Horizon Research and Innovation programme under the Grant
Agreement n° 849324 (INTERLACE), 821242 (CLEARING
HOUSE), 821016 (REGREEN), 847564 (CONEXUS).

Sustaining Cities In Europe

Charlie Karlsson, Daniel Silander

Sustaining Cities In Europe:

Sustainable Cities in Europe Peter Nijkamp,Adriaan Perreels,2018-12-07 Although urbanization steadily increases many modern cities are finding the accommodation of their populations an increasingly difficult task Planners and policy makers battling to alleviate the problem with a host of urban renewal initiatives have made environmental issues and policies central to their quest for urban sustainability Drawing on the CITIES programme of the EC this study describes the urban energy and environmental policies now available Through detailed case studies of various European cities it explains how to devise and implement strategies for urban growth and development Sustainable Cities in Europe Peter Nijkamp,Adriaan Perreels,1994 Drawing on examples from across Europe this book shows what policies have to be implemented to achieve sustainable urban development

Green Urbanism Timothy Beatley,2012-09-26 As the need to confront unplanned growth increases planners policymakers and citizens are scrambling for practical tools and examples of successful and workable approaches Growth management initiatives are underway in the U S at all levels but many American success stories provide only one piece of the puzzle To find examples of a holistic approach to dealing with sprawl one must turn to models outside of the United States In Green Urbanism Timothy Beatley explains what planners and local officials in the United States can learn from the sustainable city movement in Europe The book draws from the extensive European experience examining the progress and policies of twenty five of the most innovative cities in eleven European countries which Beatley researched and observed in depth during a year long stay in the Netherlands Chapters examine the sustainable cities movement in Europe examples and ideas of different housing and living options transit systems and policies for promoting transit use increasing bicycle use and minimizing the role of the automobile creative ways of incorporating greenness into cities ways of readjusting urban metabolism so that waste flows become circular programs to promote more sustainable forms of economic development sustainable building and sustainable design measures and features renewable energy initiatives and local efforts to promote solar energy ways of greening the many decisions of local government including ecological budgeting green accounting and other city management tools Throughout Beatley focuses on the key lessons from these cities including Vienna Helsinki Copenhagen Stockholm Zurich Amsterdam London and Berlin and what their experience can teach us about effectively and creatively promoting sustainable development in the United States Green Urbanism is the first full length book to describe urban sustainability in European cities and provides concrete examples and detailed discussions of innovative and practical sustainable planning ideas It will be a useful reference and source of ideas for urban and regional planners state and local officials policymakers students of planning and geography and anyone concerned with how cities can become more livable Sustainable Communities in Europe William M Lafferty,2014-10-14 A presentation of detailed comparative research into the implementation in 11 European countries of Local Agenda 21 the action plan for sustainable development at community level Overviews of implementation in each country are accompanied by analysis of positive and

negative changes as well as a comparative analysis with high academic and policy relevance Numerous practical examples are included of best cases and crucial barriers European Sustainable Cities European Commission. Expert Group on the Urban Environment, European Commission. Directorate-General for Environment, Nuclear Safety, and Civil Protection, 1996

Culture and Sustainability in European Cities Svetlana Hristova, Milena Dragićević Šešić, Nancy Duxbury, 2015-04-21 European cities are contributing to the development of a more sustainable urban system that is capable of coping with economic crises ecological challenges and social disparities in different nation states and regions throughout Europe This book reveals in a pluralistic way how European cities are generating new approaches to their sustainable development and the special contribution of culture to these processes It addresses both a deficit of attention to small and medium sized cities in the framework of European sustainable development and an underestimation of the role of culture artistic expression and creativity for integrated development of the city as a prerequisite to urban sustainability On the basis of a broad collection of case studies throughout Europe representing a variety of regionally specific cultural models of sustainable development the book investigates how participative culture community arts and more generally creativity of civic imagination are conducive to the goal of a sustainable future of small and medium sized cities This is an essential volume for researchers and postgraduate students in urban studies cultural studies cultural geography and urban sociology as well as for policymakers and practitioners wanting to understand the specificity of European cities as hubs of innovation creativity and artistic industriousness *Sustainable Communities in Europe* William M. Lafferty, 2014-05-14 A presentation of detailed comparative research into the implementation in 11 European countries of Local Agenda 21 the action plan for sustainable development at community level Overviews of implementation in each country are accompanied by analysis of positive and negative changes as well as a comparative analysis with high academic and policy relevance Numerous practical examples are included of best cases and crucial barriers **Sustainable Urban Development Reader** Stephen M. Wheeler, Timothy Beatley, 2014-10-03 Building on the success of its second edition the third edition of the Sustainable Urban Development Reader provides a generous selection of classic and contemporary readings giving a broad introduction to this topic It begins by tracing the roots of the sustainable development concept in the nineteenth and twentieth centuries before presenting readings on a number of dimensions of the sustainability concept Topics covered include land use and urban design transportation ecological planning and restoration energy and materials use economic development social and environmental justice and green architecture and building All sections have a concise editorial introduction that places the selection in context and suggests further reading Additional sections cover tools for sustainable development international sustainable development visions of sustainable community and case studies from around the world The book also includes educational exercises for individuals university classes or community groups and an extensive list of recommended readings The anthology remains unique in presenting a broad array of classic and contemporary readings in this field each with a concise

introduction placing it within the context of this evolving discourse The Sustainable Urban Development Reader presents an authoritative overview of the field using original sources in a highly readable format for university classes in urban studies environmental studies the social sciences and related fields It also makes a wide range of sustainable urban planning related material available to the public in a clear and accessible way forming an indispensable resource for anyone interested in the future of urban environments

