International Relations Robert G. Gilpin,2016-03-30 After the end of World War II the United States by far the dominant economic and military power at that time joined with the surviving capitalist democracies to create an unprecedented institutional framework By the 1980s many contended that these institutions the General Agreement on Tariffs and Trade

now the World Trade Organization the World Bank and the International Monetary Fund were threatened by growing economic nationalism in the United States as demonstrated by increased trade protection and growing budget deficits In this book Robert Gilpin argues that American power had been essential for establishing these institutions and waning American support threatened the basis of postwar cooperation and the great prosperity of the period For Gilpin a great power such as the United States is essential to fostering international cooperation Exploring the relationship between politics and economics first highlighted by Adam Smith Karl Marx and other thinkers of the eighteenth and nineteenth centuries Gilpin demonstrated the close ties between politics and economics in international relations outlining the key role played by the creative use of power in the support of an institutional framework that created a world economy Gilpin's exposition of the influence of politics on the international economy was a model of clarity making the book the centerpiece of many courses in international political economy At the beginning of the twenty first century when American support for international cooperation is once again in question Gilpin's warnings about the risks of American unilateralism sound ever clearer

International Political Economy in China Gregory Chin, Margaret Pearson, Wang Yong, 2017-10-02 This book examines the evolution of international political economy IPE as a field of study in China detailing the evolving boundaries and the content of the field It surveys how the key themes in IPE such as the conceptualization of power at the global level the question of international order and international organization the state and globalization money and finance and the source of ideas and ideational innovation have been debated in Chinese IPE in comparison to the foundational works of the West The contributions map the genesis of the field inside China and the core characteristics of Chinese IPE consider the limits of the development of the field in China and identify the contributions which Chinese IPE can make to the global development of IPE Each piece in this collection is co authored by a prominent PRC scholar residing in China and a distinguished foreign scholar The co authors together highlight what they think are the core Chinese concerns of IPE in a particular area and suggest what this understanding adds to the global discussion This book was originally published as a special issue of the Review of International Political Economy

Susan Strange and the Future of Global Political Economy Randall Germain, 2016-04-28 This edited volume addresses the 2007 2009 financial crisis as the occasion to engage critically with the corpus of Susan Strange's work in order to consider what changes if any this crisis portends for the structural organization of the global political economy The contributors use Strange's rich conceptual framework to explore the financial crisis and its aftermath and reflect critically on the broader contributions which her work has made to the discipline of IPE The volume makes three valuable contributions for scholars and students First it raises the profile of Susan Strange a unique and powerful contributor to the field of IPE whose ideas matter to our current circumstance and can provide deep and enduring insights into important questions and issues Secondly each contributor to this volume combines her work and ideas with that of other traditions or individual theorists in ways that extend and or deepen Strange's own efforts Finally this volume leaves

us with a judicious optimism about the future of both IPE and the world as it actually is on the ground This book will be of interest to scholars and students who are interested in the dynamics shaping contemporary and future developments in the global political economy as well as those who are interested in the theoretical debates about how to study IPE

International Political Economy Nicola Phillips, Catherine Weaver, 2010-10-04 Essential reading for anyone interested in the cutting edge debates in contemporary international political economy IPE this book features contributions from the most influential scholars in the field from North America Canada and the UK who debate the most important issues in IPE

The Future of International Relations Iver B. Neumann, Ole Waever, 2005-06-29 This book presents the state of the art of international relations theory through an analysis of the work of twelve key contemporary thinkers John Vincent Kenneth Waltz Robert O Keohane Robert Gilpin Bertrand Badie John Ruggie Hayward Alker Nicholas G Onuf Alexander Wendt Jean Bethke Elshtain R B J Walker and James Der Derian The authors aim to break with the usual procedure in the field which juxtaposes aspects of the work of contemporary theorists with others presenting them as part of a disembodied school of thought or paradigm A more individual focus can demonstrate instead the well rounded character of some of the leading oeuvres and can thus offer a more representative view of the discipline This book is designed to cover the work of theorists whom students of international relations will read and sometimes struggle with The essays can be read either as introductions to the work of these theorists or as companions to it Each chapter attempts to place the thinker in the landscape of the discipline to identify how they go about studying International Relations and to discuss what others can learn from them
