Blended Learning. Sustainable and Flexible Smart Learning Will W. K. Ma, Simon S. K. Cheung, Chen Li, Praewpran Prayadsab, Anan Mungwattana, 2025-07-25 This book constitutes the refereed proceedings of the 18th International Conference on Blended Learning ICBL 2025 held in Bangkok Thailand during July 22-25 2025. The 24 full papers included in this book were carefully reviewed and selected from 60 submissions. They were organized in topical sections as follows: Keynotes; AI and Robotics in Education; Innovative Teaching Methods in Blended Learning; Pedagogical Strategies and Student Engagement; Evaluation and Feedback in Blended Learning; Data Driven Learning Analytics and Context Aware Systems. *Resources in Education*, 2000-10. *Sustainable Career Development in the Turbulent, Boundaryless and Internet Age*. Shih-Chih Chen, Yongrok Choi, Athapol Ruangkanjanases, Yin Ma, 2024-07-22 With the impact of globalization and intensification of information technology the ideas and practices of enterprise management are also changing rapidly nowadays. A practice that was incompletely unheard of yesterday may soon become a model for everyone to learn from tomorrow. The development of information technology has blurred the boundaries between work and non work and employees today have more options to work from home. At the same time the family structure has also become more diversified with different types of income structures bringing many possibilities for work and family care models. In addition the government's social policies such as school to work transitional regulations and the extended retirement age suggest that people today may face a quite different labor market situation compared to other generations. As individuals are facing longer and more complicated working life it is very important to ensure their long term employability by creating a healthy and successful career. *Research on Teaching Strategies and Skills in Different Educational Stages*. Pedro Gil-Madróna, Linda Saraiva, Luisa Losada-Puente, 2025-03-19 The teaching practice becomes a reciprocal activity in the classroom when teachers apply their creativity and their knowledge resulting from research and scientific evidence in the didactic teaching process with the purpose of strengthening in the students the key competencies of their training turning students at the core of the didactic process. Teaching strategies must be articulated from previous research and planning and designed sequentially to promote real and interesting learning scenarios and thereby achieve significant learning. From this perspective of teaching learning strategies the reciprocal interaction between the student and the teacher becomes the focus of attention with a playful motivating interesting and rewarding approach for the learner. The role of the teacher is conceived as fundamental in the teaching process to achieve the link between teaching learning and evaluation strategies. For this reason multidisciplinary studies are welcome from all stages of the educational system with quantitative qualitative and mixed approaches and reviews promoting good teaching practices of reflection and innovation from these studies. **Face2face Upper Intermediate Teacher's Book with DVD** Chris Redston, Theresa Clementson, Gillie Cunningham, 2013-03-07 Face2face Second edition is the flexible easy to teach course for busy teachers who want to get their adult and young adult
