**The Future Highway Transportation System and Society** Research and Technology Coordinating Committee (U.S.),1997 The purpose of this study was to provide the Federal Highway Administration FHWA with specific research recommendations designed to develop a better understanding of a broad range of societal economic and institutional factors that affect and are affected by the nation s highway transportation system The report is organized in four chapters and six appendices *The Future Highway Transportation System and Society: Suggested Research on Impacts and Interactions* ,1997 **The Future of DOE's Automotive Research Programs** United States. Congress. House. Committee on Science,2003 Surface Transportation Environmental Research Transportation Research Board,2005-07-14 TRB Special Report 268 Surface Transportation Environmental Research A Long Term Strategy defines a broad and ambitious research program to address and inform major public policy debates about the effects of surface transportation facilities and operations on the human and natural environments The committee that conducted the study identified major gaps in knowledge that could be filled through a cooperative program of research involving federal agencies states and environmental organizations The committee recommended creation of a new cooperative research program to carry out its recommended research agenda Special Report 268 Summary *Refocusing Transportation Planning for the 21st Century* National Research Council (U.S.). Transportation Research Board,2000 Two conferences on Refocusing Transportation Planning for the 21st Century were held in 1999 following passage of the Transportation Equity Act for the 21st Century TEA 21 The first conference focused on the identification of key trends issues and general areas of research The results of Conference I which produced stand alone products were used as input for Conference II The second conference had the specific objective of producing research problem statements Its mission was to review the results of the first conference by developing these statements Conference II produced a number of detailed research statements that form the basis for the National Agenda for Transportation Planning Research The proceedings of both conferences are presented in this report

of chloride induced corrosion has attracted considerable interest all over the world Given that chloride penetrates through the concrete cover the issues concerning its transport are crucial These include testing methods prediction and the prevention of ingress During the transport process physical and chemical interaction occurs between chloride and cement hydrates which in turn affects the further transport so the transport of chloride and these interactions are closely related and underpin our understanding of chloride induced corrosion in RC structures This book provides in depth discussion of chloride transport and its interaction in cement based materials and reviews and summarizes the state of the art The mechanisms and testing methods for chloride transport chemical interactions of chloride with cement hydrates chloride binding isotherms measurement of penetration depths factors affecting chloride transport and modeling of chloride transport are discussed in detail This book serves as a reference for researchers or engineer and a textbook for graduate students **Highway**