Sustainable Development Goals in Europe María Luisa De Lázaro Torres,Rafael De Miguel González,2023-02-23 The aim of this book is to provide a synthesis of the newest research in Geography concerning the Sustainable Development Goals SDG s Although the world is strongly interconnected the majority of the chapters in this volume focus on Europe or the work of European researchers Each chapter of this book focusses on one of the 17 SDG s providing in depth knowledge from a geographical perspective fostering comprehensive research on these global targets to end poverty fight inequality and injustice and tackle climate change The Sustainable Development Goals are part of the 2030 Agenda for Sustainable Development To achieve them it will be necessary for all stakeholders including citizens civil society doctors teachers governments private sector to collaborate

Can a City Be Sustainable? (State of the World) The Worldwatch Institute,2016-05-10 Cities are the world s future Today more than half of the global population 3 7 billion people are urban dwellers and that number is expected to double by 2050 There is no question that cities are growing the only debate is over how they will grow Will we invest in the physical and social infrastructure necessary for livable equitable and sustainable cities In the latest edition of State of the World the flagship publication of the Worldwatch Institute experts from around the globe examine the core principles of sustainable urbanism and profile cities that are putting them into practice From Ahmedabad India to Freiburg Germany local people are acting to improve their cities even when national efforts are stalled Issues examined range from the nitty gritty of handling waste and developing public transportation to civic participation and navigating dysfunctional government The result is a snapshot of cities today and a vision for global urban sustainability tomorrow

The Sustainable Marketing Concept in European SMEs Edyta Rudawska,2018-05-14 The book provides knowledge of sustainable marketing tools in SMEs operating in the industry

Sustainable Urban Development in the European Arctic Dorothea Wehrmann,Michał Łuszczuk,Katarzyna Radzik-Maruszak,Jacqueline Götze,Arne Riedel,2025-02-07 Focusing on cities in the European Arctic this book consolidates research on sustainable development local and urban governance and transnational cooperation in the region It examines to what extent there is transnational cooperation between urban areas in remote locations and how it can be enhanced to better align with global sustainable development policies to successfully implement goals such as the 2030 Agenda for Sustainable Development and the Paris Climate Agreement Based on field research in seven cities in the European Arctic Rovaniemi Kolari Nuuk Akureyri Troms Kiruna and Lule the authors explain why approaches to sustainable urban development differ between geographies how policies relate to other local and global strategies and to what degree the European Arctic is normative for remote regions at

large This book contributes to important conceptual debates on local governance and transnational cooperation by examining the benefits and potential issues of applying theoretical models of multi actor engagement and participation in isolated populations It argues that the participation of local actors in decision processes may encourage a better harmonisation of sustainable urban development approaches in the European Arctic and will have a greater impact at the global level if aligned transnationally This book will be relevant to researchers social scientists policymakers practitioners and NGOs in the fields of global governance sustainable development sustainability research and environmental studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Sustainable Urban Development Reader Stephen M. Wheeler, Timothy Beatley, 2004 Bringing together classic readings from a wide variety of sources this key book investigates how our cities and towns can become more sustainable Thirty eight selections span issues such as land use planning urban design transportation ecological restoration economic development resource use and equity planning Section introductions outline the major themes whilst the editors introductions to the individual writings explain their interest and significance to wider debates Additional sections present twenty four case studies of real world sustainable urban planning examples sustainability planning exercises and further reading Providing background in theory practical application and vision in a clear accessible format The Sustainable Urban Development Reader is an essential resource for students professionals and indeed anyone interested in the future of urban environments

Implementing Sustainable Development Goals in Europe Charlie Karlsson, Daniel Silander, 2020-09-25 This unique book expertly analyses European political entrepreneurship in relation to the European Union's approach towards the Agenda 2030 Sustainable Development strategy It explores the role of European political entrepreneurs in shaping influencing and realising the United Nations Sustainable Development Goals Chapters examine EU actors in the context of numerous development goals to assess how political entrepreneurship challenges traditional EU institutions and promotes visionary activity

