Spaces Between Buildings:

The Spaces Between Buildings Larry Ford, 2000-08 Three photographic essays offer a study of the neglected nooks and crannies between structures from gates and fences to sidewalks alleys and parking lots In his exploration of how spaces become places geographer Ford invites readers to see anew the spaces they encounter every day and often take for granted 52 halftones

Life Between Buildings Jan Gehl, 2011-01-17 The first Danish language version of this book published in 1971 was very much a protest against the functionalistic principles for planning cities and residential areas that prevailed during that period The book carried an appeal to show concern for the people who were to move about between buildings and it urged an understanding of the subtle almost indefinable but definite qualities which have always related to the interaction of people in public spaces and it pointed to the life between buildings as a dimension of architecture that needs to be carefully treated Now 40 years later many architectural trends and ideologies have passed by over the years These intervening years have also shown that the liveliness and liveability of cities and residential areas continues to be a important issue The intensity in which fine public spaces are used at this point in time as well as the greatly increased general interest in the quality of cities and their public spaces emphasises this point The character of life between buildings changes with changes in any given social context but the essential principles and quality criteria to be employed when working with life between buildings has proven to be remarkably constant Though this work over the years has been updated and revised several times this version bears little resemblance with the very early versions however there was no reason to change the basic message Take good care of the life between your buildings

Beazley's Design and Detail of the Space between Buildings A. Pinder, 2003-09-02 A new edition of a book widely regarded as a classic of landscape architecture it deals with the bits that go in between the different parts of the urban landscape A completely updated text makes it suitable for both the professional and student

Life Between Buildings Jan Gehl, 2011 Life Between Buildings is Jan Gehl's classic text on the importance of designing urban public space with the fundamental desires of people as guiding principles The book describes essential elements that contribute to people's enjoyment of spaces in the public realm These elements remain remarkably constant even as architectural styles go in and out of fashion and the character of the life between buildings changes

Spatial analysis and social spaces Eleftheria Paliou, Undine Lieberwirth, Silvia Polla, 2014-04-01 In the past decade a range of formal spatial analysis methods has been developed for the study of human engagement experience and socialisation within the built environment Many although not all of these emanate from the fields of architectural and urban studies and draw upon social theories of space that lay emphasis on the role of visibility movement and accessibility in the built environment These approaches are now gaining in popularity among researchers of prehistoric and historic built spaces and are given increasingly more weight in the interpretation of past urban environments Spatial Analysis and Social Spaces brings together contributions from specialists in archaeology social theory and urban planning who explore the theoretical

and methodological frameworks associated with the application of new and established spatial analysis methods in past built environments The focus is mainly on more recent computer based approaches and on techniques such as access analysis visibility graph analysis isovist analysis agent based models of pedestrian movement and 3D visibility approaches The contributors to this volume examine the relationship between space and social life from many different perspectives and provide illuminating examples from the archaeology of Greece Italy and Cyprus in which intra site analysis offers valuable insights into the built spaces and societies under study

Building Automation and Digital Technologies Shahryar Habibi, 2022-03-17 Building automation systems and digital technologies are highly relevant for the environmental and energy performance of buildings However a clear gap remains between architectural engineering and the use of such technologies Building Automation and Digital Technologies shows how to assimilate automation and digital technologies into making buildings smarter and more environmentally sustainable This book shows why architects need smart and digital systems in building design and construction and promotes innovative technological tools for improving sustainability It focuses on the development of automated environmental conditions and how new technology informs architectural engineering The book also provides new evidence on the impact of building automation systems and digital technologies such as the Internet of Things artificial intelligence and information and communication technology for developing a performance based approach to the environmental sustainability of buildings and provides a key reference for architects on how digital technology can inform their practice Its four chapters cover developing strategies for improving sustainable and smart buildings architectural practice and construction technology creativity and innovation in building automation systems and the use phase of buildings Building Automation and Digital Technologies meets a critical need for a sustainable and smart built environment from an architectural perspective providing an important reference to architects and professionals in related fields by demonstrating the assimilation of the latest information and automation technologies Puts forward an architectural perspective on the design and construction of smart sustainable buildings Presents the use of digital technologies for design and construction Bridges the gap between architectural engineering and the use of automation and digital technology Considers the development of automated environmental conditions and new technology

and new urban development and the new edition is focused on best sustainable design and practice

Public Places Urban Spaces is a must have purchase for those on urban design courses and for professionals who want to update and refresh their knowledge

