Svensk Lardomshistoria:

Northern Europe in the Early Modern Period David Kirby, 2014-01-14 This is the first in a sequence of books which explores the history of The Baltic World and Northern Europe In this period Sweden was a major European power occupying a central position in international politics Her rise and decline and the passing of regional hegemony to the new powers of Russia and Prussia are central features in the book Dr Kirby describes the evolving social and political systems of the principal Baltic states of the time he gives the key events and processes in European history a new interest and freshness by showing them from the unfamiliar perspective of the northern world A History of Women Philosophers M.E.

Waithe, 2012-12-06 A History of Women Philosophers Mary Ellen Waithe, 1987 **Queen Christina of Sweden and Her Circle** Susanna Åkerman, 1991 The life and works of Queen Christina of Sweden 1626 1689 have often been obscured behind a haze of lurid myths and legends This book looks again at her notorious abdication of 1654 seeing it against the background of her reputation as a libertine a heterodox religious thinker Her subsequent conversion to Catholicism is therefore understood as a consequence of messianic and millenarian expectations during those turbulent years and her bizarre attempt in 1657 to become the ruler of Naples is revealed to be the political wing of a comprehensive religious and intellectual philosophy **The Cambridge History of Scandinavia: Volume 2, 1520-1870** E. I. Kouri, Jens E. Olesen, 2016-03-24

Volume 2 of The Cambridge History of Scandinavia provides a comprehensive and authoritative account of the Scandinavian countries from the close of the Middle Ages through to the formation of the nation states in the mid nineteenth century Beginning in 1520 the opening chapters of the volume discuss the reformation of the Nordic states and the enormous impact this had on the social structures cultural identities and traditions of individual countries With contributions from 38 leading historians the book charts the major developments that unfolded within this crucial period of Scandinavian history Chapters address topics such as material growth and the centralisation of power in the sixteenth and seventeenth centuries as well as the evolution of trade foreign policy and client states in the eighteenth century Volume 2 concludes by discussing the new economic and social orders of the nineteenth century in connection with the emergence of the nation states **Åbo**

Filosofin, 1908 Current Book Review Citations, 1980 **Historisk tidskrift**, 2002 **Maakunnan synty** Kimmo Katajala, Jaana Juvonen, 2006 Comparative Science and Technology Policy Sheila Jasanoff, 1997 Science and technology policy is widely recognized as a critically important sphere of state activity This book presents an authoritative overview of comparative research on science and technology policy in order to illuminate the choices that confront decision makers in this field With contributions from various disciplines including economics political science law and science and technology studies the selection of articles reflects both traditional perspectives and those which challenge conventional assumptions The book covers such topics as the relationship between science and the state and comparisons of how different governments seek to support and regulate scientific research technology industrial innovation and global competitiveness Finally it looks at how international influences can affect national policies **The Sciences in the European Periphery During the Enlightenment** Kostas Gavroglu, 1999-01-31 The articles in this volume of ARCHIMEDES examine particular cases of reception in ways that emphasize pressing historiographical and methodological issues Such issues arise in any consideration of the transmission and appropriation of scientific concepts and practices that originated in the several centers of European learning subsequently to appear often in considerably altered guise in regions at the European periphery They discuss the transfer of new scientific ideas the mechanisms of their introduction and the processes of their appropriation at the periphery The themes that frame the discussions of the complex relationship between the origination of ideas and their reception include the ways in which the ideas of the Scientific Revolution were introduced the particularities of their expression in each place the specific forms of resistance encountered by these new ideas the extent to which such expression and resistance displays national characteristics the procedures through which new ways of dealing with nature were made legitimate and the commonalities and differences between the methods developed by scholars for handling scientific issues Language and Power. The Implications of Language for Peace and Development Birgit Brock-Utne, 2008-12-31 Language is a tool used to express thoughts to hide thoughts or to hide lack of thoughts It is often a means of domination The question is who has the power to define the world around us This book demonstrates how language is being manipulated to form the minds of listeners or readers Innocent words may be used to conceal a reality which people would have reacted to had the phenomena been described in a straightforward manner The nice and innocent concept cost sharing which leads our thoughts to communal sharing and solidarity may actually imply privatization The false belief that the best way to learn a foreign language is to have it as a language of instruction actually becomes a strategy for stupidification of African pupils In this book 33 independent experts from 16 countries in the North and the South show how language may be used to legitimize war making promote Northern interests in the field of development and retain colonial speech as languages of instruction

languages of the courts and in politics The book has been edited by two Norwegians Birgit Brock Utne is a professor at the University of Oslo and a consultant in education and development From 1987 until 1992 she was a professor at the University of Dar es Salaam Gunnar Garbo author and journalist and former member of the Norwegian Parliament was the Norwegian Ambassador to Tanzania from 1987 to 1992 *The Chemical Industry in Europe, 1850-1914* Ernst Homburg, Anthony S. Travis, Harm G. Schröter, 1998-10-31 Europe is the cradle of the modern international chemical industry From the middle of the nineteenth century until the outbreak of World War I the European chemical industry influenced not only the production and control of science and technology but also made significant contributions towards economic development as well as bringing about profound changes in working and living environments It is a highly complex heritage both rich and threatening that calls for close scrutiny Fortunately a unique opportunity to explore the historical development of the European chemical industry from a variety of novel standpoints was made possible during 1993 as part of the European Science Foundation ESF programme called The Evolution of Chemistry in Europe 1789-1939 This process of exploration has taken place through three workshops each dealing with different time periods The workshop concerned with the period 1850-1914 which corresponds roughly to the so called Second Industrial Revolution was held in Maastricht The Netherlands on 23-25 March 1995 This volume is the outcome of that workshop The other workshops dealing with European chemical industry were held in Liege in 1994 covering the First Industrial Revolution period 1789-1850 and Strasbourg in 1996 covering the period between the two World Wars *Bibliography of the History of Medicine*, 1993 **Svensk lardomshistoria. Vol.4. Gustavianska...** S. Lindroth, 1981 **Geography: Discipline, Profession and Subject since 1870** Gary S. Dunbar, 2001-12-31 This book is a comprehensive treatment of the professionalization and institutionalization of the academic discipline of geography in Europe and North America with emphasis on the 20th century and the last quarter of the 19th No other book has ever attempted coverage of this sort It is relevant to geographers practitioners of the social and earth sciences and historians of science and education