European Transport Policy and Sustainable Mobility Jonas Akerman, David Banister, Karl Dreborg, Peter Nijkamp, Ruggero Schleicher-Tappeser, Dominic Stead, Peter Steen, 2000-10-26 It is now widely accepted that transport is becoming increasingly unsustainable and that strong policy intervention is required to reduce both the growth in transport demand and the environmental costs of transport This book challenges conventional approaches to transport by moving away from trend based analysis towards the use of scenarios to identify alternative sustainable transport futures It both summarises the development of EU transport policy and presents a critique The policy context is widened to include the global changes taking place in economics society and technology It develops new methodologies for policy making for the next 25 years

Sustainable Development for Central and Eastern Europe Ulrich Graute, 2012-12-06 Central and Eastern European Countries are undergoing a difficult transition process with consequences for spatial development Europe needs a more balanced polycentric system of cities a new urban

rural relationship parity of access to infrastructure and knowledge as well as prudent management and development of the natural and cultural heritage Dealing with these complex challenges and the need for sustainable development politicians requires qualified advice from experts To this end the German Ministry for Regional Planning Construction and Urban Development initiated the Network of Spatial Research Institutes in Central and Eastern Europe CEE Net in 1992 Exchange of knowledge and an open dialogue at all levels are pre conditions for the cooperative development of visions and strategies serving spatial development in Europe The annual conferences of the network have been a first steps towards closer cooperation The high interest shown in these conferences by academics and government representatives and the fact that several research projects have already crystallised out of the debates they engendered indicate that the network is meeting a need for exchange and cooperation Decisions on spatial development do not stop at national borders and the discussion on spatial development in any European region has therefore to take the European context into consideration A special advantage of this publication is that as well as focusing on spatial development and research in CEE regions it also discusses Central and Eastern Europe in a European context

Sustainable Development Chaouki Ghenai, 2012-02-24 The technological advancement of our civilization has created a consumer society expanding faster than the planet's resources allow with our resource and energy needs rising exponentially in the past century Securing the future of the human race will require an improved understanding of the environment as well as of technological solutions mindsets and behaviors in line with modes of development that the ecosphere of our planet can support Sustainable development offers an approach that would be practical to fuse with the managerial strategies and assessment tools for policy and decision makers at the regional planning level

Sustainable Development of Water and Environment Han-Yong Jeon, 2025-01-02 This book aims to introduce pioneering scientific concepts in water and environmental studies fostering the exchange of cutting edge research findings and educational insights With a focus on sustainable practices in water resource management quality and pollution control the ICSDWE conference addresses the vital linkages between environmental sustainability climate change and water related issues This year's conference will focus on key themes such as climate change and water security microplastics in freshwater ecosystems sustainable groundwater development transboundary water conflicts and cooperation and environmental impact of desalination By advocating for significant measures aligned with sustainable development principles ICSDWE strives to safeguard water resources and the environment for future generations We extend a warm welcome to all related research contributions aspiring for ICSDWE to positively impact our world and enhance overall quality of life This year the ICSDWE conference will have its 7th edition Through its previous editions the conference has also contributed to the academic and practical discourse by publishing proceedings policy briefs and recommendations that serve as resources for researchers practitioners and policymakers alike With each edition the conference has reinforced its commitment to advancing sustainable development goals and addressing the most pressing environmental challenges of our time Overall the

conference has established itself as a significant event for sharing knowledge fostering partnerships and promoting sustainable practices

Sustainable Development Susan Baker, 2015-08-31 The current focus on sustainable development opens up debates surrounding our relationship with the natural world about what constitutes social progress and about the character of development both in the Global North and the Global South The promotion of sustainable futures is taking on a new urgency in the context of climate change and biodiversity loss This concise and accessible text explores how the international community is responding to the challenge of sustainable development It also investigates the prospect for and barriers to the promotion of sustainable development in high consumption societies of the industrialised world from the USA and the EU to the economies of transition in Eastern and Southern Asia In *Sustainable Development* Baker considers the global impact of China's industrial boom as well as how Chinese investments are shaping the prospects for sustainable development on the African continent This global coverage is balanced by investigating how local action ranging from the transition towns movement in the UK to the Green Belt movement in Kenya can contribute to the pursuit of sustainable development The second edition has been extensively revised and updated and benefits from the addition of three new chapters sustainable development in China the governance of sustainable development and sustainable production and consumption Climate change and biodiversity management have also been expanded into full chapters Providing an up to date and comprehensive treatment of the issues surrounding the promotion of sustainable development this unique internationally focused book combines a strong conceptual analysis with wide ranging empirical focus and a wealth of case material Including summary points and suggestions for further reading as well as web resources and an extensive bibliography it is ideal for students scholars and researchers in the fields of environmental sciences politics geography sociology and development studies

The Sustainable City in Africa Facing the Challenge of Liquid Sanitation Esoh Elamé, 2023-05-16 This book questions the role of liquid sanitation in the development of cities in Africa The absence of sewerage networks and treatment plants in African cities already submerged by rapid and anarchic urbanization is a major problem To meet this challenge it is urgent to rethink urban water governance and impose and enforce sustainable urban planning standards In other words sanitation issues must now be placed at the heart of urban planning
