Sustainable Cities Concepts And Strategies For Ecocity Development Paperback:

Sustainable Cities Bob Walter, Lois Arkin, Richard W. Crenshaw, 1992 In *Sustainable Cities* leading experts from their respective fields present concepts and strategies for ecological city design that include ecological design principles planning techniques resource management community relations sustainable technologies construction techniques economic strategies and much more *Sustainable Cities* shows how urban development and the environment can coexist in a successful partnership that will result in better air quality cleaner water more nutritious food less commuting time quieter and more nature oriented surroundings a richer community life less urban stress and improved health for the people who live and work in cities Whether you are a professional involved in shaping our cities or a concerned citizen seeking the best for your neighborhood this book contains the range of information you need to be effective in creating sustainable cities Energy Efficiency in the Urban Environment Heba Allah Essam E. Khalil, Essam E. Khalil, 2015-02-12 *Energy Efficiency in the Urban Environment* is a study of energy crisis urbanisation and climate change as well as a discussion of how to combat these global challenges With a special focus on Egypt this book addresses the macroscale of urbanism from the perspective of city dwellers quality of life and explores the microscale of buildings and **Ecopolis** Paul F. Downton, 2008-12-09 From 2008 for the first time in human history half of the world's population now live in cities Yet despite a wealth of literature on green architecture and planning there is to date no single book which draws together theory from the full range of disciplines from architecture planning and ecology which we must come to grips with if we are to design future cities which are genuinely sustainable Paul Downton's *Ecopolis* takes a major step along this path It highlights the urgent need to understand the role of cities as both agents of change and means of survival at a time when climate change has finally grabbed world attention and it provides a framework for designing cities that integrates knowledge both academic and practical from a range of relevant disciplines Identifying key theorists practitioners places and philosophies the book provides a solid theoretical context which introduces the concept of urban fractals and goes on to present a series of design and planning tools for achieving Sustainable Human Ecological Development SHED Combining knowledge from diverse fields to present a synthesis of urban ecology the book will provide a valuable resource for students researchers and practitioners in architecture construction planning geography and the traditional life sciences *The Global Foundations of Public Relations* Robert E. Brown, Burton St. John III, Jenny Zhengye Hou, 2021-09-27 *The Global Foundations of Public Relations* Humanism China and the West explores the growing humanistic turn in public relations processes and proposes that this has compelling parallels in the roots of Chinese philosophies As the leader of growth and power across the Pacific Rim public relations in China is not developing in isolation from the West but via mutual accommodations and culturally complex interactions By collecting cases and reflections on PR practices from both Chinese and Western scholars the chapters propose that Chinese philosophies are playing a role in the development of modern Chinese PR practices and focusing less on the obvious differences and contracts

seek to highlight their spiritual philosophical and political confluences The conclusions drawn enhance and advance our understanding of public relations globally This innovative work is of interest to educators and researchers in the fields of public relations strategic communications and public diplomacy

Tradition, Location and Community Adenrele Awotona, Necdet Teymur, 2024-11-07 Originally published in 1997 as part of the Ethnoscapes Current Challenges in the Environmental Social Sciences series reissued now with a new series introduction Tradition Location and Community Place making and Development brings together the selected papers of seventeen architects social scientists and planners It offers a range of original perspectives on the relationship between the design and habituation of the built environment on the one hand and social and cultural development on the other As an archival volume it attempts to present a mixture of cross disciplinary and cross cultural perspectives It explores the view that planning and design the organization of the physical built environment which follow from the rapid transformations wrought by development must respond to and be based on the wants and needs of the people affected that is it must be in accord with their notions of environmental quality Divided into two sections The first section has five chapters which explore the theoretical and conceptual aspects of place making and development Section two consists of twelve chapters each of which presents a case study

The Whole Building Handbook Varis Bokalders, Maria Block, 2010 The Whole Building Handbook is a compendium of all the issues and strategies that architects need to understand to design and construct sustainable buildings for a sustainable society The authors move beyond the current definition of sustainability in architecture which tends to focus on energy efficiency to include guidance for architecture that promotes social cohesion personal health renewable energy sources water and waste recycling systems permaculture energy conservation and crucially buildings in relation to their place The authors offer a holistic approach to sustainable architecture and authoritative technical advice on How to design and construct healthy buildings through choosing suitable materials healthy service systems and designing a healthy and comfortable indoor climate including solutions for avoiding problems with moisture radon and noise as well as how to facilitate cleaning and maintenance How to design and construct buildings that use resources efficiently where heating and cooling needs and electricity use is minimized and water saving technologies and garbage recycling technologies are used How to close organic waste sewage heat and energy cycles For example how to design a sewage system that recycles nutrients Includes a section

