Foucault, Marxism and Critique Barry Smart, 2013-01-11 In this work originally released in 1983 Barry Smart examines the relevance of Foucault's work for developing an understanding of those issues which lie beyond the limits of Marxist theory and analysis issues such as individualising forms of power power knowledge relations the rise of the social and the associated socialisation of politics He argues that there exist clear and substantial differences between Foucault's genealogical analysis and that of Marxist theory Smart thus presents Foucault's work as a new form of critical theory whose object is a critical analysis of rationalities and of how relations of power are rationalised *Soviet Marxism-Leninism and the Question of Ideology* Rachel Walker, University of Essex, 1987 *The Lost Debate* William David Jones, 1999 Brings to light critiques of modern tyranny written by German socialist intellectuals before and during World War II about the definition origins nature and means of overcoming totalitarianism **Eros and Revolution** Javier Sethness Castro, 2016-06-10 In *Eros and Revolution* Javier Sethness Castro presents a comprehensive intellectual and political biography of the world renowned critical theorist Herbert Marcuse 1898-1979 Investigating the origins and development of Marcuse's dialectical approach vis vis Hegel Marx Fourier Heidegger and Freud as well as the central figures of the Frankfurt School Horkheimer Adorno Neumann Fromm and Benjamin Sethness Castro chronicles the radical philosopher's lifelong activism in favor of anti capitalism anti fascism and anti authoritarianism together with Marcuse's defiant

revindication of global libertarian socialist revolution as the precondition for the realization of reason freedom and human happiness Beyond examining Marcuse s revolutionary life and contributions moreover the author contemplates the philosopher s relevance to contemporary struggle especially with regard to ecology feminism anarchism and the general cause of worldwide social transformation The Routledge International Handbook of C. Wright Mills Studies Jon Frauley,2021-09-22 The Routledge International Handbook of C Wright Mills Studies brings together leading scholars of the work of radical sociologist C Wright Mills to showcase its impact across the social sciences Showing how Mills thought can be taken up and in some cases sympathetically reformulated to tackle problems of power and politics it presents an authoritative state of the art overview of Mills groundbreaking ideas and his far reaching theoretical and methodological impact Crucially the volume also illustrates the value of thinking with Mills in addressing the complexities of contemporary capitalist democracies As such it will appeal to scholars of sociology anthropology organization studies peace and conflict studies criminology politics and public administration *Post-Marxism* Stuart Sim,2013-04-15 This book traces the crystallisation of post Marxism as a specific theoretical position in its own right and considers the role played in its development by post structuralism postmodernism and second wave feminism It examines the history of dissenting tendencies within the Marxist tradition and considers what the future prospects of post Marxism are likely to be *Critical Literacies in Action* ,2008-01-01 Critical Literacies in Action Social Perspectives and Teaching Practices asks how educators can become more experienced in order to truly support literacy particularly for children of poverty or for those who have been labeled at risk This is especially important in current times since a literate individual is one who is more successfully able to situate him or herself within a continuum of lifelong learning in order to fulfill personal goals and to participate fully within the wider societal context Although the word literacy has been with us for a very long time the very meaning of the term itself has become increasingly complex due to a multiplicity of factors At least in part this complexity is a function of expanding and interconnecting notions of what it is that constitutes modern literacy as well as the increasingly technological nature of the world within which individuals live and learn As such a new horizon in literacy research has appeared promising to renegotiate traditional definitions of the term literate and what it means to be critically literate in this increasingly complex world Definitions of literacy have also evolved along with the evolution of the computer Currently the term literacy describes a commitment to and participation in a multiplicity of meaning making systems many of which exhibit ever greater degrees of interdependence with one another The term Critical Literacy has come into use relatively recently and is generally regarded as a sub category of Critical Pedagogy Critical because it promotes an agenda for positive social change **Communism and Development (Routledge Revivals)** Robert Bideleux,2014-06-27 First published in 1985 this book provides a comprehensive reappraisal of the diverse Communist development strategies that shaped the twentieth century Robert Bideleux emphasises the appalling human and economic costs of the most widely adopted Stalinist strategies

of forced industrialisation and rural collectivisation He also reconsiders the powerful arguments in favour of the most feasible and cost effective alternatives to Stalinism including village communisms and market socialisms A highly readable and challenging study this reissue will be of particular value to students with research interests in Development Studies East European History and Politics

