The Hako Song Pipe And Unity In A Pawnee Calumet Ceremony:

The Hako Alice Cunningham Fletcher, 1996-01-01 One of the more complex and widespread rituals practiced by Native American groups focused on the calumet a sacred pipe with a feathered shaft The Calumet Ceremony was a powerful ritual through which members of another tribe were adopted It also promoted social unity within tribes and facilitated contact and trade between them Perhaps the most detailed description of a Calumet Ceremony was recorded near the turn of the century by ethnographer Alice C Fletcher Fletcher witnessed the Hako a version of the Calumet Ceremony practiced by the Chaui clan of the Pawnee With the invaluable assistance of Tahirussawichi a Pawnee Ku rahu or ceremonial leader and renowned Indian scholar James R Murie himself a Pawnee the author describes in marvelous detail the intricate rhythm and structure of the ceremony Each song of the Hako is transcribed translated interpreted by the Pawnee Ku rahu and later analyzed by the author Fletcher concludes that the Hako promised longevity fertility and prosperity to individuals and worked to insure friendship and peace between clans and tribes The Hako originally published in 1904 is introduced by Helen Myers an associate professor of music at Trinity College and the ethnomusicology editor of the New Grove Dictionary of Music and Musicians

Early American Cartographies Martin Brückner, 2012-12-01 Maps were at the heart of cultural life in the Americas from before colonization to the formation of modern nation states The fourteen essays in *Early American Cartographies* examine indigenous and European peoples creation and use of maps to better represent and understand the world they inhabited Drawing from both current historical interpretations and new interdisciplinary perspectives this collection provides diverse approaches to understanding the multilayered exchanges that went into creating cartographic knowledge in and about the Americas In the introduction editor Martin Bruckner provides a critical assessment of the concept of cartography and of the historiography of maps The individual essays then range widely over space and place from the imperial reach of Iberian and British cartography to indigenous conceptualizations including dirty ephemeral maps and star charts to demonstrate that pre nineteenth century American cartography was at once a multiform and multicultural affair This volume not only highlights the collaborative genesis of cartographic knowledge about the early Americas the essays also bring to light original archives and innovative methodologies for investigating spatial relations among peoples in the western hemisphere Taken together the authors reveal the roles of early American cartographies in shaping popular notions of national space informing visual perception animating literary imagination and structuring the political history of Anglo and Ibero America The contributors are Martin Bruckner University of Delaware Michael J Drexler Bucknell University Matthew H Edney University of Southern Maine Jess Edwards Manchester Metropolitan University Junia Ferreira Furtado Universidade Federal de Minas Gerais Brazil William Gustav Gartner University of Wisconsin Madison Gavin Hollis Hunter College of the City University of New York Scott Lehman independent scholar Ken MacMillan University of Calgary Barbara E Mundy Fordham University Andrew Newman Stony Brook University Ricardo Padron University of Virginia Judith Ridner

Mississippi State University *The Origins of Music* Carl Stumpf, 2012-07-26 Carl Stumpf was one of the founding fathers of Gestalt psychology In this volume first published in German in 1911 he discusses the origin and forms of musical activity as well as various theories on the origin of music **Cognitive Archaeology** David Whitley, Johannes Loubser, Gavin Whitelaw, 2019-11-28 Cognitive Archaeology Mind Ethnography and the Past in South Africa and Beyond aims to interpret the social and cultural lives of the past in part by using ethnography to build informed models of past cultural and social systems and partly by using natural models to understand symbolism and belief How does an archaeologist interpret the past Which theories are relevant what kinds of data must be acquired and how can interpretations be derived One interpretive approach developed in southern Africa in the 1980s has been particularly successful even if still not widely known globally With an expressed commitment to scientific method it has resulted in deeper well tested understandings of belief ritual settlement patterns and social systems This volume brings together a series of papers that demonstrate and illustrate this approach to archaeological interpretation including contributions from North America Western Europe and sub Saharan Africa in the process highlighting innovative methodological and substantive research that improves our understanding of the human past Professional archaeological researchers would be the primary audience of this book Because of its theoretical and methodological emphasis it will also be relevant to method and theory courses and postgraduate students The Routledge Handbook of the History of Race and the American Military Geoffrey Jensen, 2016-04-20 The Routledge Handbook of the History of Race and the American Military provides an important overview of the main themes surrounding race in the American military establishment from the French and Indian War to the present day By broadly incorporating the latest research on race and ethnicity into the field of military history the book explores the major advances that have taken place in the past few decades at the intersection of these two fields The discussion goes beyond the study of battles and generals to look at the other peoples who were involved in American military campaigns and analyzes how African Americans Native Americans Asian Americans and Chicanos helped shape the course of American History both at home and on the battlefield The book also includes coverage of American imperial ambitions and the national response to encountering other peoples in their own countries The Routledge Handbook of the History of Race in the American Military defines how the history of race and ethnicity impacts military history over time and comparatively while encouraging scholarship on specific groups periods and places This important collection presents a comprehensive survey of the current state of the field **War Party in Blue** Mark van de Logt, 2012-11-08 Between 1864 and 1877 during the height of the Plains Indian wars Pawnee Indian scouts rendered invaluable service to the United States Army They led missions deep into contested territory tracked resisting bands spearheaded attacks against enemy camps and on more than one occasion saved American troops from disaster on the field of battle In War Party in Blue Mark van de Logt tells the story of the Pawnee scouts from their perspective detailing the battles in which they served and recounting hitherto neglected episodes Employing military records archival sources and

contemporary interviews with current Pawnee tribal members some of them descendants of the scouts Van de Logt presents the Pawnee scouts as central players in some of the army's most notable campaigns He argues that military service allowed the Pawnees to fight their tribal enemies with weapons furnished by the United States as well as to resist pressures from the federal government to assimilate them into white society According to the author it was the tribe's martial traditions deeply embedded in their culture that made them successful and allowed them to retain these time honored traditions The Pawnee style of warfare based on stealth and surprise was so effective that the scouts commanding officers did little to discourage their methods Although the scouts proudly wore the blue uniform of the U S Cavalry they never ceased to be Pawnees The Pawnee Battalion was truly a war party in blue

An Archaeology of the Cosmos Timothy R. Pauketat, 2013 An Archaeology of the Cosmos seeks answers to two fundamental questions of humanity and human history The first question concerns that which some use as a defining element of humanity religious beliefs Why do so many people believe in supreme beings and holy spirits The second question concerns changes in those beliefs What causes beliefs to change Using archaeological evidence gathered from ancient America especially case material from the Great Plains and the pre Columbian American Indian city of Cahokia Timothy Pauketat explores the logical consequences of these two fundamental questions Religious beliefs are not more resilient than other aspects of culture and society and people are not the only causes of historical change An Archaeology of the Cosmos examines the intimate association of agency and religion by studying how relationships between people places and things were bundled together and positioned in ways that constituted the fields of human experience This rethinking theories of agency and religion provides readers with challenging and thought provoking conclusions that will lead them to reassess the way they approach the past
