Spaces Solving Problems Of Access To Careers In Engineering And Science:

Spaces, 1982 Develops skills in logical thinking spatial visualization estimation research and organization mathematics and career awareness in students grades 4 10 Includes activities that focus on women in professional careers *Making Schools Work for Every Child*, 2000 **Partnerships with Business and the Community**, 2001 *Annual Report for Fiscal Year ...* National Science Foundation (U.S.), 1981 **ENC Focus**, 2001 *The Alchemy of Illness* Kat Duff, 1993 Illness is a universal experience There is no privilege that can make us immune to its touch We are taught to assume health illnesses being just temporary breakdowns in the well oiled machinery of the body But illness has its own geography its own laws and commandments At a time when the attention of the whole nation is focused on health care Kat Duff inquires into the nature and function of illness itself Duff a counselor in private practice in Taos New Mexico wrote this book out of her experience with chronic fatigue syndrome but what she has to say is applicable to every illness and every one of us For those who are sick this book offers solace and recognition For those who care for them either physically or emotionally it offers inspiration and compassion Finally this fresh perspective on healing reveals how every illness is a crucible that tries our mettle tests our limits and provides us with an unparalleled opportunity to integrate its lessons into our lives *Resources for Educational Equity* Merle Froschl, Barbara Sprung, 2017-04-28 This title first published in 1988 provides a comprehensive compilation of resources to help teachers and policy makers locate the materials they need to create equitable curriculum and classroom environments While its primary focus is on girls and women *Resources for Educational Equity* takes a comprehensive approach to equity encompassing concerns of gender race and disability This title will be of interest to both students of education and to educators **Resources in Education**, 1994 *Supplementary Education* Edmund W. Gordon, Beatrice L. Bridglall, Aundra Saa Meroe, 2005 In *Supplementary Education* the editors argue that while access to schools that enable and expect academic achievement is a necessary ingredient for the education of students schools alone may not be sufficient to ensure universally high levels of academic development Supplemental educational experiences may also be needed The idea of supplementary education is based on the assumption that high academic achievement is closely associated with exposure to family and community based activities and learning experiences that occur both in and out of school in support of academic learning For low income and some ethnic minority student groups opportunities to participate in such activities are generally under resourced and underutilized in comparison to the access to and participation in such activities by many European and Asian Americans from mid to high socio economic backgrounds This book makes the case for supplementary education Specifically it focuses on the need for universal access to high levels of academic achievement and the challenge of reducing the achievement gap that exists between Asian American and European American students and their African American Latina o and Native American counterparts Having posed the problem the editors define the construct and provide in depth descriptions of some of the more colloquial expressions of supplementation in after school care youth

development and other forms of supplemental education The editors close with a discussion of the emerging institutionalization and need for more thoughtful and rigorous research of the supplementary education movement
