## Swank Talk:

*Globalizing the Library* Amanda Laugesen, 2019-03-04 *Globalizing the Library* focuses on the globalization of information and the library in the period following the Second World War. Providing an examination of the ideas and aspirations surrounding information and the library as well as the actual practices and actions of information professionals from the United States, Britain, and those working with organizations such as Unesco to develop library services, this book tells an important story about international history that also provides insight into the history of information globalization and cultural relations. Exploring efforts to help build library services and train a cohort of professional librarians around the globe, the book examines countries in Asia, Africa, and the Pacific during the period of the Cold War and decolonization. Using the ideas of library diplomacy and library imperialism to frame Anglo-American involvement in this work, Laugesen examines the impact library development work had on various countries. The book also considers what might have motivated nations in the global South to use foreign aid to help develop their library services and information infrastructure. *Globalizing the Library* prompts reflection on the way in which library services are developed and the way professional knowledge is transferred while also illuminating the power structures that have shaped global information infrastructures. As a result, the book should be essential reading for academics and students engaged in the study of libraries, development, and information. It should also be of great interest to information professionals and information historians who are reflecting critically on the way information has been transferred, consumed, and shaped in the modern world.

Swank Talk Bertrand Gauthier, 1992 The Swank twins are back and they are confusing their parents and confounding the experts because no one can understand what they say. Only another pair of twins can solve this riddle.

Playing Nice and Losing Ying Wushanley, 2004-04-01 For nearly a century, women's physical educators kept an iron fist control of women's intercollegiate athletics within the sex-separate spheres of college campuses and under an educational model of competition. According to the author Ying Wushanley, that control began to loosen significantly when Congress passed Title IX of the Education Amendments in 1972. Title IX meant greater opportunities for women in educational activities, including intercollegiate athletics. Ten years after the passage of the law, however, women not only gave up their educational model but also lost their power and control of women's intercollegiate athletics. *Playing Nice and Losing* looks into the evolution of women's intercollegiate athletics from a historical perspective and examines the demise of the Association for Intercollegiate Athletics for Women (AIAW). Five major themes emerge: the movement from protectionism to sex separation of women's college sports; the ascendance of women's sports as a result of the Cold War and power struggle within U.S. amateur sports; the challenge to the sex-separatist philosophy; the NCAA takeover and bankruptcy of the AIAW; and the defeat of the AIAW as a defender of these separate but equal doctrines. With Title IX and formerly men's organizations entering the governance of women's intercollegiate athletics, sustaining the sex-separatist AIAW became untenable in American society.