Whose Public Space? Ali Madanipour, 2010-01-21 Public spaces mirror the complexities of urban societies as historic social bonds have weakened and cities have become collections of individuals public open spaces have also changed from being embedded in the social fabric of the city to being a part of more impersonal and fragmented urban environments Can making public spaces help overcome this fragmentation where accessible spaces are created through inclusive processes This book offers some answers to this question through analysing the process of urban design and development in international case studies in which the changing character level of accessibility and the tensions of making public spaces are explored The book uses a coherent theoretical outlook to investigate a series of case studies crossing the cultural divides to examine the similarities and differences of public space in different urban contexts and its critical analysis of the process of development management and use of public space with all its tensions and conflicts While each case study investigates the specificities of a particular city the book outlines some general themes in global urban processes It shows how public spaces are a key theme in urban design and development everywhere how they are appreciated and used by the people of these cities but also being contested by and under pressure from different stakeholders

The City as Architecture Sophie Wolfrum, Alban Janson, 2019-04-01 Architecture creates complex spatial situations that are the subject of urban design Design uses a repertoire of specific architectural means in a creative way resulting in cities that can be lived in and perceived in their three dimensional experience The current book an extended new edition of *Architecture of the City* 2016 describes the repertoire with which architecture and design regain an entry to urbanistics It pleads for an architectonic turn in urbanistics a demand to finally comprehend the city architecturally the issue is not just about buildings in the city but about architecture of the city as a whole as is clearly expressed in the new title of *City as Architecture*

Development Control Keith Thomas, 2013-09-13 *Development Control* is a comprehensive introductory text for students of planning and related subjects Drawing widely on the literature the approach and treatment are very much geared to the needs of students on courses rather than focusing on practical and how to do it issues It should be of interest to students in schools of planning the built environment estate management land economy and other related subjects

Cost of Accessible Housing, 1993

Modern Structural Design Andrew Watts, 2022-08-22 Newer buildings often have complex geometries They require ample structural implementation of the architectural design which is often costlier than it should be The right expertise is needed in order to choose a construction approach that is safe yet economical and fully adequate to the design demands In a continuation of *Modern Construction Case Studies* which focused on complex preliminary design *Modern Structural Design* presents illustrative case studies of how complex innovative construction systems have been successfully implemented They are presented with the aid of texts drawings and 3D renderings

Archaeology of Households, Kinship, and Social Change Lacey B. Carpenter,Anna Marie Prentiss,2021-11-24 Archaeology of Households Kinship and Social Change offers new perspectives on the processes of social change from the standpoint of household archaeology This volume develops new theoretical and methodological approaches to the archaeology of households pursuing three critical themes household diversity in human residential communities with and without archaeologically identifiable houses interactions within and between households that explicitly considers impacts of kin and non kin relationships and lastly change as a process that involves the choices made by members of households in the context of larger societal constraints Encompassing these themes authors explore the role of social ties and their material manifestations within the house dwelling or other constructed space how the household relates to other social units how households consolidate power and control over resources and how these changes manifest at multiple scales The case studies presented in this volume have broader implications for understanding the drivers of change the ways households create the contexts for change and how households serve as spaces for invention reaction and or resistance Understanding the nature of relationships within households is necessary for a more complete understanding of communities and regions as these ties are vital to explaining how and why societies change Taking a comparative outlook with case studies from around the world this volume will inform

students and professionals researching household archaeology and be of interest to other disciplines concerned with the relationship between social networks and societal change Enhancing Building Performance Shauna

Mallory-Hill, Wolfgang F. E. Preiser, Christopher G. Watson, 2012-03-05 Building Performance Evaluation BPE informs and enhances the usability and sustainability of building designs with lessons learned from evaluation of building performance throughout the building life cycle from initial planning through occupancy to adaptive re use A key feature of BPE is that it examines design and technical performance of buildings alongside human performance criteria That is it seeks to examine facilities in order to determine whether they will work for the people that will use and occupy them Rigorous BPE helps to improve design practice by providing feedback on the effectiveness of the choices made about the building to ensure that its design is optimised for stakeholders uses The overarching theme for Enhancing Building Performance is to present the next generation of BPE work The book provides an updated systematic approach for BPE as well as chapters written by experts from around the world who demonstrate how to apply BPE to enhance building design Topics covered include evidence based and integrative design processes evaluation methods and tools and education and knowledge transfer In addition case studies provide specific examples of how BPE has been used to study such things as the impact of workplace design on human productivity and innovation Written primarily for design professionals and facility managers who wish to use BPE to deliver improved building performance that is responsive to the needs of stakeholders Enhancing Building Performance will also be of great value to researchers and students across a range of architecture and construction disciplines **American**