on adaptation of buildings to local conditions looking at how a site must be studied with respect to nature climate and community structure as well as human activities The result is a comprehensive thoroughly illustrated and carefully structured textbook and reference Healthy Cities Namir Khan, Willem H. Vanderburg, 2001 Modern cities can be designed to constitute a more supportive environment for a great many activities provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches Healthy Cities focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes Sustainable Energy and Sustainable Production is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable **The Real Goods Solar Living Sourcebook** Real Goods Trading Corporation, 1994 Covers power conservation and gear **Green Development** Rocky Mountain Institute, 1998 Green Development is good for business Tenants owners purchasers and brokers are all becoming more sophisticated and are realizing the financial and social benefits of green product Gerald Hines Chairman of Hines Environmentally responsible real estate development makes dollars and sense Green Development describes an exciting new field in which environmental considerations are viewed as opportunities to create fundamentally better buildings and communities more comfortable more efficient more appealing and ultimately more profitable If you re a developer architect planner contractor lender or city official this book speaks your language Every stage of the development process is examined in detail market research site planning design approvals financing construction marketing and occupancy Also included are lists of project statistics and contacts books and other information sources and development strategies Based on 80 case studies drawn from Rocky Mountain Institute s extensive worldwide research and consulting work Green Development distills proven procedures and practical lessons that work in the real world *Ecological Politics* Greta Gaard, 1998-05-11 AN ILLUMINATING ACCOUNT OF TWO INTERCONNECTED SOCIAL MOVEMENTS FROM THEIR GRASSROOTS ORIGINS THROUGH THE 1996 GREEN PRESIDENTIAL CAMPAIGN Both ecofeminism and Green politics have played an important role in the radical environmental movement As a theory and a movement bringing together feminism environmentalism socialism and peace activism ecofeminism began taking shape in the U S by 1980 Four years later many ecofeminists participated in founding and developing the U S Green movement Where are these movements today A member of both movements Greta Gaard bases her analysis on personal experience as well as extensive secondary sources and interviews with key theorists activists and speakers across the United States She describes the paths environmental causes the feminist peace movement the feminist spirituality movement the animal liberation movement and the anti toxics movement as well as experiences of interconnectedness that have led women and a few men to

articulate an ecofeminist perspective The book illustrates the development of the Greens from a national movement into a political party and defines the factions the Left Greens the Youth Greens and the Green Politics Network that underlay the debates during Ralph Nader s 1996 presidential campaign She sees the history of these three groups as stages in the transition from a leftist and sometimes anarchist focus to an emphasis on electoral political action that places the Green movement squarely within the pattern of other social movements around the world Gaard s analysis illuminates the nature and direction of each of these important movements and the pressures and conflicts experienced by all social movements at the end of the twentieth century

Ethics and Urban Design Gideon S. Golany, 1995-08-01 The city according to urban design scholar Gideon Golany is the largest and most complicated project ever produced by humankind In *Ethics and Urban Design* he challenges design professionals to reexamine their basic assumptions about the urban environment and offers design strategies based on enduring human values In search of answers to the paradoxical problems of the modern city Golany takes the reader through the sweep of human settlements from the dawn of civilization to the present His authoritative examination of the genesis of the city is illuminated by instructive examples of early urban centers Mesopotamia the Indus River Valley the Egyptian cities of the Nile and the capital cities of ancient China all are examined in the light of what made them work as major centers of human activity What Golany finds in the success stories of the past are cohesive sociocultural values that shaped the design of homes neighborhoods and cities These ethical values helped to maintain an equilibrium within the society that permeated its natural social and human made environments In the present era conversely he finds a major disconnection between human values and the ethics of technology which has resulted in confusion imbalance and dehumanization To help designers gain a perspective on possible solutions Golany explains leading comprehensive design strategies including the valley theory the urban border zone concept and the regional concept of Patrick Geddes In the case study of contemporary Holland he details what a small densely populated country has been able to achieve through design planning rooted in environmental ethics

Future Frontiers for Urban Design the culminating section of this groundbreaking book opens with Golany s vision of the future city He examines the issues of thermal performance and climate as they relate to urban design and offers the concept of geospace the earth enveloped habitat Buttrussing his presentation with detailed information on the mechanics of geospace Golany describes case studies of the successful use of earth enveloped habitats in China and Tunisia He makes a powerful argument for the geospace city as a renewal of ancient traditions that can restore the vital equilibrium between nature and human settlements that we seem to have lost

Ethics and Urban Design is a distinguished scholar s analysis and prescription for the city it offers an abundance of stimulating ideas for the architects designers and planners who have assumed responsibility for its future *Ethics Urban Design* draws on historical examples and contemporary case studies from around the world to illustrate urban design strategies that can help restore equilibrium to the natural social and built environments of the city In this stimulating book urban design scholar Gideon Golany offers architects designers and

planners both an in depth analysis of the fundamental issues of urban design and practical options for the design of the future city Examines the genesis and development of the city from the earliest presettlements to the rise of urban society Presents urban design strategies based on historical examples of early urban centers including Mesopotamia the Indus River Valley Egypt and China Offers case studies of environmental success stories from Europe Asia and Africa Details geospace design options the use of underground space for diversified land use housing and transportation Fully illustrated with over 80 photographs drawings and diagrams

Functionalism Revisited Jon T. Lang, Walter Moleski, 2010 Lang and Moleski argue here that the model of function and the concept of a functional building that we have inherited from the 20th century Modernists is limited in scope They propose a new model which responds to observations about the inadequacy of current ways of thinking about functionalism in architecture and urban design Copiously illustrated the book discusses in detail each function of buildings and urban environments
