Dimensions of Madness Robert L. Gallon,2015-11-03 In a book that reframes the mental health debate Robert L Gallon challenges the widely held notion that mental disorders are medical diseases Drawing on his extensive experience as a psychologist who has worked with thousands of patients he argues that there are no objective indicators of mental disorders and therefore no way of drawing a distinct line between people who have them and people who don t He outlines an alternative to the disease model defined by nine dimensions of dysfunction that encompass the range of human dysfunctions typically classified as mental disorders He explains the origin of these problems not as chemical imbalances and genetic abnormalities but as the complex interaction of biological psychological and social factors called the Biopsychosocial model Gallon explains the history of psychiatry and how it came to develop a medical model that codifies mental disorders in the psychiatric bible the Diagnostic and Statistical Manual of Mental Disorders DSM now in its fifth edition He demonstrates how in 1950s and 1960s when the miracle psychiatric drugs came on the market it was to the great economic advantage of both pharmaceutical companies and psychiatrists to describe people s problems in the language of medicine His alternative to this disease model suggests descriptive types Reality Misperception Mood Dysfunction Anxiety Cognitive Competence Social Competence Somatoform Dysfunction Substance Dependence Motivation and Impulse Control and Socialization Dysfunction

that we can construct to discuss the kinds and severities of problems people experience These are not discrete abnormalities but are sorts of dysfunction that can be placed on dimensions of dysfunction

My Age of Anxiety Scott Stossel, 2014-01-07 A riveting revelatory and moving account of the author's struggles with anxiety and of the history of efforts by scientists philosophers and writers to understand the condition As recently as thirty five years ago anxiety did not exist as a diagnostic category Today it is the most common form of officially classified mental illness Scott Stossel gracefully guides us across the terrain of an affliction that is pervasive yet too often misunderstood Drawing on his own long standing battle with anxiety Stossel presents an astonishing history at once intimate and authoritative of the efforts to understand the condition from medical cultural philosophical and experiential perspectives He ranges from the earliest medical reports of Galen and Hippocrates through later observations by Robert Burton and Søren Kierkegaard to the investigations by great nineteenth century scientists such as Charles Darwin William James and Sigmund Freud as they began to explore its sources and causes to the latest research by neuroscientists and geneticists Stossel reports on famous individuals who struggled with anxiety as well as on the afflicted generations of his own family His portrait of anxiety reveals not only the emotion's myriad manifestations and the anguish anxiety produces but also the countless psychotherapies medications and other often outlandish treatments that have been developed to counteract it Stossel vividly depicts anxiety's human toll its crippling impact its devastating power to paralyze while at the same time exploring how those who suffer from it find ways to manage and control it My Age of Anxiety is learned and empathetic humorous and inspirational offering the reader great insight into the biological cultural and environmental factors that contribute to the affliction

Higher-Order Theories of Consciousness Rocco J. Gennaro, 2004-04-23 Higher Order HO theories of consciousness have in common the idea that what makes a mental state conscious is that it is the object of some kind of higher order representation This volume presents fourteen previously

unpublished essays both defending and criticizing this approach to the problem of consciousness It is the first anthology devoted entirely to HO theories of consciousness There are several kinds of HO theory such as the HOT higher order thought and HOP higher order perception models and each is discussed and debated Part One contains essays by authors who defend some form of HO theory Part Two includes papers by those who are critics of the HO approach Some of the topics covered include animal consciousness misrepresentation the nature of pain subvocal speech subliminal perception blindsight the nature of emotion the difference between perception and thought first order versus higher order theories of consciousness and the relationship between nonconscious and conscious mentality Series A *Clear Your Clutter With Feng Shui* Karen Kingston, 2013-05-30 What a great book I have read it twice in a week and underline more of it each time Thanks Karen for helping me to simplify my life in a joyful way Louise Hay Clearing clutter can radically transform your life Drawing on her wealth of experience as a feng shui space clearing and clutter clearing consultant Karen Kingston explains how clutter is stuck energy that has far reaching physical mental emotional and spiritual effects This book will motivate you to clutter clear as never before once you realise just how much your junk has been holding you back Learn Why people keep clutter How clutter causes stagnation in every area of your life Why clearing clutter is essential for effective feng shui How to clear clutter quickly and effectively Karen Kingston's top ten clutter clearing tips **Textbook Of Occupational Medicine**
