Behavioral Neuroscientists study the behavior of animals and humans and the neurobiological and physiological processes that control it. Behavior is the ultimate function of the nervous system and the study of it is very multidisciplinary. Disorders of behavior in humans touch millions of people's lives significantly and it is of paramount importance to understand pathological conditions such as addictions, anxiety, depression, schizophrenia, autism, among others in order to be able to develop new treatment possibilities. Encyclopedia of Behavioral Neuroscience is the first and only multi-volume reference to comprehensively cover the foundation knowledge in the field. This three-volume work is edited by world-renowned behavioral neuroscientists George F. Koob, The Scripps Research Institute; Michel Le Moal, Université Bordeaux; and Richard F. Thompson, University of Southern California, and written by a premier selection of the leading scientists in their respective fields. Each section is edited by a specialist in the relevant area. The important research in all areas of Behavioral Neuroscience is covered in a total of 210 chapters on topics ranging from neuroethology and learning and memory to behavioral disorders and psychiatric diseases. The only comprehensive Encyclopedia of Behavioral Neuroscience on the market. Addresses all recent advances in the field. Written and edited by an international group of leading researchers truly representative of the behavioral neuroscience community. Includes many entries on the advances in our knowledge of the neurobiological basis of complex behavioral, psychiatric, and neurological disorders. Richly illustrated in full color. Extensively cross-referenced to serve as the go-to reference for students and researchers alike. The online version features full searching, navigation, and linking functionality. An essential resource for libraries serving neuroscientists, psychologists, neuropharmacologists, and psychiatrists.

Abraham Lincoln and the Forge of National Memory Barry Schwartz, 2000-07 Abraham Lincoln has long dominated the pantheon of American presidents. From his lavish memorial in Washington and immortalization on Mount Rushmore, one might assume he was a national hero rather than a controversial president who came close to losing his 1864 bid for reelection. In *Abraham Lincoln and the Forge of National Memory*, Barry Schwartz aims at these contradictions in his study of Lincoln's reputation from the president's death through the industrial revolution to his apotheosis during the Progressive Era and First World War. Schwartz draws on a wide array of materials: painting and sculpture, popular magazines and school textbooks, newspapers and oratory to examine the role that Lincoln's memory has played in American life. He explains, for example, how dramatic funeral rites elevated Lincoln's reputation even while funeral eulogists questioned his presidential actions and how his reputation diminished and grew over the next four decades. Schwartz links transformations of Lincoln's image to changes in the society. Commemorating Lincoln helped Americans to think about their country's development from a rural republic to an industrial democracy and to articulate the way economic and political reform, military power, ethnic and race relations, and nationalism enhanced their conception of themselves as one people. Lincoln's memory assumed a double aspect of mirror and lamp, acting at once as a reflection of the nation's concerns and an illumination of its ideals. Schwartz offers a fascinating view of these two functions as they were realized in the commemorative symbols of an ever-widening circle of ethnic, religious, political, and regional communities. The first part of a study that will continue through the present, *Abraham Lincoln and the Forge of National Memory* is the story of how America has shaped its past selectively and imaginatively around images rooted in a real person whose character and achievements helped shape his country's future.
