McLean, Michael E. Vance, 2008-11-10 Many writers of the late nineteenth and early twentieth centuries emphasized the virtues of early rural pioneers and life on the land as a general criticism of what they perceived to be the negative alienating influence of Ontario's rapid urban and industrial expansion Such work often highlighted the difficulties the recent emigrant faced the clearing of forest and the breaking of new ground the isolation and long Canadian winters however they in turn celebrated the progress demonstrated in the pioneer's domination over nature the establishment of thriving communities and the extension of transportation networks William Wye Smith a popular nineteenth century Upper Canadian poet was no exception Smith prepared his *Canadian Reminiscences* a hand written compilation of anecdotes collected during his lifetime that relate to his experience as journalist clergyman and son of Scottish settlers to provide his own unique perspective of pioneer life This fully annotated version of Smith's unpublished manuscript highlights Smith's unwitting testimony to the social life of the province his relationship to the construction and maintenance of Scottish and Canadian identity as well as his position in literary history **A History of Bishops Cleeve and Woodmancote** David H. community in London's Roaring 20s and hear about the secret Florence Mills memorial concert they held in 1928. Acquaint yourself with Buddy Bradley, Black tap and ballet choreographer who reshaped dance in British musicals, often to be found at No 1 Coward's apartment for late night rehearsals, such as Bradley's importance. Meet Jack Johnson, the first African American Heavyweight Boxing Champion who toured Britain's theatres during World War 1 and brought the sounds of Chicago to places like war-weary Dundee. Discover the most prolific Black theatre practitioner you've never heard of, William Garland, who worked for 40 years across multiple continents and championed Black British performers. Marvel at performers like cabaret star Mabel Mercer, born in Stafford in 1900, who sang and conducted theatre orchestras across the UK, as well as Black Birmingham comedian Eddie Emerson, who was Garland's partner for decades. Many of their names and works have never been included in histories of the British musical until now.

Building Engines for War Edward M. Young, 2023-11-13 Dive into the heart of wartime innovation and manufacturing through this groundbreaking book, unveiling a riveting narrative of technological mastery and organizational ingenuity. This meticulously researched work challenges conventional views of wartime production, offering a fresh perspective on the incredible efforts that drove the Allies to victory. Young's insightful analyses illuminate the strategic collaboration between the aerospace and automotive industries, showcasing their collective adaptation that created the engines powering victory. Spanning continents, Young examines the transformation of aircraft engine manufacturing during World War II, unearthing the operations of key players such as the Bristol Aeroplane Company and Pratt & Whitney. It is a critical foundation for understanding the dynamics of wartime production that continue to influence our world today. Edward Young's reconstruction and analysis of the Allies' massive World War II aircraft engine programs is priceless, unique, thorough, and critical, all at once. Philip Scranton, Professor Emeritus, History of Industry and Technology, Rutgers University. Publishers' circular and booksellers' record, 1896 *Publishers' Circular and Booksellers' Record of British and Foreign Literature*, 1895 **Catalogue of the Lending Department of the Library of the Corporation of the City of London** Corporation of London. Library, 1911 *Assembling cultures* Jack

Saunders, 2019-05-10 In British political discourse, the idea that in the 1970s trade unions ran the country has become a truism, a folk mythology invoked against the twin perils of socialism and strikes. But who exactly wielded power in Britain's workplaces, and on what terms? *Assembling cultures* takes a fine-grained look at factory activism in the motor industry between 1945 and 1982, using car manufacturing as a key case for unpicking important narratives around affluence, declinism, and class. It traces the development of the militant car worker stereotype and looks at the real social relations that lay behind

car manufacturing's reputation for conflict. In doing so, this book reveals a changing complex world of social practices, cultural norms, and shared values and expectations. From relatively meagre interwar trade union traditions during the post-war period, car workers developed shop floor organisations of considerable authority, enabling some to make new demands of their working lives but constraining others in their more radical political aims. *Assembling Cultures* documents in detail a historic process where, from the 1950s, groups and individuals set about creating and reproducing collective power and asks what that meant for their lives. This is a story of workers and their place in the power relations of post-war Britain. This book will be invaluable to lecturers and students studying the history, sociology, and politics of post-war Britain, particularly those with an interest in power, rationality, class, labour, gender, and race. The detailed analysis of just how solidarity, organisation, and collective action were generated will also prove useful to trade union activists.

Forging Modernity Martin

Hutchinson, 2023-03-30. The Industrial Revolution provided the greatest increase in living standards the world has ever known while propelling Britain to dominance on the global stage. In *Forging Modernity*, Martin Hutchinson looks at how and why Britain gained this prize ahead of its European competitors. After comparing their endowments and political structures as far back as 1600, he then traces how Britain, through better policies primarily from the political Tory party, diverged from other European countries. Hutchinson's Harvard MBA allows a unique perspective on the early industrial enterprises; many successes resulted from marketing, control systems, and logistics rather than from production technology alone. While on a national scale, the scientific method and commercial competition were as important as physical infrastructure. By 1830, through ever-improving policies, Britain had built a staggering industrial lead, half a century ahead of its rivals. Then the Tories lost power and policy changed forever. In his conclusion, Hutchinson shows how changes welcomed by conventional historians caused the decline of Industrial Britain. Nevertheless, the policies that drove growth, ingenuity, and rising living standards are still available for those bold enough to adopt them.
