Spatiotemporal Databases:

Spatio-Temporal Databases Rita de Caluwe, Guy De Tré, Gloria Bordogna, 2013-04-17 Spatio Temporal Databases explores recent trends in flexible querying and reasoning about time and space related information in databases It shows how flexible querying enhances standard querying expressiveness in many different ways with the aim of facilitating extraction of relevant data and information Flexible spatial and temporal reasoning denotes qualitative reasoning about dynamic changes in the spatial domain characterized by imprecision or uncertainty or both Many of the contributions focus on GIS while some others are more general or focus on related application fields presenting theoretical viewpoints and techniques that are inspiring or can be adapted for GIS The first part bundles the contributions on advances at the theoretical level also discussing examples and opening further perspectives The second part presents contributions on well developed applications The authors explain how to handle imprecision and uncertainty demonstrating how advanced techniques can help to solve diverse problems related to GIS

scientists and geographers working with spatial databases *Advances in Spatial and Temporal Databases* Christian S. Jensen, Markus Schneider, Bernhard Seeger, Vassilis J. Tsotras, 2003-05-15 The Seventh International Symposium on Spatial and Temporal Databases SSTD 2001 held in Redondo Beach CA USA July 12 15 2001 brought together leading researchers and developers in the area of spatial temporal and spatio temporal databases to discuss the state of the art in spatial and temporal data management and applications and to understand the challenges and search directions in the advancing area of data management for moving objects The symposium served as a forum for disseminating research in spatial and temporal data management and for maximizing the interchange of knowledge among researchers from the established spatial and temporal database communities The exchange of research ideas and results not only contributes to the academic arena but also benefits the user and commercial communities SSTD 2001 was the seventh in the series of symposia that started in Santa Barbara a dozen years ago and has since been held every two years in Zurich Singapore Portland Maine Berlin and Hong Kong By 1999 the series had become well established as the premier international forum devoted solely to spatial database management and it was decided to extend the scope of the series to also cover temporal database management This extended scope was chosen due in part to the increasing importance of research that considers spatial and temporal aspects jointly Advances in Spatial Databases Ralf H. Güting, Dimitris Papadias, Fred Lochovsky, 2003-05-21 This book constitutes the refereed proceedings of the 6th International Symposium on Spatial Databases SSD 99 held in Hong Kong China in July 1999 The 17 revised full papers presented were carefully selected from 55 submissions Also included are short papers corresponding to three invited talks and industrial applications presentations The papers are organized in chapters on multi resolution and scale indexing moving objects and spatio temporal data spatial mining and classification spatial join uncertainty and geological hypermaps and industrial and visionary application track *Advances in Spatial and Temporal Databases* Dieter Pfoser, Yufei Tao, Kyriakos Mouratidis, Mario Nascimento, Mohamed Mokbel, Shashi Shekhar, YAN HUANG, 2011-07-28 This volume constitutes the refereed proceedings of the 12th International Symposium on Spatial and Temporal Databases SSTD 2011 held in Minneapolis USA in August 2011 The 24 revised full papers presented together with one keynote 8 short papers and 8 demonstration papers were thoroughly reviewed and selected from a total of 63 research submissions 21 vision and challenges submissions and 16 demonstration submissions The papers are organized in topical sections on knowledge discovery spatial networks access methods moving objects and sensor networks multidimensional query processing and temporal and streaming data *Advances in Spatial Databases* Michel Scholl, 1997-07-02 Content Description Includes bibliographical references and index **Constraint Databases and Applications** Bart Kuijpers, Peter Revesz, 2004-10-14 The first International Symposium on the Applications of Constraint Databases CDB2004 took place in Paris France on June 12 13 2004 just before the ACM SIGMOD and PODS conferences Since the publication of the paper Constraint Query Languages by Kanakis Kuper and Revesz in 1990 the last decade has seen a growing interest in constraint

database theory query evaluation and applications reflected in a variety of conferences journals and books Constraint databases have proven to be extremely flexible and adoptable in environments that relational database systems cannot serve well such as geographic information systems and bioinformatics This symposium brought together people from several diverse areas all contributing to the practice and the application of constraint databases It was a continuation and extension of previous workshops held in Friedrichshafen Germany 1995 Cambridge USA 1996 Delphi Greece 1997 and Seattle USA 1998 as well as of the work in the comprehensive volume Constraint Databases edited by G Kuper L Libkin and J Paredaens 2000 and the textbook Introduction to Constraint Databases by P Revesz 2002 The aim of the symposium was to open new and future directions in constraint database research to address constraints over domains other than the reals to contribute to a better implementation of constraint database systems in particular of query evaluation to address efficient quantifier elimination and to describe applications of constraint databases

Advances in Spatial and Temporal Databases Thanasis Hadzilacos,Yannis Manolopoulos,John F. Roddick,Yannis Theodoridis,2003-10-23 The refereed proceedings of the 8th International Symposium on Spatial and Temporal Databases SSTD 2003 held at Santorini Island Greece in July 2003 The 28 revised full papers presented together with a keynote paper were carefully reviewed and selected from 105 submissions The papers are organized in topical sections on access methods advanced query processing data mining and data warehousing distance based queries mobility and moving points management modeling and languages similarity processing systems and implementation issues

Introduction to Constraint Databases Peter Revesz, 2006-04-18 Differing from other books on the subject this one uses the framework of constraint databases to provide a natural and powerful generalization of relational databases An important theme running through the text is showing how relational databases can smoothly develop into constraint databases without sacrificing any of the benefits of relational databases whilst gaining new advantages Peter Revesz begins by discussing data models and how queries may be addressed to them From here he develops the theory of relational and constraint databases including Datalog and the relational calculus concluding with three sample constraint database systems DISCO DINGO and RATHER Advanced undergraduates and graduates in computer science will find this a clear introduction to the subject while professionals and researchers will appreciate this novel perspective on their subject

Fuzzy Spatiotemporal XML Data Management Luyi Bai, Lin Zhu, 2025-02-25 Spatiotemporal data is not always precise and fuzziness in spatiotemporal data is usually accepted because of the way the world is measured and represented Although eXtensible Markup Language XML recommended by the World Wide Web Consortium W3C has become the de facto standard for data representation and exchange on the Web an edited collection of fuzzy spatiotemporal XML data management studies
