

CASA BATLLO

1. The present Casa Batlló, is the result of a **TOTAL REFURBISHMENT** of an old previous conventional house built in **1877**.
1. The local name for the building is **CASA DELS OSSOS** (House of Bones), and indeed it does have a **VISCERAL, SKELETAL ORGANIC** quality.

- It was originally designed for a middle-class family and situated in a prosperous district of Barcelona
- Gaudí was commissioned by the owner to totally renew the old building.
- On that base, Gaudí projected this astonishing house, one of the **most fancy** and **"special"** of Barcelona
- The changes made by Gaudí on the old building were **radical** and affect all the building.
- In fact the building of Gaudí is a new building.

Modern Swedish Design Uno Åhrén, 2008 Although Swedish design has exercised an extraordinary influence on modern architecture and interior furnishings internationally since the early twentieth century the intellectual background from which it emerged is far less well known for some of the crucial generative writings on the subject by Swedish thinkers of the time have never been widely translated *Modern Swedish Design Theory* collects three of these seminal essays for the first time in English Accompanying these texts in the book are introductory essays and a postscript by the renowned architectural historian Kenneth Frampton *Sweden* Thorbjörn Andersson, Deutsches Architekturmuseum, 1998 Sweden 20th Century Architecture is the latest volume of a critical series devoted to introducing the reader to European architecture country by

country This handsomely illustrated book details how a century's worth of social changes are reflected in the development of Swedish architecture. Featured are the various periods in which Swedish architecture and urban planning were at the forefront of European design. The volume also examines the current construction techniques employed in numerous modern buildings and the diverse looks they achieve. It explains Sweden's progressive role in the modern movement with architecture that is functionalist and aesthetic and distinctly Nordic in character. It explains both the continuity and the contradictions between the classicism of the 1920s and 1930s as well as its softened welfare state variant of the 1940s, an era in which Sweden became a model for the rebuilding of many European countries. The time of the great programs in the 1960s, both in housing and in the building of public institutions, is analyzed in detail, as is the crisis in architectural quality caused by the structure of the building trade dating from that time. A new generation of architects, more internationally oriented and creatively open-minded but also faithful to the Swedish tradition, is presented in the close of the chronological chapters. Sweden 20th Century Architecture includes an enormous number of projects, and the reader learns theoretically and visually about the top quality architecture of this country. **Twentieth Century Architecture** Dennis Sharp, 2002. Fully

documented, richly illustrated guide to the great architectural achievements of the last one hundred years. **The A to Z of Sweden** Irene Scobbie, 2010-05-11. Once part of the Kalmar Union along with Denmark and Norway, the Kingdom of Sweden broke free in order to govern itself in the early 1500s, and for more than a century afterwards it was a force to be reckoned with. At its peak it was twice the size that it is today, but with the secession of Finland in 1809 and the rise of Russia, Sweden changed its path and instead turned toward neutrality and a peaceful existence. Today Sweden boasts a healthy economy and it is an important member of the European Union, as well as a major contributor to international activities. The A to Z of Sweden relates the history of Sweden through a chronology, a list of acronyms and abbreviations, an introductory essay, a bibliography, appendixes, and hundreds of cross-referenced dictionary entries on significant persons, events, and institutions. This dictionary provides information ranging from politics to economics, from education to religion, and from music to literature. **Swedish Building Research**, 1999.

The Human Sustainable City Bruno Forte, Maria Cerreta, Pasquale De Toro, 2019-06-04. This title was first published in 2003. Seven years after Habitat II culminated with the Istanbul agreement on Sustainable Urban Development, this book brings together many of the world's leading experts from the fields of architecture, urban planning, economics, sociology, politics, environment, and geography to assess the successes and failures in fulfilling the objectives decided upon at this historic meeting. Illustrated with a wide range of case studies, this volume is divided into three main sections: firstly, examining the challenges; secondly, the approaches; and finally, the practices. The book represents a critical appraisal, not only of the issues related to urban development but also of the modalities to face these issues from real examples. These, in return, can be used as starting points to construct new real utopias or at least to future best practices.

