## **Soviet Natural Gas Development To 1990 The Implications For The CMEA And The West:**

Soviet Natural Gas Development to 1990 Jonathan P. Stern, 1980      **Comecon** J. J. Brine, 1992 Comecon or the Council for Mutual Economic Assistance was founded by Joseph Stalin in 1949 to counteract the Marshall Plan and reinforce the bonds between the Soviet Union and the people's democracies of Eastern Europe Other Soviet Bloc nations later joined Comecon and for forty years it dominated the trade policies of the Soviet Bloc and profoundly influenced their domestic economic development and relations with the West Comecon collapsed in 1991 after the countries of Eastern Europe rejected communism It was often compared with the West European Common Market but differed vastly in its aims structure powers and activities Its influence is a critical factor in assessing both the economic failures of the Soviet Bloc and the problems facing former member states as they make the transition to free market economies This detailed annotated bibliography is an essential guide to the extensive English language literature about Comecon from its founding until its demise Chapters cover Comecon's history structure and law socialist economic integration the organization's arrangements for international trade and finance environment natural resources and energy labor industry and agriculture science and technology Comecon like the rest of the Soviet Bloc collapsed suddenly but its legacy will color international relations and worldwide economic issues for years to come An understanding of its institutions mechanisms and policies remains vital in appreciating the economic organization of the former Soviet empire This bibliography will therefore be indispensable to policymakers economists historians and political scientists      **Natural Gas and Geopolitics** David G. Victor, Amy M. Jaffe, Mark H. Hayes, 2006-06-29 By most estimates global consumption of natural gas a cleaner burning alternative to coal and oil will double by 2030 However in North America Europe China and South and East Asia which are the areas of highest expected demand the projected consumption of gas is expected to far outstrip indigenous supplies Delivering gas from the world's major reserves to the future demand centres will require a major expansion of inter regional cross border gas transport infrastructures This book investigates the implications of this shift utilizing historical case studies as well as advanced economic modelling to examine the interplay between economic and political factors in the development of natural gas resources The contributors aim to shed light on the political challenges which may accompany a shift to a gas fed world      *Energy Abstracts for Policy Analysis*, 1984      *Energy in Soviet Policy*, 1981      *Soviet Oil and Gas Exports to the West* Jonathan P. Stern, 1987

**CAEM, Énergie, 1980-1990** North Atlantic Treaty Organization. Economics Directorate, 1981      **Cold War Energy** Jeronim Perović, 2017-02-28 This book examines the role of Soviet energy during the Cold War Based on hitherto little known documents from Western and Eastern European archives it combines the story of Soviet oil and gas with general Cold War history This volume breaks new ground by framing Soviet energy in a multi national context taking into account not only the view from Moscow but also the perspectives of communist Eastern Europe the US NATO as well as several Western European countries namely Italy France and West Germany This book challenges some of the long standing assumptions of

East West bloc relations as well as shedding new light on relations within the blocs regarding the issue of energy By bringing together a range of junior and senior historians and specialists from Europe Russia and the US this book represents a pioneering endeavour to approach the role of Soviet energy during the Cold War in transnational perspective **The Soviet Bloc, Energy, and Western Security** Jonathan B. Stein,1983 **Are Resources a Curse?** Andrea Gawrich,Anja Franke,Jana Windwehr,2010-12-20 Energy as a Curse The analysis of rentierism in Post soviet states which this book presents underscores the need for further research as rentier state concepts have mainly been applied to older rentier states like African Latin American and Arab countries An important contribution to a topical discussion During the last 30 years many resource rich countries have experienced economic and political stagnation resource curse They have developed deficient political systems in which the process of modern state formation is being undercut rentier state as well as economic structures in which sectors that provide strong incentives for the accumulation of physical and human capital are under represented Dutch disease This is very much the same in many of the post Soviet states with high resource incomes since the mid 1990s These incomes present opportunities for reducing poverty and promoting economic growth But instead of taking advantage of these opportunities many of them present authoritarian regimes with high levels of corruption low political freedom and rent seeking elites The book gives a detailed analysis of rentierism in Post soviet states **Small-State Security in the Balkans** Aurel Braun,1983-06-18 **Soviet Economy in the 1980's** ,1983 **East and West in the Energy Squeeze** C.T. Saunders,1980-06-18 *Soviet Natural Resources in the World Economy* Robert G. Jensen,Theodore Shabad,Arthur W. Wright,1983-08 Russia is a huge storehouse of natural resources including oil gas and other energy sources which she can trade with the rest of the world for advanced technology and wheat In this book leading experts evaluate the Soviet potential in major energy and industrial raw materials giving special attention to implications for the world economy to the end of the twentieth century The authors examine the mineral and forest resources that the Soviet Union has developed and may yet develop to provide exports during the 1980s They discuss the regional dimension of these resources especially in Siberia and the Soviet Far East individual mineral raw materials such as petroleum natural gas timber iron ore manganese and gold and finally the role of raw materials in Soviet foreign trade The authors representing the United States Canada and Great Britain are primarily geographers but they include economists political scientists and a geologist Their work is based on primary sources for most of these reports current information is no longer being released to researchers and on interviews with Soviet officials *Красный газ. Россия и возникновение энергетической зависимости Европы* Пер Хорселиус,2024-10-29 PDF A4 **Subject Catalog** Library of Congress,1980-04 [British Books in Print](#) ,1985 **Soviet Foreign Relations** Peter Zwick,1990 **Technology And Soviet Energy Availability** Technology Assessment Office Of,2019-09-05 Endowed with abundant energy resources the Soviet Union is the world s largest oil producer and a major exporter of both oil and gas Energy exports provide over half of Soviet hard currency

receipts and subsidized energy sales to Eastern Europe are vital tools of Soviet influence in that region. Despite this enviable position, there have been indications in the past few years that the U S S R may soon face an energy shortage. In addition to examining the significance of U S petroleum equipment and technology for Soviet energy development, this book addresses the following questions: First, what opportunities and problems confront the U S S R in its five primary energy industries: oil, gas, coal, nuclear, and electric power, and what are plausible prospects for these industries in the present decade? Second, what equipment and technology are most needed by the U S S R in these areas, how much of each has been or is likely to be purchased from the West, and to what extent is the United States the sole or preferred supplier? Third, and perhaps most critical, how much difference could the West as a whole or the United States alone make to Soviet energy availability by 1990, and what are the implications of either providing or withholding such assistance for both the entire Soviet bloc and for the West.
