Futurist spaceflight meditations Giulio Prisco, 2021-06-03 We must strenuously push toward our cosmic destiny among

the stars Beginning to expand beyond the Earth before it s too late is our most important task at this moment in history Many actors have important roles to play and there s room for everyone Spaceflight will also help find viable solutions for current developmental environmental and social problems But the road to the stars is full of impediments and roadblocks We will not advance as fast as we wish Therefore we must keep our mood strenuous and our drive strong We need an optimistic spaceflight culture oriented to the future with energizing visions of interplanetary interstellar and cosmic futures We also need a futurist space philosophy [NASA Tech Briefs](#) ,1990 [Living Off the Land in Space](#) C Bangs, Gregory Matloff, Les Johnson,2007-06-06 This book presents a visionary concept for future development of space travel It describes the enabling technology for future propulsion concepts and demonstrates how mankind will live off the land in space in migration from Earth For the next few millennia at least barring breakthroughs the human frontier will include the solar system and the nearest stars Will it be better to settle the Moon Mars or a nearby asteroid and what environments can we expect to find in the vicinity of nearby stars These are questions that need to be answered if mankind is to migrate into space

Congressional Record United States. Congress,1997 **Humans to Mars** David S. F.
