Space In The Roman World Its Perception And Presentation:

Space and Society in the Greek and Roman Worlds Michael Scott, 2013 An interdisciplinary study of the dynamic relationship between space and society through case studies across the ancient Greek and Roman worlds Space in the Roman World Richard J. A. Talbert, Kai Brodersen, 2004 How was space perceived and presented in the Roman world While it is tempting to assume that any modern historical atlas with its maps of the world as the Romans saw it gives a sufficient answer to these questions recent research has suggested that the issue is more complex than this To follow up such questions in more detail the five original contributions to this volume by leading experts from Britain Germany the United States and Switzerland discuss the tradition of scientific geography Roman itinerary literature and the Tabula Peutingeriana

Latin Elegy and the Space of Empire Sara H. Lindheim, 2021 This book explores the ways in which Latin poets of the late Republic and the Augustan Age participate in a new cultural preoccupation with the dramatically expanding geographical space of empire Space, Time and Language in Plutarch Aristoula Georgiadou, Katerina Oikonomopoulou, 2017-10-10 Space and time have been key concepts of investigation in the humanities in recent years In the field of Classics in particular they have led to the fresh appraisal of genres such as epic historiography the novel and biography by enabling a close focus on how ancient texts invest their representations of space and time with a variety of symbolic and cultural meanings This collection of essays by a team of international scholars seeks to make a contribution to this rich interdisciplinary field by exploring how space and time are perceived linguistically codified and portrayed in the biographical and philosophical work of Plutarch of Chaeronea 1st 2nd centuries CE The volume's aim is to show how philological approaches in conjunction with socio cultural readings can shed light on Plutarch's spatial terminology and clarify his conceptions of time especially in terms of the ways in which he situates himself in his era's fascination with the past The volume's intended readership includes Classicists intellectual and cultural historians and scholars whose field of expertise embraces theoretical study of space and time along with the linguistic strategies used to portray them in literary or historical texts **Rome's World** Richard J. A. Talbert, 2010-08-16 A long overdue reinterpretation and appreciation of the Peutinger Map as a masterpiece both of mapmaking and imperial Roman ideology *The Journey of Theophanes* John Matthews, 2006-01-01 At the outset of the twentieth century malaria was Italy's major public health problem It was the cause of low productivity poverty and economic backwardness while it also stunted literacy limited political participation and undermined the army In this book Frank Snowden recounts how Italy became the world centre for the development of malariology as a medical discipline and launched the first national campaign to eradicate the disease Snowden traces the early advances the setbacks of world wars and Fascist dictatorship and the final victory against malaria after World War II He shows how the medical and teaching professions helped educate people in their own self defence and in the process expanded trade unionism women's consciousness and civil liberties He also discusses the antimalarial effort under Mussolini's regime and reveals the shocking

details of the German army's intentional release of malaria among Italian civilians the first and only known example of bioterror in twentieth century Europe Comprehensive and enlightening this history offers important lessons for today's global malaria emergency *Sociological Studies in Roman History* Keith Hopkins, 2018 Collected essays by Cambridge sociologist Keith Hopkins one of the most radical innovative and influential Roman historians of his generation

Homer to Dante It argues that the topography of the Afterlife in Greek and Roman tradition and in Dante reflects the state of scientific knowledge at the time of the various contexts in which we find it and the landscape of the Other World is a way of exploring and assimilating the shape of this world This book posits that there is a dominant spatial idiom in afterlife landscapes which I call the Journey Vision paradigm By this the author means the presence of two kinds of space in afterlife representations the horizontal journey of the soul across the afterlife landscape and a synoptic vision of the universe This has in studies of individual texts often been characterised as an inconsistency or anomaly many scholars have argued that the Vision of the universe is out of place in the underworld landscape However when one looks across the entire tradition one finds that afterlife landscapes almost without exception contain these two kinds of space in one form or another The function of this double vision of space the Journey Vision paradigm is the book argues an attempt to harmonise the underworld as the landscape of the soul with the scientific universe and to understand humanity in terms of the cosmos and vice versa
