Carter,Kevin G. Welner,2013-04-26 Closing the Opportunity Gap offers accessible research based essays written by leading experts who highlight the disparities that exist in our public schools for the opportunity to learn instead of test scores and outcomes They focus on how policy decisions and broader circumstances conspire to cumulatively create the opportunity gap that leads inexorably to the academic achievement gaps that have become so stark      *The Fragmented Politics of Urban Preservation* Yue Zhang,2013-08-01 While urban preservation is almost as old as cities themselves it has become increasingly controversial in modern cities In this book Yue Zhang presents a cross national comparative analysis of the politics of urban preservation Based on comprehensive archival research and more than two hundred in depth interviews in Beijing Chicago

and Paris Zhang finds that urban preservation provides a tool for diverse political and social actors to frame their propositions and advance their favored courses of action In cities from West to East divergent political and economic interests have caused urban preservation to become contested Exploring three of the world s great cities Zhang deftly navigates readers through each case study illustrating the complexities of the politics of urban preservation in each city In Beijing urban preservation was integral to promoting economic growth and enhancing the city s image during the lead up to the 2008 Olympics in Chicago it is used to increase property values and revitalize neighborhoods and in Paris it offers a channel for national and municipal governments to compete for control over urban space Although urban preservation serves various purposes in these cities Zhang explains how different types of political fragmentation have affected the implementation of preservation initiatives in predictable ways thus generating distinct patterns of urban preservation A comparative urban politics study of unusual breadth The Fragmented Politics of Urban Preservation gives us insight into the complex policy process of urban preservation through which political institutions are intertwined with interests and inclinations fundamentally shaping the direction of urban development the physical forms of cities and the lives of citizens

Dilemmas of Scale in America's Federal Democracy Martha Derthick, 1999-06-13 Nationalist and local traditions vie within the American federal system and the American experiment with self government Bringing together contributions from history political science and sociology this book focuses primarily on the local seeking to recapture its origins explain its current impact and assess its worth **Whose Detroit?** Heather Ann Thompson, 2017-04-01 Thompson s engrossing book is essential for any collection on the history politics or society of post World War II America Library Journal In Whose Detroit Heather Ann Thompson focuses in detail on the African American struggles for full equality and equal justice under the law that shaped the Motor City during the 1960s and 1970s Even after Great Society liberals committed themselves to improving conditions in Detroit Thompson argues poverty and police brutality continued to plague both neighborhoods and workplaces Frustration with entrenched discrimination and the lack of meaningful remedies not only led black residents to erupt in the infamous urban uprising of 1967 but it also sparked myriad grassroots challenges to postwar liberalism in the wake of that rebellion With deft attention to the historical background and to the dramatic struggles of Detroit s residents and with a new prologue that argues for the ways in which the War on Crime and mass incarceration also devastated the Motor City over time Thompson has written a biography of an entire nation at a time of crisis **Bowling Alone: Revised and Updated**

Robert D. Putnam, 2001-08-01 Once we bowled in leagues usually after work but no longer This seemingly small phenomenon symbolizes a significant social change that Robert Putnam has identified in this brilliant volume Bowling Alone which The Economist hailed as a prodigious achievement Drawing on vast new data that reveal Americans changing behavior Putnam shows how we have become increasingly disconnected from one another and how social structures whether they be PTA church or political parties have disintegrated Until the publication of this groundbreaking work no one had so deftly

diagnosed the harm that these broken bonds have wreaked on our physical and civic health nor had anyone exalted their fundamental power in creating a society that is happy healthy and safe Like defining works from the past such as *The Lonely Crowd* and *The Affluent Society* and like the works of C Wright Mills and Betty Friedan Putnam s *Bowling Alone* has identified a central crisis at the heart of our society and suggests what we can do      *Handbook of Local Government Administration* John J. Gargan,2019-09-17 This theoretically and experientially grounded reference provides a complete overview of the principles and applications of government administration and management practices in the local public sector Written by over 25 distinguished academics and professionals with substantial experience as practitioners and consultants of administrative operations to local governments the book covers the effects of environmental conditions on local administrators and management techniques to administration in different types of local government It helps readers reduce research time by presenting advanced materials on local government administration and management in a single source      *Handbook of Local Government Administration* Gargan,1996-10-11 This theoretically and experientially grounded reference provides a complete overview of the principles and applications of government administration and management practices in the local public sector Written by over 25 distinguished academics and professionals with substantial experience as practitioners and consultants of administrative operations to local governments the book covers the effects of environmental conditions on local administrators and management techniques to administration in different types of local government It helps readers reduce research time by presenting advanced materials on local government administration and management in a single source      *Classifying by Race* Paul E. Peterson,2014-07-14 The contemporary debate over racial classification has been dominated by fringe voices in American society Cries from the right say history should be abrogated and public policy made color blind while zealots of the left insist that all customs language institutions and practices are racially tinged and that only aggressive color conscious programs can reverse the course of American history The essays in this volume however recognize that racial classification is an issue that cuts too deep and poses too many constitutional questions to be resolved by slogans of either the right or the left The contributors to this volume are James Alt Kenneth Benoit Henry Brady John Bruce Rodolfo O de la Garza Andrew Gelman Lani Guinier Fredrick C Harris Gary King Robert C Lieberman David Ian Lublin David Metz Paul E Peterson Kay Lehman Schlozman Kenneth Shepsle Theda Skocpol Katherine Tate Richard Valelly Sidney Verba and Margaret Weir Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

