Young,2001-11-01 Based on 41 years of Hong Kong Bird Watching Society records and surveys including the first comprehensive breeding bird survey carried out in Hong Kong A detailed analysis of the changing status and distribution of each species in Hong Kong together with a review of 20 years of waterbird count data an assessment of the effect of the wild bird trade on birds in Hong Kong and a summary of data collected as part of a long term ringing programme make this an essential reference to the status and distribution of the birds of south China Global Register of Migratory Species Klaus Riede,2004 Extinct Birds Julian P. Hume,2017-08-24 A comprehensive review of the hundreds of bird species that have become extinct over the last 1 000 years of habitat degradation over hunting and rat introduction Extinct Birds has become the standard text on this subject covering both familiar icons of extinction as well as more obscure birds some known from just one specimen or from travellers tales This second edition is expanded to include dozens of new species as more are constantly added to the list either through extinction or through new subfossil discoveries The book is the result of decades of research into literature and museum drawers as well as caves and subfossil deposits which often reveal birds long gone that disappeared without ever being recorded by scientists while they lived From Great Auks Carolina Parakeets and Dodos to the amazing yet almost completely vanished bird radiations of Hawaii and New

Zealand via rafts of extinction in the Pacific and elsewhere this book is both a sumptuous reference and astounding testament to humanity's devastating impact on wildlife

Swifts Phil Chantler, 2010-08-30 Swifts pose some of the most difficult identification field identification problems and it is the aim of this guide to provide information that will help resolve many of these problems For the first time all 96 species of swifts and treeswifts are included in a single volume Swifts are found throughout the world except in the polar regions some such as the Common Swift and the Chimney Swift are common and widespread but others are both elusive and scarce The 24 colour plates have been designed so that wherever possible species that can be confused are shown together All species and wherever relevant all distinct plumage differences have been illustrated in flight from above and below The main field characteristics are highlighted in the accompanying caption text to facilitate the separation of species whose ranges overlap The comprehensive text has a strong emphasis on identification and distribution but also includes information on habitat voice habits and breeding The species descriptions are very detailed often describing features that are not easily visible in the field but which may contribute to the overall appearance of the bird They are intended to be useful both in the field and in the hand A range map accompanies each species account and many line drawings are included to illustrate specific features Phil Chantler and Gerald Driessens have between them observed a large number of the world's swifts and they have drawn extensively on this experience in producing this work This text includes much unpublished data and the painstakingly researched plates are based on field sketches and photographs wherever possible This important book which is the standard reference on the subject will stimulate interest in these fascinating and challenging birds

Identification Mark Beaman, Steve Madge, 2010-09-30 An identification guide covering all the bird species to have occurred in the European region Birding is one of the most popular activities and pastimes in Europe and so it follows that it is essential to be able to identify the birds on view be it in the back garden or for making more serious in depth studies This book aims to bring together as much information as possible in one volume using extremely detailed up to date guides and identification of every species known to have occurred in Europe and the West Palearctic that is the whole of Europe North Africa as far south as the Central Sahara the Middle East to the border of Iran the Azores Madeira Canary Islands the islands off Mauritania and the Cape Verde islands as defined by Cramp and Simons 1977 They have certainly been successful in doing so and have produced a wonderfully comprehensive guide covering nearly 900 species showing a wide range of differing plumages The colour plates are exquisite and have been painted by some of Europe s leading bird artists The text is clear and can be followed by beginners but finer points of identification are included for the benefit of more serious bird watchers Particularly helpful is the cross referencing of the text and colour plates There are more than 600 colour maps to identify where the birds are to be found which are simple and easy to use with excellent descriptions of status and habitat
