The Merovingians in Historiographical Tradition Yaniv Fox,2023-11-16 The Merovingian centuries were a foundational period in the historical consciousness of western Europe The memory of the first dynasty of Frankish kings their origin myths accomplishments and failures were used by generations of chroniclers propagandists and historians to justify a wide range of social and political agendas The process of

curating and editing the source material gave rise to a recognizable Merovingian narrative with three distinct phases meteoric ascent stasis and decline Already in the seventh century Chronicle of Fredegar this tripartite model was invoked by a Merovingian queen to prophesy the fate of her descendants This expert commentary sets out to understand how the story of the Merovingians was shaped through a process of continuous historiographical adaptation It examines authors from across a millennium of historical writing and analyzes their influences and objectives charting the often unexpected ways in which their narratives were received and developed

The Modern Origins of the Early Middle Ages Ian Wood, 2013-09-27 The Early Middle Ages which marked the end of the Roman Empire and the creation of the kingdoms of Western Europe was a period central to the formation of modern Europe This period has often been drawn into a series of discourses that are more concerned with the eighteenth nineteenth and twentieth centuries than with the distant past In The Modern Origins of the Early Middle Ages Ian Wood explores how Western Europeans have looked back to the Middle Ages to discover their origins and the origins of their society Using historical records and writings about the Fall of Rome and the Early Middle Ages Wood reveals how these influenced modern Europe and the way in which the continent thought about itself He asks and answers the important question why is early medieval history or indeed any pre modern history important This volume promises to add to the debate on the significance of medieval history in the modern world

One Europe, Many Nations James B. Minahan, 2000-07-30 Dominating world politics since 1945 the Cold War created a fragile peace while suppressing national groups in the Cold War s most dangerous theater Europe Today with the collapse of Communism the European Continent is again overshadowed by the specter of radical nationalism as it was at the beginning of the century Focusing on the many possible conflicts that dot the European landscape this book is the first to address the Europeans as distinct national groups not as nation states and national minorities It is an essential guide to the national groups populating the so called Old World groups that continue to dominate world headlines and present the world community with some of its most intractable conflicts While other recent reference books on Europe approach the subject of nations and nationalism from the perspective of the European Union and the nation state this book addresses the post Cold War nationalist resurgence by focusing on the most basic element of any nationalism the nation It includes entries on nearly 150 groups surveying these groups from the earliest period of their national histories to the dawn of the 21st century In short essays highlighting the political social economic and historical evolution of peoples claiming a distinct identity in an increasingly integrated continent the book provides both up to date information and historical background on the European national groups that are currently making the news and those that will produce future headlines

Strange Parallels: Volume 2, Mainland Mirrors: Europe, Japan, China, South Asia, and the Islands Victor Lieberman, 2009-10-30 Blending fine grained case studies with overarching theory this book seeks both to integrate Southeast Asia into world history and to rethink much of Eurasia s premodern past It argues that Southeast Asia Europe Japan China and South Asia all embodied

idiosyncratic versions of a Eurasian wide pattern whereby local isolates cohered to form ever larger more stable more complex political and cultural systems With accelerating force climatic commercial and military stimuli joined to produce patterns of linear cum cyclic construction that became remarkably synchronized even between regions that had no contact with one another Yet this study also distinguishes between two zones of integration one where indigenous groups remained in control and a second where agency gravitated to external conquest elites Here then is a fundamentally original view of Eurasia during a 1 000 year period that speaks to both historians of individual regions and those interested in global trends
