Swahili Ulf L. Nilsson,2020-04-17 Swahili By Ulf L Nilsson Swahili in its various forms is one of the most important and widely spoken languages in the world with more than 100 million Bantu speakers who inhabit East and Central Africa south of the Equator Swahili lives in two different worlds One being the standardized Swahili that is spoken in Tanzania as a strict language and with an authority that oversees its proper use The other is the world that does not follow standardized rules The primary difference between the two is the Arabic influence in the east and the Bantu structure in the west with loanwords mainly from French The problem with the various Swahilis is that some Bantu Swahili speakers have complained that in order to speak proper Swahili they have to learn Swahili at school at the same time that they learn their uncontrolled local Bantu Swahili There is and has been a concern about the future of Swahili that the officially approved version will be corrupted by loanwords and slang On the other side others are worried that Swahili lacks openness towards living words i e word borrowings Ulf L Nilsson presents a chronicle about the Swahili family and its lingual neighbors with eyes on Arabic heritage external influences cultural history religion and politics Swahili A Family Chronicle contains good readings about Swahili and the Bantu family in Tanganyika Kenya Uganda and the Congo *Christian Zionism in Africa* Cynthia Holder

Rich,2021-01-06 Christian Zionism a movement based on the belief that support of Israel and Israeli ownership of and residence in Jerusalem is a prerequisite for Christ s return has been a significant substratum within theologies and ecclesiologies of many churches in the US and Europe for centuries Since the 1970s US based Christian Zionism organizations encouraged by and collaborating with the Israeli government have used a significant amount of resources to spread the movement into other regions of the world including Africa In many African countries Christian Zionism combines perniciously with Prosperity Gospel preaching interpreting Genesis 12 3 as a divine map to gain blessings material and otherwise through complete and uncritical support for the modern day State of Israel Many African governments have come to understand that this support is lucrative and coercive African officials working with Israel learn that openly supporting Palestine will result in their partnerships with Israel being discontinued Contributors to this interdisciplinary volume analyze the meaning and ramifications of the emergence of Christian Zionist ideologies in Africa and its churches in interfaith work in politics in law and in the use and abuse of power between peoples of different races histories economic strength and influence on the international stage

Expanding Approaches to Bible Translation James A. Maxey,2025-05-22 The assertion in this book included within the BPC series is that translation is as fundamental to biblical material as performance both in its history as well as in its research approaches Translation in this sense is more than a transferal of meaning from one linguistic system to another Bible translation highlights innovative connections and conceptions to biblical texts in their promulgation reception and ever changing nature A predominant theory used throughout this book is social semiotic multimodality This communication theory informs an approach to translation that expands beyond words to other semiotic resources Sign Language embodied performance social media theater materiality and many other types of multimodal communications inform translation It is important to understand that the Bible is a translated experience Translation reflects the various ways in which the Bible has been mediated and appropriated throughout history It follows therefore that Bible translation as a global activity has been and continues to be influenced by the political and economic flows of history Race class ethnicity gender sexual orientation and other elements of our social locations directly influence the enterprise and results of Bible translation

The New Testament in Swahili ,1950 *Cultural Politics of Translation* Alamin M. Mazrui,2016-02-19 This book is the first full length examination of the cultural politics at work in the act of translation in East Africa providing close critical analyses of a variety of texts that demonstrate the myriad connections between translation and larger socio political forces Looking specifically at texts translated into Swahili the book builds on the notion that translation is not just a linguistic process but also a complex interaction between culture history and politics and charts this evolution of the translation process in East Africa from the pre colonial to colonial to post colonial periods It uses textual examples including the Bible the Qur an and Frantz Fanon s *Wretched of the Earth* from five different domains religious political legal journalistic and literary and grounds them in their specific socio political and historical contexts to highlight

the importance of context in the translation process and to unpack the complex relationships between both global and local forces that infuse these translated texts with an identity all their own This book provides a comprehensive portrait of the multivalent nature of the act of translation in the East African experience and serves as a key resource for students and researchers in translation studies cultural studies post colonial studies African studies and comparative literature

Globalisation and African Languages Katrin Bromber, Birgit Smieja, 2011-07-20 Globalisation and African Languages links African language studies to the concept of globalisation which increasingly undergoes critical review Hence African linguists of various provenience can make valuable contributions to this debate In cultural matters which by definition include language there is often a sense that globalisation leads to a major trend of homogenisation which results in a reduction of diversity on the one hand and on the other in new themes being incorporated into global cultural patterns However often conflicting and overlapping particularistic interests exist which have a constructive as well as destructive potential This aspect leads directly to the first of three sections of this volume LANGUAGE USE AND ATTITUDES which addresses some of the burning issues in sociolinguistic research Since this research area is tightly linked to the educational domain these important issues are addressed in articles that comprise the second section of this volume LANGUAGE POLICY AND EDUCATION The third section of the volume presents articles dealing with LANGUAGE DESCRIPTION AND CLASSIFICATION demonstrating which parts of different language systems are affected through contact under historical and modern conditions The contributions of all the well known scholars in this volume show that globalisation is a two way street and to ensure that all sides benefit in a reciprocal manner means the impacts have to be monitored globally regionally nationally and locally By disseminating and emphasising these linguistic findings as part of the global cultural heritage African language studies may offer urgently needed new perspectives towards a rapidly changing world The Bible in the World , 1905 *Islam in German East Africa, 1885-1918* Jörg Haustein, 2023-07-14 In this rich and multi layered deconstruction of German colonial engagement with Islam Jörg Haustein shows how imperial agents in Germany's largest colony wielded the knowledge category of Islam in a broad set of debates ranging from race language and education to slavery law conflict and war These representations of Mohammedanism often invoked for particular political ends amounted to a serious misreading of Muslims in East Africa with significant long term effects As the first in depth account of the politics of Islam in German East Africa the book makes an essential contribution to the history of religion in Tanzania before British rule It also offers a template for re reading the colonial archive in a manner that recovers Muslim agency beyond a European paradigm of religion
