From White Dwarfs to Black Holes G. Srinivasan, 2000-05-15 From White Dwarfs to Black Holes chronicles the extraordinarily productive scientific career of Subrahmanyan Chandrasekhar one of the twentieth century's most distinguished astrophysicists Among Chandrasekhar's many discoveries were the critical mass that makes a star too massive to become a white dwarf and the mathematical theory of black holes In 1983 he shared the Nobel Prize for Physics for these and other achievements Over the course of more than six decades of active research Chandrasekhar investigated a dizzying array of subjects G Srinivasan notes in the preface to this book that the range of Chandra's contributions is so vast that no one person in the physics or astronomy community can undertake the task of commenting on his achievements Thus in this collection ten eminent scientists evaluate Chandrasekhar's contributions to their own fields of specialization Donald E Osterbrock closes the volume with a historical discussion of Chandrasekhar's interactions with graduate students during his more than quarter century at Yerkes Observatory Contributors are James Binney John L Friedman Norman R Lebovitz Donald E Osterbrock E N Parker Roger Penrose A R P Rau George B Rybicki E E Salpeter Bernard F Schutz and G Srinivasan

The Origin and Evolution of Galaxies J.T. Jones, J.E. Jones, 2012-12-06 The Origin and Evolution of Galaxies is the outstanding problem of modern cosmology Fortunately we have a firm cosmological framework on which to base our theories the hot big bang and recently there has been substantial progress in providing observations which potentially can constrain these theories The problem of galaxy formation is as a consequence one involving many diverse branches of physics and astrophysics It has been the aim of the school and this compendium of lectures and seminars to bring together these diverse aspects at a level enabling research workers to understand what is going on in other corners of the subject and to see how progress in each area impinges on the others We are grateful to the contributors to this volume for allowing us considerable editorial license with their articles We have attempted to provide a representative sample of the talks that were given at the school besides the texts of the invited lecturers It is regrettable that for reasons of space we have had to leave out a number of other contributions
