Information, Statistics And Induction In Science - Proceedings Of The Conference, Isis '96 David L Dowe, Kevin B Korb, Jonathan J Oliver, 1996-07-29 This conference will explore the use of computational modelling to understand and emulate inductive processes in science The problems involved in building and using such computer models reflect methodological and foundational concerns common to a variety of academic disciplines especially statistics artificial intelligence AI and the philosophy of science This conference aims to bring together researchers from these and related fields to present new computational technologies for supporting or analysing scientific inference and to engage in collegial debate over the merits and difficulties underlying the various approaches to automating inductive and statistical inference The proceedings also include abstracts by the invited speakers J R Quinlan J J Rissanen M Minsky R J Solomonoff H Kyburg Jr

One Health: The Well-being Impacts of Human-nature Relationships Eric Brymer, Elizabeth Louise Freeman, Miles Richardson, 2019-11-07 In recent years there has been a growing body of evidence from fields such as public health architecture ecology landscape forestry psychology sport science psychiatry geography suggesting that nature enhances psychological health and wellbeing Physical activity in the presence of nature feelings of connection to nature engagement with nature specific environmental features e g therapeutic water and trees and images of real and virtual nature have all been posited as important wellbeing facilitators Thus the association between natural environments and health outcomes might be more complex than initially understood Pritchard Richardson Sheffield Karmanov Freeman Akhurst 2015 in the development of wellbeing and health outcomes Furthermore traditional theoretical notions such as Biophilia topophilia restoration theories and stress reduction theories typically used to interpret findings are also being critiqued Often one of the main barriers for practitioners is the vast array of theories that claim to effectively explain research findings but that tend to be only partially relevant e g for Physical activity or restoration focus on the characteristics of the person e g nature relatedness and only some features of the landscape e g therapeutic landscapes This special edition therefore brings together cutting edge ideas and research from a wide set of disciplines with the purpose of exploring interdisciplinary or trans disciplinary approaches to understanding the psychological health and wellbeing benefits of human nature interactions

Data Analysis and Statistics for Geography, Environmental Science, and Engineering Miguel F. Acevedo, 2012-12-07 Providing a solid foundation for twenty first century scientists and engineers Data Analysis and Statistics for Geography Environmental Science and Engineering guides readers in learning quantitative methodology including how to implement data analysis methods using open source software Given the importance of interdisciplinary work in sustainability the book brings together principles of statistics and probability multivariate analysis and spatial analysis methods applicable across a variety of science and engineering disciplines Learn How to Use a Variety of Data Analysis and Statistics Methods Based on the author s many years of teaching graduate and undergraduate students this textbook emphasizes hands on learning

Organized into two parts it allows greater flexibility using the material in various countries and types of curricula The first part covers probability random variables and inferential statistics applications of regression time series analysis and analysis of spatial point patterns The second part uses matrix algebra to address multidimensional problems After a review of matrices it delves into multiple regression dependent random processes and autoregressive time series spatial analysis using geostatistics and spatial regression discriminant analysis and a variety of multivariate analyses based on eigenvector methods Build from Fundamental Concepts to Effective Problem Solving Each chapter starts with conceptual and theoretical material to give a firm foundation in how the methods work Examples and exercises illustrate the applications and demonstrate how to go from concepts to problem solving Hands on computer sessions allow students to grasp the practical implications and learn by doing Throughout the computer examples and exercises use seeg and RcmdrPlugin seeg open source R packages developed by the author which help students acquire the skills to implement and conduct analysis and to analyze the results This self contained book offers a unified presentation of data analysis methods for more effective problem solving With clear easy to follow explanations the book helps students to develop a solid understanding of basic statistical analysis and prepares them for learning the more advanced and specialized methods they will need in their work

[European Modernism and the Information Society](#) W. Boyd Rayward, 2017-05-15

Uniting a team of international and interdisciplinary scholars, this volume considers the views of early twentieth-century European thinkers on the creation, dissemination, and management of publicly available information. Interdisciplinary in perspective, the volume reflects the nature of the thinkers discussed, including Otto Neurath, Patrick Geddes, the English Fabians, Paul Otlet, Wilhelm Ostwald, and H. G. Wells. The work also charts the interest since the latter part of the nineteenth century in finding new ways to think about and to manage the growing body of available information in order to achieve aims such as the advancement of Western civilization, the alleviation of inequalities across classes and countries, and the promotion of peaceful coexistence between nations. In doing so, the contributors provide a novel historical context for assessing widely held assumptions about today's globalized post-modern information society. This volume will interest all who are curious about the creation of a modern networked information society.
