the sustainability of these products and the processes related to their production are not so common It is essential to highlight the sustainability aspects of these activities and the products obtained from them such that steps can be taken to make the processes eco friendly Allied to ecological sustainability studies that evaluate the technical and economic feasibility of such activities arise With this book the authors through the approach of other products and processes of forest science present the practical vision of aligning production with sustainability in an economically viable way The book analyses different products and processes ranging from technological production of engineered wood products to handcrafted resins with a high commercial appeal With the expertise of different authors who are researchers in various specific areas of forest sciences this book helps expand research and presents new insights assisting industry decision makers and researchers working in the areas forest sciences

Historical Dictionary of the World Bank Sarah Tenney,Anne C. Salda,2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute This second edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years Meanwhile the list of acronyms reminds us just who the main players are And the bibliography directs readers to useful

internal documentation and outside studies **Biofuels for Transport** Worldwatch Institute, 2012 The world is on the verge of an unprecedented increase in the production and use of biofuels for transport The combination of rising oil prices issues of security climate instability and pollution deepening poverty in rural and agricultural areas and a host of improved technologies is propelling governments to enact powerful incentives for the use of these fuels which is in turn sparking investment Biofuels for Transport is a unique and comprehensive assessment of the opportunities and risks of the large scale production of biofuels The book demystifies complex questions and concerns such as the food v fuel debate Global in scope it is further informed by five country studies from Brazil China Germany India and Tanzania The authors conclude that biofuels will play a significant role in our energy future but warn that the large scale use of biofuels carries risks that require focused and immediate policy initiatives Published in association with BMELV FNR and GTZ **Sustainable Amazon** Robert R. Schneider, 2002 There is an ongoing debate over the future of the Amazon in Brazil Part of this debate involves the question of whether or not it is possible to ensure development in the region while conserving its immense natural heritage This report adds to the discussion of land use in the Brazilian Amazon It analyses the harmful effects of increasing levels of rainfall on agricultural settlement and productivity The aim of this report is to assist decision makers civil society and the private sector in their attempts to ensure that natural resources will be maintained in such a way that best maximises

World Bank Research Program World Bank, 2002 **The Dynamics of Deforestation and Economic Growth in the Brazilian Amazon** Lykke E. Andersen, 2002-12-12 A multi disciplinary team of authors analyze the economics of Brazilian deforestation using a large data set of ecological and economic variables They survey the most up to date work in this field and present their own dynamic and spatial econometric analysis based on municipality level panel data spanning the entire Brazilian Amazon from 1970 to 1996 By observing the dynamics of land use change over such a long period the team is able to provide quantitative estimates of the long run economic costs and benefits of both land clearing and government policies such as road building The authors find that some government policies such as road paving in already highly settled areas are beneficial both for economic development and for the preservation of forest while other policies such as the construction of unpaved roads through virgin areas stimulate wasteful land uses to the detriment of both economic growth and forest cover [Amazon 2030 - Sustainability Issues in the World's Largest Rainforest Region](#) Walter Leal Filho, Laís Viera Trevisan, Gabriel Brito Costa, Ismar Borges de Lima, 2025-05-31 This book examines the socio economic impacts on the indigenous populations and local communities who depend on the Amazon for their livelihood culture and heritage By presenting contributions which entailed detailed research expert interviews and on the ground case studies this book provides an in depth analysis of the key factors contributing to the Amazon's decline including deforestation climate change and illegal mining among others As authors venture into the year 2030 the Amazon Rainforest often referred to as the planet's lungs faces unprecedented challenges that threaten its existence and by extension the global ecosystem This book

delves into the heart of these issues offering a comprehensive and poignant exploration of the sustainability crisis in the world's largest rainforest region. The narrative is structured to guide readers through the intricate web of environmental, economic, and social threads that define the Amazon's current predicament. It begins with an overview of the rainforest's vital role in global biodiversity and climate regulation, setting the stage for a deeper investigation into the threats it faces. Various chapters are dedicated to specific sustainability challenges, such as the expansion of agricultural frontiers, the exploitation of natural resources, and the consequences of political and corporate decisions on conservation efforts. The book also highlights innovative solutions and initiatives underway to preserve and restore the Amazon, showcasing successful conservation projects and sustainable development practices. The book also projects potential future scenarios for the Amazon, emphasizing the urgency of concerted global action to safeguard this irreplaceable natural treasure. It calls for a holistic approach that reconciles economic development with environmental stewardship and respects the rights and knowledge of indigenous peoples. It serves as a clarion call to action, urging readers to consider the legacy authors wish to leave for future generations.