Unpacking IKEA Pauline Garvey, 2017-11-23. This book represents the first anthropological ethnography of Ikea.

consumption and goes to the heart of understanding the unique and at times frantic popularity of this one iconic transnational store Based on a year of participant observation in Stockholm s Kungens Kurva store the largest in the world this book places the retailer squarely within the realm of the home building efforts of individuals in Stockholm and to a lesser degree in Dublin Ikea the world s largest retailer and one of its most interesting is the focus of intense popular fascination internationally yet is rarely subject to in depth anthropological inquiry In *Unpacking Ikea* Garvey explores why Ikea is never just a store for its customers and questions why it is described in terms of a cultural package as everyday and classless Using in depth interviews with householders over several years this ethnographic study follows the furniture from the Ikea store outwards to probe what people actually take home with them [Library of Congress Subject Headings](#) Library of Congress, Library of Congress. Historical Dictionary of Sweden Elisabeth Elgán,Irene Scobbie,2015-09-17 Sweden s transformation in the last century was brought about not by the military prowess of exceptional Swedes indeed neutrality has been a key element in Swedish policy for almost two centuries but by the creative ability of its people Sweden has emerged as a model welfare state and a well ordered democracy to which economists sociologists feminists architects and scientists from sophisticated nations have paid study visits Sweden now depends on international trade to preserve its high standard of living and in a world of harsh international competition often has to struggle to maintain its welfare system and its reputation Despite its present difficulties however it remains one of the world s most advanced and affluent democracies This third edition of Historical Dictionary of Sweden contains a chronology an introduction appendixes an extensive bibliography and a dictionary section with more than 300 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about Sweden

The European City and Green Space Peter Clark,2016-12-05 Recent years have seen sustained public debate and controversy over the greening of European cities associated with the environmental movement pressures of urban redevelopment and the promotional strategies of cities competing in a global market But the European debate over urban green space has a long history dating back to Victorian concerns for the green lungs of the city to combat the health and social problems caused by rapid population and industrial growth This book explores the multiplicity of green space developments in the modern city ranging over parks and commons garden suburbs and the cities in the park allotment gardens green belts and national urban parks It is concerned not only with the different types of green space but the many influences shaping their evolution from international planning ideas to the rise of modern day sport and leisure and the effects of the transport revolution No less vital in this story is the interaction of the many actors involved in the often fractious political process of creating green spaces architects and planners politicians developers and other businessmen NGOs and local residents This volume is particularly concerned with contexts how international planning ideas are transmitted and adapted in different European cities how the construction of green space is affected by local power structures and relationships and how ordinary people perceive and use green spaces quite often at variance with official designs The European City and Green Space looks at these and other issues through the prism of four metropolises London

Stockholm Helsinki and St Petersburg All represent different types of North European city yet each has experienced distinctive economic political and cultural trajectories whilst also facing powerful challenges and problems of similar kinds with regard to green space This volume examines how each has responded to them and what patterns emerge

Nationalism and Architecture Darren Deane, Sarah Butler, 2016-12-05 Unlike regionalism in architecture which has been widely discussed in recent years nationalism in architecture has not been so well explored and understood However the most powerful collective representation of a nation is through its architecture and how that architecture engages the global arena by expressing defining and sometimes negating a sense of nation in order to participate in the international world Bringing together case studies from Europe North and South America the Middle East Africa Asia and Australia this book provides a truly global exploration of the relationship between architecture and nationalism via the themes of regionalism and representation various national building projects ethnic and trans national expression national identities and histories of nationalist architecture and the philosophies and sociological studies of nationalism It argues that nationalism needs to be trans national as a notion to be critically understood and the geographical scope of the proposed volume reflects the continuing relevance of the topic within current architectural scholarship as an overarching notion The interdisciplinary essays are coherently grouped together in three thematic sections Revisiting Nationalism Interpreting Nationalism and Questioning Nationalism These chapters offer vignettes of the protean appearances of nationalism across nations and offer a basis of developing wider knowledge and critically situated understanding of the question beyond a singular nation's limited bounds
