Farthest North Fridtjof Nansen, 2000-05-12 In 1893 Nansen set sail in the Fram a ship specially designed and built to be frozen into the polar ice cap withstand its crushing pressures and travel with the sea's drift closer to the North Pole than anyone had ever gone before Experts said such a ship couldn't be built and that the voyage was tantamount to suicide This brilliant first person account originally published in 1897 marks the beginning of the modern age of exploration Nansen vividly describes the dangerous voyage and his 15 month long dash to the North Pole by sledge An unforgettable tale and a must read for any armchair explorer **ESSA Technical Memorandum ERLTM-NSSL.** United States. Environmental Science Services Administration, 1968 *The Channel Pilot* Great Britain. Hydrographic Department, 1888 *The Sounding of the Whale* D. Graham Burnett, 2022-12-22 This wonderful book documents the interplays among science conservation and politics in the evolving career of the whale over the last century William Perrin Senior Scientist for Marine Mammals at the Southwest Fisheries Science Center NOAA Fisheries Service From biblical times whales have breached in the human imagination as looming figures of terror power confusion and mystery In the twentieth century however our understanding of and relationship to these superlatives of creation underwent some astonishing changes and with *The Sounding of the Whale* D Graham Burnett tells the fascinating story of the transformation of cetaceans from grotesque monsters useful only as wallowing kegs of fat and fertilizer to playful friends of humanity bellwethers of environmental devastation and finally totems of the counterculture in the Age of Aquarius When Burnett opens his story ignorance reigns even Nature was misclassifying whales at the turn of the century and the only biological study of the species was happening in gruesome Arctic slaughterhouses But in the aftermath of World War I an international effort to bring rational regulations to the whaling industry led to an explosion of global research and regulations that while well meaning were quashed or widely flouted by whaling nations the first shot in a battle that continues to this day The book closes with a look at the remarkable shift in public attitudes toward whales that began in the 1960s as environmental concerns and new discoveries about whale behavior combined to make whales an object of sentimental concern and public adulation A sweeping history grounded in nearly a decade of research *The Sounding of the Whale* tells a remarkable story of how science politics and simple human wonder intertwined to transform the way we see these behemoths from below **Records of the Cape Colony from February 1793** Cape of Good Hope (South Africa), 1899 *Records of the Cape Colony from February 1793 [to: Feb. 1803-July 1806* Cape of Good Hope (South Africa), 1899 Records of the Cape Colony: Feb. 1803-July 1806 Cape of Good Hope (South Africa), George McCall Theal, 1899 **Sounding the Dance, Moving the Music** Mohd Anis Nor, Kendra

Stepputat, 2016-07-01 Performing arts in most parts of Maritime Southeast Asia are seen as an entity where music and dance sound and movement acoustic and tactile elements intermingle and complement each other Although this fact is widely known and referenced most scholarly works in the performing arts so far have either focused on music or dance rather than treating the two in combination The authors in this book look at both aspects in performance moreover they focus explicitly on the interrelation between the two on both descriptive analytical and metaphorical levels The book includes diverse examples of regional performing art genres from Indonesia Malaysia and the Philippines All case studies are composed from the perspective of the relatively new approach and field of ethno choreomusicology This particular compilation gives an exemplary overview of various phenomena in movement sound relations and offers for the first time a thorough study of the phenomenon that is considered essential for the performing arts in Maritime Southeast Asia the inseparability of movement and sound An Account of the Suspension Bridge Across the River Danube William Tierney Clark, 1852 **Sounding the**

But as Deleuze himself stresses more important than merely critiquing established paradigms is developing ways to overcome them and by using Deleuze's own concepts this collection aims to explore that possibility