State and Local Government is an historic undertaking It contains a wide range of essays that define the important questions in the field evaluate where we are in answering them and set the direction and terms of discourse for future work The Handbook will have a substantial influence in defining the field for years to come The chapters critically assess both the key works of state and local politics literature and the ways in which the sub field has developed It covers the main areas of study in subnational politics by exploring the central contributions to the comparative study of institutions behavior and policy in the American context Each chapter outlines an agenda for future research

**City-County Consolidation and Its Alternatives: Reshaping the Local Government Landscape** J.B. Carr,Richard C. Feiock,2016-07-08 City country consolidation builds upon the Progressive tradition of favoring structural reform of local governments This volume looks at some important issues confronting contemporary efforts to consolidate governments and develops a theoretical approach to understanding both the motivations for pursuing consolidation and the way the rules guiding the process shape the outcome Individual chapters consider the push for city county consolidation and the current context in which such decisions are debated along with several alternatives to city county consolidation The transaction costs of city county consolidation are compared against the costs of municipal annexation inter local agreements and the use of special district governments to achieve the desired consolidation of services The final chapters compare competing perspectives for and against consolidation and put together some of the pieces of an explanatory theory of local government consolidation

**Inside the Mosaic** Eric Fong,2006-01-01 Inside the Mosaic is an essential tool for understanding the struggle faced by both the city and its new residents which will bring clarity to a subject that has historically been fraught with divergent views

Controlling Public Education Kathryn A. McDermott,1999 Most Americans believe that local school districts are the only means by which citizens may exercise control over public education Kathryn McDermott argues to the contrary that existing local institutions are no longer sufficient for achieving either equity or democratic governance Not only is local control inequitable it also fails to live up to its reputation for guaranteeing public participation and citizen influence Drawing upon democratic theory and the results of field research in New Haven Connecticut and three suburbs McDermott

contends that our educational system can be made more democratic by centralizing control over funding while decentralizing most authority over schools to the level of schools themselves while enacting public school choice controlled for racial balance To many people in Connecticut and elsewhere the tension between equal opportunity for all students and local control of public education seems impossible to resolve In 1996 the Connecticut Supreme Court ruled in *Sheff v O'Neill* that local control produces unconstitutional segregation of public schools Nearly all of the state's 169 towns operate their own public schools and like the towns they serve the schools are generally homogeneous with respect to race and socioeconomic class In the *Sheff* ruling the court declared that making school districts coterminous with town lines is the single most important factor contributing to the present concentration of racial and ethnic minorities in the Hartford public school system At the same time the court also acknowledged that the town based school system presently furthers the legitimate nonracial interests of permitting considerable local control and accountability in educational matters In Connecticut and elsewhere it has often seemed necessary to choose between local control and equity in public education and local control has almost always won McDermott argues that rather than seeing local control and equity as conflicting goals policymakers should regard them as equally important components of democracy in public education In her view a truly democratic system of education should both encourage citizen participation in school governance and contribute to the formation and maintenance of a social order in which equality of opportunity prevails over hierarchies of privilege Centralizing distribution of resources and using controlled choice to end racial isolation would provide greater equality of opportunity while decentralizing management of schools would expand citizen participation McDermott's conclusions break new ground in our understanding of local school governance itself and call into question the conventional wisdom about local participation These findings should interest those who study school governance and reform especially in an urban setting as well as policy makers administrators teachers students and citizens eager to improve their schools

**The Regional Governing Of Metropolitan America** David Miller, 2018-03-14 Economic regions competing in a global marketplace describes the future organizing principle of urban regions This emerging principle contrasts sharply with the historical notion of regions as the informal area in which geographically bounded municipalities operating in an intergovernmental framework As such we are becoming a planet of regions and some regions are moving faster to incorporate new ways of governing than others Regional Governance of Metropolitan America compares and contrasts governance strategies being adopted or are being considered in regions throughout North America These strategies find their final tests in dealing with issues such as the deep socioeconomic gulf between poor cities and affluent suburbs physical sprawl from urban growth and its environmental and social consequences and America's hesitation in creating effective systems of coordinated governance for city states Utilizing an historical review of the development of the current legal framework within which municipalities have been organized the book then examines the competing theoretical frameworks assessing what makes for a successful governance strategy in a

region 081339807x the Regional Governing of Metropolitan America     Civilizing and Decivilizing Processes Christa Buschendorf, Astrid Franke, Johannes Voetz, 2011-01-18 This volume collects new articles that explore the theoretical framework of figurational or relational sociology as represented by Norbert Elias and Pierre Bourdieu with regard to its relevance to American history culture and literature The emphasis is put on Elias s theory of the civilizing process and the question in how far his study of the European process of state formation and the correlative psycho social changes is relevant to the analysis of the development of the American nation state and the habitus of Americans Leading scholars from the field of figurational sociology team up with an international cast of renowned Americanists to shed new light on a variety of issues from the domains of social theory cultural history and literary criticism With Elias as a guide drinking and democracy in the early republic nineteenth century Indian boarding schools the fear of slave insurrections and the modern day black ghetto appear as steps in an open ended and non teleological civilizing process that weaves together changes in habitus and social structure Without stumbling into the pitfalls of an ideology of American exceptionalism the figurational approach to American studies allows the contributors of this pioneering collection to give new answers to the tenacious question of the United States peculiar characteristics Adapting Elias s analyses to US American conditions the authors provide fresh impulses for theorizing civilizing and decivilizing processes thus transforming the field of both American studies and figurational sociology The contributors are Jesse F Battan Christa Buschendorf Rachel Hope Cleves Winfried Fluck Astrid Franke Mary O Furner G nter Leypoldt Stephen Mennell Ruxandra R dulescu Kirsten Twelbeck Johannes Voelz Lo c Wacquant and Cas Wouters