The Global Revolution Silvio Pons, 2014 A leading European historian offers a fresh analysis of communism as a global movement that played a major part in the formation of our modern world from the birth of Soviet Russia and the revolution in China to the Cold War and the impact of Western led processes of globalization

Revolution and Culture Zenovia A. Sochor, 1988 Zenovia A Sochor here assesses one of the most important debates within the Bolshevik leadership during the early years of Soviet power that between A A Bogdanov and V I Lenin Once comrades in arms Bogdanov and Lenin became political rivals prior to the October Revolution Their disagreements over political and cultural issues led to a split in the Bolshevik Party with Bogdanov spearheading the party's left wing faction and attracting a following of notable intellectuals Before Lenin died in 1924 however he had succeeded in shaping Soviet society according to his own vision and today Bolshevism is commonly identified with Leninism while Bogdanovism is little known Sochor provides the first full exposition in English of Bogdanov's views which she asserts must be understood to appreciate the choices available and the paths not taken during the formative years of the Soviet regime

The Menshevik Leaders in the Russian Revolution Ziva Galili, 2019-02-19 At the end of February 1917 the tsarist government of Russia collapsed in a whirlwind of demonstrations by the workers and soldier of Petrograd Ziva Galili tells how the moderate socialists or Mensheviks then attempted to prevent the conflicts between the newly formed liberal Provisional Government the bourgeois camp and the Petrograd Soviet the democratic camp from escalating into civil war and how in October of that same year they finally failed Placing narrative history in a broad social and political context she creates an absorbing study of idealists who tried in vain to reflect as well as to contain the unfolding revolutionary process Galili focuses on the Menshevik Revolutionary Defensists who became the leaders of the Petrograd Soviet and of the all Russian network of soviets She examines Menshevik political strategy as well as the three way interaction between Mensheviks both in the Soviet and the Provisional Government workers and industrialists She emphasizes the perceptual

and interactive aspects of the analysis of revolutions the relations between social realities perceptions of realities and the formulation of political strategies the roles of rhetorics and societal conflict in shaping social identities and the impact of political authority and state institutions on the terms of social interaction Ziva Galili is Associate Professor of History at Rutgers University She is coeditor and annotator of *The Making of Three Russian Revolutions* series Voice from the Menshevik Past Cambridge Studies of the Harriman Institute Columbia University Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Scenarios of Power Richard S. Wortman, 2013-10-31 This new and abridged edition of *Scenarios of Power* is a concise version of Richard Wortman's award winning study of Russian monarchy from the seventeenth century until 1917 The author breaks new ground by showing how imperial ceremony and imagery were not simply displays of the majesty of the sovereign and his entourage but also instruments central to the exercise of absolute power in a multinational empire In developing this interpretation Wortman presents vivid descriptions of coronations funerals parades trips through the realm and historical celebrations and reveals how these ceremonies were constructed or reconstructed to fit the political and cultural narratives in the lives and reigns of successive tsars He describes the upbringing of the heirs as well as their roles in these narratives and relates their experiences to the persistence of absolute monarchy in Russia long after its demise in Europe

The Cold War in the 1950s Nicolas Lewkowicz, 2024-03-12 The book claims that the United States and the Soviet Union attained the mastery of the international order by projecting universalist values that responded to the particularist markers of the domestic order that was generated in the 1950s The geopolitical orientation adopted by the superpowers in the 1950s was shaped by the way in which their societies developed politically socially and economically in the 1950s The main argument of this book is that the quest for the mastery of the international order that informed superpower relations in the 1950s was guided by the need to respond to the local circumstances that emerged in the United States and the Soviet Union The particularist markers that arose in the 1950s led to the establishment of a geopolitical project underpinned by certain universalist values that could be applied in order to build the superpowers sphere of influence
