Jankovic, 2019-01-15 If Who am I is the question you're asking Rachel Jankovic doesn't want you to find yourself or follow your heart Those lies are nothing to the confidence, freedom, and clarity of purpose that come with knowing what is actually essential about you And the answer to that question is at once less and more than what you are hoping for Christians love the idea that self-expression is the essence of a beautiful person but that's a lie too With trademark humor and no nonsense practicality Rachel Jankovic explains the fake story of the Self starting with the inventions of a supremely ugly man named Sartre rhymes with blart And we men and women young and old have bought his lie of the Best Self with terrible results Thankfully that's not the end of our story You Who Why You Matter and How to Deal with It takes the identity question into the nitty-gritty details of everyday life Here's the first clue Stop looking inside and start planting flags of everyday

Dylan Evans, 2014-11-28 Why are more and more people believing that there is no god It sometimes feels that much of the western world is now post-religious But now the initial charge of Richard Dawkins and the new atheists has passed what does atheism really mean That is the question that Dylan Evans addresses in this thoughtful and engaging atheist manifesto Discover what values atheists share with believers Explore how can a belief that something doesn't exist can still be a belief And find out whether modern atheism is new or just a new form of an old system of values Building on the work of atheist philosophers and psychologists Dylan Evans shows how the history of atheist thought has developed and offers fresh ideas for how life has meaning from an atheist perspective      What Really Matters? Anita Torabi PhD, 2016-07-30 In this short yet fascinating book you will read about everything that is important or even critical to us turns out to be less and less important over time We do not know what really matters in our lives One day we are happy by the next we are sad or worried When we are in a specific time, place, and condition we think that certain issues are important and critical and assign them a value You alone have the right to choose the best path to a peaceful and enjoyable life You can be in any kind of position or have any level of income and be happy regardless of what goes around you If you have never given yourself time to think about your life and what you are doing this is the right time to do so This is the particular time that you can ask yourself if you are on the path that leads you to where you want to be and whether you are enjoying your life Ask yourself if you have forgotten

**Future: All That Matters** Ziauddin Sardar,2013-10-25 In Future All That Matters Ziauddin Sardar shows that thinking and speculating about the future has always been a part of human history but exploring the futures in a systematic and scientific way is a recent phenomenon What is known variously as futures studies futurology or foresight only emerged as a discipline during the last few decades The study of the future however is not only about predicting or forecasting the future which is always a perilous exercise It is also about appreciating the potentials and possibilities as well as risks and threats lurking over the horizon It can enable us both to avoid the dangers as well as shape a viable and desirable future This book explores the exciting field of futures studies and shows how knowledge of the future is acquired and put into practice We examine various methods for studying the future with the emphasis not so much on predicting specific events but on delineating alternative paths to the future We look at some celebrated readings of the future as well as case studies where exploration of the future has been used to shape policy and planning in businesses and communities international organisations and regional institutions and interest and lobby groups Finally the book suggests why and how in an increasingly complex uncertain and diverse world the study of the future can help people recover their agency and help them to create the world in which they wish to live This accessible and readable book will appeal both to students and general readers giving a fascinating introduction to thinking about the future and what matters most about it      **Facing the Future** Nuel Belnap,Michael Perloff,Ming Xu,2001-08-02 Here is an important new theory of human action a theory that assumes actions are founded on choices made by agents who face an open future It is a theory that makes indeterminism not only intelligible but illuminating Tools from philosophy of language and philosophical logic help generate a full scale account of agents seeing to it that The authors then proceed to clarify a variety of action related topics such as determinism vs indeterminism imperatives promises strategies joint agency could have done otherwise deontic constructions and assertions about a not yet settled future      **The Oxford Handbook of Food Ethics** Anne Barnhill,Mark Budolfson,Tyler Doggett,2018 Academic food ethics incorporates work from philosophy but also anthropology economics the environmental sciences and other natural sciences geography law and sociology Scholars from these fields have been producing work for decades on the food system and on ethical social and policy issues connected to the food system Yet in the last several years there has been a notable increase in philosophical work on these issues work that draws on multiple literatures within practical ethics normative ethics and political philosophy This handbook provides a sample of that philosophical work across multiple areas
