## **The Foundation And Structure Of Sartrean Ethics:**

Sartre's Two Ethics Thomas C. Anderson,1993 Sartre's moral thinking progressed from an abstract idealistic ethics of authenticity to a more concrete realistic and materialistic morality Much of Sartre's important unpublished work on ethics relevant to both his first and his second ethics has become available to scholars only in the years since his death Only now has it become possible to give a complete presentation of both the first and the second ethics and to accurately identify their relationship Sartre's Two Ethics also presents Professor Anderson's original criticisms of Sartre's two ethics and concludes that the second is a significant advance over the first

**Sartre Explained** David Detmer,2011-04-15 The French philosopher Jean Paul Sartre 1905-1980 was the major representative of the philosophical movement called existentialism and he remains by far the most famous philosopher worldwide of the post World War Two era This book will provide readers with all the help they will need to find their own way in Sartre's works Author David Detmer provides a clear accurate and accessible guide to Sartre's work introducing readers to all of his major theories explaining the ways in which the different strands of his thought are interrelated and offering an overview of several of his most important works Sartre was an extraordinarily versatile and prolific writer His gigantic corpus includes novels plays screenplays short stories essays on art literature and politics an autobiography several biographies of other writers and two long dense complicated systematic works of philosophy Being and Nothingness and Critique of Dialectical Reason His treatment of philosophical issues is spread out over a body of writing that many find highly intimidating because of its size diversity and complexity A distinctive feature of this book is that it is comprehensive The vast majority of books on Sartre including those that are billed as introductions to his work are highly selective in their coverage For example many of them deal only with his early writings and neglect the massive and difficult Critique of Dialectical Reason or they address only his philosophical work and ignore his novels and plays or vice versa The present book by contrast discusses works in all of Sartre's literary genres and from all phases of his career An introductory chapter provides an overview of Sartre's life and work The next chapter analyzes several of Sartre's earliest philosophical writings Each of the next six chapters is devoted to an in depth examination of a single key book Two of these chapters are devoted to philosophical works two to plays one to a biography and one to a novel These chapters also contain some discussion of other writings insofar as these are relevant to the topics under consideration there A final chapter considers important concepts and theories that are not found in the major works discussed in earlier chapters briefly introduces other important works of Sartre's and offers some final thoughts The book concludes with a short annotated bibliography with suggestions for further reading Central to all of Sartre's writing was his attempt to describe the salient features of human existence freedom responsibility the emotions relations with others work embodiment perception imagination death and so forth In this way he attempted to bring clarity and rigor to the murky realm of the subjective limiting his focus neither to the purely intellectual

side of life the world of reasoning or more broadly of thinking nor to those objective features of human life that permit of study from the outside Instead he broadened his focus so as to include the meaning of all facets of human existence Thus his work addressed in a fundamental way and primarily from the inside where Sartre's skills as a novelist and dramatist served him well the question of how an individual is related to everything that comprises his or her situation the physical world other individuals complex social collectives and the cultural world of artifacts and institutions

Sartre and the Moral Limits of War and Terrorism Jennifer Ang Mei Sze, 2010-01-31 Based on the latest debate on Jean Paul Sartre's works on ethics and politics this book examines the relevancy and importance Sartre holds for contemporary concerns the reactionary nature of terrorism the extremity of counter violence and limitations of democratization efforts in our post 9 11 era all claiming the name of freedom and liberation It presents a different version of the violent Sartre which was presented recently as militant and supportive of terrorism by critics who were concerned with the terrorist nature of his writings Sartre in this project is reconstructed as a philosopher who although gave importance to the notion of violence in his politics was actually more concerned with containing violent means within morally excusable limits He is presented as both a realist who understood the inevitability of dirty hands in political struggles and also an absolutist against terrorism he considered wars that derailed from their purported ends of freedom as morally condemnable Arguing for the need for moral limitations to all violent struggles and the need for seeing others as ends for themselves this project outlines an existential response needed to help us reaffirm our moral compass through the invention of existential humanist ethics

The Power of Consciousness and the Force of Circumstances in Sartre's Philosophy Thomas W. Busch, 1989-11-22 Displaying a masterful grasp of the texts the author shows how otherness forces itself upon the existentialist Sartre gradually constraining him to modify his understanding of consciousness as omnipotent The issue is Sartre's discovery of the social and its conceptual

Communities of Individuals Michael J. R. Cross, 2017-10-05 This title was first published in 2001 This book examines the liberal communitarian debate from a new perspective Communitarians argue

that liberal theory neglects the significance of communities for the lives of their members. An examination of that argument reveals that there are deficiencies in the communitarian account of community. Identifying and remedying those deficiencies is the key concern of this book. Uniquely, this book addresses the deficiencies using Sartre's anarchist theory derived largely but not exclusively from an interpretation of the Critique of Dialectical Reason. Sartre champions the individual yet criticises liberalism. The tension arising from these two apparently disparate positions makes for a fruitful argument enhanced by the connections made with Aristotelian and feminist theory, Hobbes and Rousseau. Finally, a method is developed for inquiring into the nature of associations which it is argued should interest communitarians concerned to avoid deficiencies in their account of community.

**The Existentialists** Charles Guignon, 2004-10-26 This volume brings together for the first time some of the most helpful and insightful essays on the four most influential and discussed philosophers in the history of existentialism: Kierkegaard, Nietzsche, Heidegger, and Sartre. The contributors write on such topics as Kierkegaard's knight of faith and his diagnosis of the present age; Nietzsche's view of morality and self-creation; Heidegger's accounts of worldhood and authenticity; and Sartre's ontology, ethics, and conception of the cogito. The essays have been selected for their higher level of scholarship and for their ability to illuminate various aspects of their subjects' work. The volume is enhanced by the editor's introduction and extensive bibliography to aid further study.

**Earthly Engagements** Matthew C. Ally, Damon Boria, 2023-03-16 Earthly Engagements: Reading Sartre after the Holocene brings together scholars from the Sartre studies community to think through the planetary ecological crisis. Edited by Matthew C. Ally and Damon Boria, the collection explores ways in which Sartre's existential thought can be read socio-ecologically, illuminating the tightly imbricated earthly and worldly crises of our post-Holocene epoch. Contributors variously discuss phenomenology, ethics, politics, ontology, and metaphysics. Earthly locations include the Icelandic coast, the Minnesota woods, the Indiana Dunes, the Chinese Great Plain, the Venetian Lagoon, and more. Worldly situations include that of the artist, the activist, the consumer, the tourist, and more. Through their diversity of methods and substantive concerns, the chapters reveal a wealth of critical and heuristic resources within Sartre's thought for thinking through and engaging the planetary ecological crisis and its direct ties to global social, economic, and political crises. In full recognition of Sartre's personal distaste for agrarian settings and wilderness and some ostensibly anti-environmental philosophical and literary moments, the contributors take the proper Sartrean line: that how we view nature and our relationship to nature is neither closed nor predetermined. Like life itself, our worldly relationship to earthly nature is rooted in the sufficiency and open-endedness of freedom.
