*Evaluation of the International Finance Corporation's Global Trade Finance Program, 2006-12* The World Bank, 2013-09-04 As part of its strategy to support global trade the World Bank Group seeks to enhance trade finance in emerging markets In 2005 the International Finance Corporation IFC part of the Bank Group introduced the Global Trade Finance Program GTFP to support the extension of trade finance to underserved clients globally This IEG evaluation found that overall the GTFP was a relevant response to the demand to reduce risk in trade finance in emerging markets The program significantly improved IFC's engagement in trade finance by introducing an open network of banks and a quick flexible response platform to support the supply of trade finance IEG's evaluation covers the program's operations from its inception in 2005 through FY2012 The program grew from a 500 million annual commitment to 5 billion in FY12 It accounted for 39 percent of total IFC commitments and has low costs it accounted for 2.4 percent of IFC's capital use and 1.2 percent of its staff costs and has had no claims to date It is profitable as well although not to the extent originally expected accounting for 0.6 percent of IFC's net profit IEG found that the GTFP has particular additionality among higher risk countries In its early years it was concentrated in these countries particularly in Africa During the global crisis the program risk mitigation instrument became relevant in much broader markets Client feedback on the program has been positive In its evaluation IEG does offer several recommendations to enhance its effectiveness including on issues of transparency and reporting methods as well as expanding the share of the program in needier markets For development professionals the lessons in this evaluation can be applied to private sector development situations particularly mitigation of financing risks in emerging markets

*The Big Business of Small Enterprises* World Bank, 2015-02-13 The World Bank Group promotes small and medium enterprise SME growth through both systemic and targeted interventions Targeting means focusing benefits on one size class of firms to the exclusion of others Targeted support for SMEs is a big business for the World Bank Group averaging around 3 billion a year in commitments expenditures and gross exposure over the 2006 12 period In the context of broader reforms such targeted support can be a powerful tool Targeting SMEs is not an end in itself but a means to create economies that can employ more people and create more opportunity for citizens to achieve prosperity A thriving and growing SME sector is associated with rapidly growing economies A central challenge is to level the economic playing field by ensuring dynamic markets strengthening market support institutions and removing constraints to participation IEG found that financial sector development can have both a pro growth and pro poor impact by alleviating SMEs financing constraints enabling new entry of firms and entrepreneurs and better resource allocation Layered on top of this are targeted forms of assistance these interventions may build on a foundation of more systemic reforms may come in tandem with them or may in fact be a means to build systemic reforms from the bottom up Any credible justification of targeted support to SMEs must be focused on establishing well functioning markets and institutions not simply providing a temporary supply of benefits to a small group of firms during a project s lifespan Thus targeted interventions need to leverage resources to produce broader benefits for institutions and markets To make targeted support for SMEs more effective the World Bank Group needs to do several things Clarify its approach to targeted support to SMEs Enhance the support s relevance and additionality Institute a tailored research agenda Strengthen guidance and quality control for such support Reform MIGA s Small Investment Program
