 MARIJANE OSBORN PHILIP G RUSCHE TERENCE SCULLY ALAIN TOUWAIDE LINDA EHRSAM VOIGTS *The Oxford Handbook of Galen* P. N. Singer, Peter N. Singer, Ralph Mark Rosen, 2024 The Oxford Handbook of Galen provides a comprehensive overview of the life work and legacy of Galen 129 c 216 CE arguably the most important medical figure of the Graeco Roman world It contains essays by thirty leading experts on Galen s life and background his medical theories his therapeutic and clinical practices and his philosophical contributions in the areas of logic epistemology causation scientific method and ethics The authors also discuss the most important pathways of the transmission of his texts and his intellectual legacy from late antiquity to early modern times and from western Europe to Tibet and China *Pharmacy and Drug Lore in Antiquity* John Scarborough, 2024-12-11 Professor Scarborough brings together here fourteen of his essays on ancient drugs and pharmacy dealing with aspects of a pharmacology and medical botany that incorporate magic astrology and alchemy as well as the expected theoretical constructs of elements qualities and humors Clinical application of salves for burns was a skill of long standing as one essay demonstrates and another suggests Hippocratic pharmacology s sophistication as does consideration of the herbal lore in Theophrastus remarkable Enquiry into Plants A major concern among Greek Roman and Byzantine medical practitioners was toxicology and the fundamental collection of data on poisonous plants and animals and two studies take up snakes spiders insects and related creatures with suggested antidotes in the difficult poems of Nicander of Colophon while another focuses on Dioscorides perceptive analysis of the effects of the opium poppy Aloe in the drug commerce of the early Roman Empire is considered along with the life and career of Criton a personal physician to Trajan and some of Galen s pharmacology as reflected in his commentaries on Hippocrates The collection concludes with two studies that explicate early Byzantine pharmacology and how garden lore in Byzantine times contributed to practical pharmacy **Phrenitis and the Pathology of the Mind in Western Medical Thought** Chiara Thumiger, 2023-11-30 The first full history of a disease which originated in ancient Greece and has ramifications for contemporary ideas about insanity **Galen and the Arabic Reception of Plato's Timaeus** Aileen R. Das, 2020-11-12 This first full length study of the Arabic reception of Plato s Timaeus considers the role of Galen of Pergamum 129 c 216 CE in shaping medieval perceptions of the text as transgressing disciplinary norms It argues that Galen appealed to the entangled cosmological scheme of the dialogue where different relations connect the body soul and cosmos to expand the boundaries of medicine in his pursuit for epistemic authority the right to define and explain natural reality Aileen Das situates Galen s work on disciplinary boundaries in the context of medicine s ancient rivalry with philosophy whose professionals were long seen as superior knowers of the cosmos vis vis doctors Her case studies show how Galen and four of the most important Christian Muslim and Jewish thinkers in the Arabic Middle Ages creatively interpreted key doctrines from the Timaeus to reimagine medicine and philosophy as well as their own intellectual identities **Inference from Signs** James Allen, James V. Allen, 2001 James Allen presents an original

and penetrating investigation of the notion of inference from signs which played a central role in ancient philosophical and scientific method Inference from Signs examines an important chapter in ancient epistemology the debates about the nature of evidence and of the inferences based on it or signs and sign inferences as they were called in antiquity Special attention is paid to three main issues Firstly the relation between sign inference and explanation At a minimum sign inferences permit us to draw a new conclusion and they are used in this way in every sphere of life But inferences must do more than this if they are to play the parts assigned to them by natural philosophers and medical theorists who appeal to signs to support the theories they put forward to explain the phenomena in their domains Allen examines the efforts made by Aristotle the Stoics the Epicureans and in medicine to discover what further conditions must be satisfied by inferences if they are to advance explanatory purposes To speak of inference from signs presupposes that the use of signs is a form of reasoning from grounds to a conclusion However an alternative nonrational conception is explored according to which the use of signs depends instead on acquired dispositions to be reminded by one thing of another This view is traced to its probable origin in the Empirical school of medicine whence it was taken by Pyrrhonian sceptics who introduced it into philosophy Evidence sometimes supports conclusive arguments but at other times it only makes a conclusion probable Allen investigates Aristotle's path breaking attempt to erect standards by which to evaluate non conclusive but in Aristotelian terms reputable inferences Inference from Signs fills an important gap in the histories of science and philosophy and provides the first comprehensive treatment of this topic
